The Power of Habit Charles Duhigg, 2012-04-05 There's never been a better time to set new habits. This book will change

your life. In *The Power of Habit*, award-winning journalist Charles Duhigg takes us into the thrilling and surprising world of the scientific study of habits. He examines why some people and companies struggle to change, despite years of trying, while others seem to remake themselves overnight. He visits laboratories where neuroscientists explore how habits work and where, exactly, they reside in our brains. And he uncovers how the right habits were crucial to the success of Olympic swimmer Michael Phelps, Starbucks CEO Howard Schultz, and civil-rights hero Martin Luther King, Jr. The result is a compelling argument and an empowering discovery: the key to exercising regularly, losing weight, raising exceptional children, becoming more productive or even building revolutionary companies is understanding how habits work. By harnessing this new science, we can transform our businesses, our communities, and our lives.

Summary of *The Power of Habit* by Charles Duhigg Preview: *The Power of Habit* by Charles Duhigg is a thorough examination of several case studies about how habit formation and habit change impact daily life. It details the experiences of individuals, corporations, and organizations to illustrate how habits are made and why, how they can be changed, how habits of all kinds are used in businesses to attract customers or manage employees, and the devastating results of a poorly managed habit. Several studies of individuals with unusual habits or habit changes explain the neurological mechanisms that form habits in the brain. The habit, stored in the basal ganglia for neural efficiency, is the result of a loop comprised of three parts. These parts are a cue that triggers the habit loop, a routine to execute, and feedback, or a reward, that tells the brain to remember the habit for the future. Habits can be changed by retaining the cue and reward... Many of our choices are not based on careful decision-making. They are instead habits and these habits have a tremendous influence on our health and productivity. Once we understand how habits are formed and how they work, we can learn how to change them. This book is divided into three parts. The first

part focuses on the habits of individuals. In this section, DuHigg explains the habit loop and how habits work. A habit loop is made up of a cue or trigger, a routine, and a reward. DuHigg's examples show us how once habits are lodged in our brain, they influence how we act--often without our realizing it. Advertisers take advantage of our habits to convince us to buy their products. Advertisers know that cravings are what drive the habit loop from the cue to the routine to the reward and back again. They are also aware that knowing how to spark a craving is the key to creating a new habit...

The Power of Habit Abookaday,2016-07-27 This review of the bestselling book The Power of Habit: Why We Do What We Do in Life and Business by Charles Duhigg offers a detailed summary of the book's main themes and evidentiary support, chapter by chapter life hack lessons that distill the content into practical tips, and an analysis and critique of the books strengths and weaknesses. The Power of Habit is organized into three parts. Part one examines the source of individual habits, the neurology of habits, and methods of changing habits on a personal level. Part two examines the habits of successful companies and organizations and how leadership might conceptualize habit change at the institutional level. Part three investigates social habits, and in particular, the role they play in times of larger societal shifts. A central thesis that Duhigg returns to throughout the book is that habits are central to our lives as individuals, institutions and larger social groups. If we have a better understanding of the mechanics of habit formation then we can exercise more agency in affecting positive change on all of those levels. The work draws on scholarship from neurological and behavioral science, corporate research, and hundreds of interviews. In addition, the author draws heavily on stories of people and events to provide anecdotal support and cogent examples of his theories of habit and habit change. Duhigg is a Pulitzer Prize winning journalist for The New York Times where he writes on business topics. He has a background in History from Yale University and an MBA from the Harvard Business School. In 2010 he won the Science in Society Journalism Award from the National Association for Science Writers. Download your copy today! Available on PC, Mac, smart phone, tablet or Kindle device.
