web oct 12 2017 the question wants me to evaluate a
natural cubic spline at different s x values i am able to do
that and get correct responses but the question also asks for
the aj bj cj dj xj that are in the code at the current s x value
and i can not figure out how to find those values at the

current s x value could anyone help me figure this out

web jul 23 2012 the problem of this method is that it
produces discontinuous estimation of the function this is
annoying when modeling function that describes natural
phenomenon because these functions are often continuous
amongst other interpolation methods the cubic spline
interpolation can solve this problem

web description example s spline x y xq returns a vector of
interpolated values s corresponding to the query points in xq
the values of s are determined by cubic spline interpolation
of x and y example pp spline x y returns a piecewise
polynomial structure for use by ppval and the spline utility
