IT Enabled Services Shiro Uesugi,2013-01-08 As the global economy turns more and more service oriented, Information Technology-Enabled Services (ITeS) require greater understanding. Increasing numbers and varieties of services are provided through IT. Furthermore, IT enables the creation of new services in diverse fields previously untouched. Because of the catalyzing nature of internet technology, ITeS today has become more than “Outsourcing” of services. This book illustrates the enabling nature of ITeS with its entailment of IT, thus contributing to the betterment of humanity. The scope of this book is not only for academia but also for business persons, government practitioners and readers from daily lives. Authors from a variety of nations and regions with various backgrounds provide insightful theories, research, findings and practices in various fields such as commerce, finance, medical services, government and education. This book opens up a new horizon with the application of Internet-based practices in business, government and in daily lives. Information Technology-Enabled Services works as a navigator for those who sail to the new horizon of service oriented economies.

The Film Archipelago Antonio Gómez,Francisco-J. Hernández Adrián,2021-12-16 How do the islands and archipelagos of the New World figure in Latin American cinema? Comprising 15 essays and a critical introduction, *The Film Archipelago: Islands in Latin American Cinema* addresses this question by examining a series of intersections between insular spaces and filmmaking in Latin America. The volume brings together international scholars and filmmakers to consider a diverse corpus of films about islands, films that take place on islands, films produced in islands, and films that problematise islands. The book explores a diverse range of films that extend from the Chilean documentaries of Patricio Guzmán to work on the Malvinas/Falkland Islands, and films by Argentine directors Gustavo Fontán and Lucrecia Martel. Chapters focus on Rapa Nui (Easter Island), the Mexican Islas Marías, and the Panamanian Caribbean; on ecocritical, environmental and film

historical aspects of Brazilian and Argentine river islands; and on Cuban, Guadeloupean, Haitian, and Puerto Rican contexts. The Film Archipelago argues that the islands and archipelagos of Latin American cinema constitute a critically interesting, analytically complex, and historically suggestive angle to explore issues of marginality and peripherality, remoteness and isolation, and fragility and dependency. As a whole, the collection demonstrates to what extent the combined insular and archipelagic lens can re-frame and re-figure both longstanding and recent discussions on the spaces of Latin American cinema.

Sweet Diamond Dust Rosario Ferre, 1996-10-01 Rosario Ferre uses family history as a metaphor for the class struggles and political evolution of Latin America and Puerto Rico in this highly provocative, profound, and delightfully readable collection of stories. Originally published in Spanish under the title *Maldito Amor* (Cursed Love), *Sweet Diamond Dust* introduced American readers to a voice that is by turns lyrical and wickedly satiric. In this tale the De La Valle family's secrets, ambitions, and passions, interwoven with the fate of the local sugar mill, are recounted by various relatives, friends, and servants. As the characters struggle under the burden of privilege, the story, permeated with haunting echoes of Puerto Rico's own turbulent history, becomes a splendid allegory for a nation's past. The three accompanying stories each follow the lives of the descendants of the De La Valle family, making the book a drama in four parts, raising troubling issues of race, religion, freedom, and sex, with Ferre's trademark irony and startling imagery.

Affect, Gender and Sexuality in Latin America Cecilia Macón, Mariela Solana, Nayla Luz Vacarezza, 2021-02-23 This book emphasizes the significance of affects, feelings and emotions in how we think about politics, gender and sexuality in Latin America. Considering the complex and even contradictory social processes that the region is experiencing today, many Latin American authors are turning to affect to find a key to understand our present situation, to revisit our history, and to imagine new possibilities for the future. This tendency has shown such a specificity and sometimes departure from northern productions that it compels us to focus more deeply on its own arguments, methods, and critical contributions. This volume features essays that explore the particularities of Latin American ways of thinking about affect and how they can shed new light into our understanding of, gender, sexuality and politics.

Advanced Manufacture Sheng-Jye Hwang, Sen Yung Lee, 2008 Booming economic development in Asia, particularly of the leading manufacturing industries which produce flat-panel displays, communication-devices, computers and other products in the micro/nano field has stimulated an intense research effort in universities, development-oriented institutions and industrial corporations. Such knowledge-based industries have been enjoying an immense growth-potential and thus there is an urgent need for a solid forum for the exchange of various scientific, technical and management aspects ranging across the entire spectrum of society.

Libraries and Society Wendy Evans, David Baker, 2011-04-30 This book reviews both the historical and future roles that public, private, academic and special libraries have in supporting and shaping society at local, regional, national and international levels. Globalisation, economic turmoil, political and ethnic tensions, rapid technology development, global warming and other key environmental factors are all combining in myriad and complex ways to affect everyone, both individually and collectively. Fundamental questions are being asked about the future of society and the bedrock organisations that underpin it. *Libraries and Society* considers the key aspects of library provision and the major challenges that libraries – however defined, managed, developed and provided – now face, and will continue to face in the future. It also focuses on the emerging chapter in cultural, economic and social history and the library's role in serving diverse communities within this new era. - Looks at all types of library in a period of major and discontinuous change, tackling the fundamental questions of the future of libraries in the context of major societal, political and environmental issues - Poses important questions for the profession and policy development - Fills a major gap in literature (recent discourse and debate on the future of democracy, for example, the library is rarely included)

Technological Applications of Dispersions Robert B. McKay, 2020-08-26 This comprehensive guide illustrates the effects of dispersions in applications, the means necessary to achieve these effects with optical results, and how to overcome or avoid the difficulties encountered emphasizing the dispersions of solid particles in liquid or solid media.

Aqueous Polymer Dispersions Klaus Tauer, 2014-01-15 The incessant interest in aqueous polymer dispersions (APD) since more than 90 years can be related to the almost unlimited possibilities to tailor APD to specific needs. These proceedings from an international symposium on Polymer Colloids: Preparation & Properties of Aqueous Polymer Dispersions held at the Swabian Conference Center (Kloster Irsee, Germany) witness this statement. The 33 contributions cover important aspects of APD such as control of particle size and stabilization, different polymerization technologies, applications as binders, paints, or as supports for proteins and hence, span the whole range from academic to practical.
