Herman Melville Katie McGettigan, 2017-11-07 In this imaginative book, Katie McGettigan argues that Melville's novels and poetry demonstrate a sustained engagement with the physical, social, and economic materiality of industrial and commercial forms of print. Further, she shows that this aesthetics of the material text, central both to Melville's stylistic signature and to his innovations in form, allows Melville to explore the production of selfhood, test the limits of narrative

authenticity, and question the nature of artistic originality. Combining archival research in print and publishing history with close reading, McGettigan situates Melville's works alongside advertising materials, magazine articles, trade manuals, and British and American commentary on the literary industry to demonstrate how Melville's literary practice relies on and aestheticizes the specific conditions of literary production in which he worked. For Melville, the book is a physical object produced by particular technological processes, as well as an entity that manifests social and economic values. His characters carry books, write on them, and even sleep on them; they also imagine, observe, and participate in the buying and selling of books. Melville employs the book's print, paper, and binding - and its market circulations - to construct literary figures, to shape textual form, and to create irony and ambiguity. Exploring the printed book in Melville's writings brings neglected sections of his poetry and prose to the fore and invites new readings of familiar passages and images. These readings encourage a reassessment of Melville's career as shaped by his creative engagements with print, rather than his failures in the literary marketplace. McGettigan demonstrates that a sustained and deliberate imaginative dialogue with the material text is at the core of Melville's expressive practice and that, for Melville, the printed book served as a site for imagining the problems and possibilities of modernity.

Mechanisms of Circadian Systems in Animals and Their Clinical Relevance Raúl Aguilar-Roblero, Mauricio Díaz-Muñoz, Mária Luisa Fanjul-Moles, 2014-10-31 Well known experts in the field of Chronobiology from around the world, provide an integrative view of the state of the art of circadian biology. At present, genetic and epigenetic interaction of regulatory pathways among circadian oscillators, metabolic networks, cellular differentiation and neuronal communication are subject of intense scrutiny. The book is organized in three sections: The first includes selected examples of the circadian systems of crustaceans, insects, fish, birds and mammals. The second is a detailed view of the physiological mechanisms underlying the circadian clocks in mammals. Finally, in the third section some examples of the relevance of circadian biology and circadian misalignment to health and disease are provided including nutrition and metabolism, obesity, cancer, cardiovascular and pulmonary diseases, Huntington and affective diseases. Kosovo and Serbia Leandrit I. Mehmeti, Branislav Radeljic, 2017-06-17 Azan on the Moon is an in-depth anthropological

study of people's lives along the Pamir Highway in eastern Tajikistan. Constructed in the 1930s in rugged high-altitude terrain, the road fundamentally altered the material and social fabric of this former Soviet outpost on the border with Afghanistan and China. The highway initially brought sentiments of disconnection and hardship, followed by Soviet modernization and development, and ultimately a sense of distinction from bordering countries and urban centers that continues to this day. Based on extensive fieldwork and through an analysis of construction, mobility, technology, media, development, Islam, and the state, Till Mostowlansky shows how ideas of modernity are both challenged and reinforced in contemporary Tajikistan. In the wake of China's rise in Central Asia, people along the Pamir Highway strive to reconcile a modern future with a modern past. Weaving together the road, a population, and a region, *Azan on the Moon* presents a rich ethnography of global connections
