log linear analysis wikipedia - Sep 15 2023

log linear analysis is a technique used in statistics to
examine the relationship between more than two categorical
variables the technique is used for both hypothesis testing
and model building in both these uses models are tested to
find the most parsimonious i e least complex model that best
accounts for the variance in the observed frequencies a
pearson s chi square test could be used instead of log linear
analysis but that technique only allows for two of the
variables to be c
