

What Is The H Index

JR Anderson

Herfindahl-Hirschman index - Wikipedia The Herfindahl index (also known as Herfindahl-Hirschman Index, HHI, or sometimes HHI-score) is a measure of the size of firms in relation to the industry they are in and is an indicator of the amount of competition among them. *g-index - Wikipedia* The h-index does not average the number of citations. Instead, the h-index only requires a minimum of n citations for the least-cited article in the set and thus ignores the citation count of very highly cited publications. **Index of a subgroup - Wikipedia** In mathematics, specifically group theory, the index of a subgroup H in a group G is the number of left cosets of H in G, or equivalently, the number of right cosets of H in G. **Altmetrics - Wikipedia** In scholarly and scientific publishing, altmetrics (stands for "alternative metrics") are non-traditional bibliometrics [2] proposed as an alternative [3] or complement [4] to more traditional citation impact metrics, such as impact factor and h-index. [5] **h-index - Wikipedia** The h-index is the largest h such that h articles have at least h citations each. For example, if an author has five publications, with 9, 7, 6, 2, and 1 citations (ordered from greatest to least), then the author's h-index is 3, because the author has three publications with 3 or more citations. **Author-level metrics - Wikipedia** Because the h-index was never meant to measure future publication success, recently, a group of researchers has investigated the features that are most predictive of future h-index. **Theil index - Wikipedia** The Theil index can be transformed into an Atkinson index, which has a range between 0 and 1 (0% and 100%), where 0 indicates perfect equality and 1 (100%) indicates maximum inequality. *SCImago Journal Rank - Wikipedia* The SCImago web site [9] gives both the SJR and H index, and the results are quite different. Here are the journals ranking in the top three for each of the metrics. **Human Development Index - Wikipedia** The index is based on the human development approach, developed by Mahbub ul-Haq, anchored in Amartya Sen 's work on human capabilities, and often framed in terms of whether people are able to "be" and "do" desirable things in life. **Impact factor - Wikipedia** The Immediacy Index is the average number of times an article is cited in the year it is published. The journal Immediacy Index indicates how quickly articles in a journal are cited.

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
