Education at a Glance 2018 OECD Indicators OECD,2018-09-11 Education at a Glance: OECD Indicators is the authoritative source for information on the state of education around the world. It provides data on the structure, finances and performance of education systems in the 35 OECD and a number of partner countries.

Tuition Rising Ronald G. Ehrenberg,2009-07-01 America's colleges and universities are the best in the world. They are also the most expensive. Tuition has risen faster than the rate of inflation for the past thirty years. There is no indication that this trend will abate. Ronald G. Ehrenberg explores the causes of this tuition inflation, drawing on his many years as a teacher and researcher of the economics of higher education and as a senior administrator at Cornell University. Using incidents and examples from his own experience, he discusses a wide range of topics including endowment policies, admissions and financial aid policies, the funding of research, tenure and the end of mandatory retirement, information technology, libraries and distance learning, student housing, and intercollegiate athletics. He shows that colleges and universities, having multiple, relatively independent constituencies, suffer from ineffective central control of their costs. And in a fascinating analysis of their response to the ratings published by magazines such as U.S. News & World Report, he shows how they engage in a dysfunctional competition for students. In the short run, colleges and universities have little need to worry about rising tuitions, since the number of qualified students applying for entrance is rising even faster. But in the long run, it is not at all clear that the increases can be sustained. Ehrenberg concludes by proposing a set of policies to slow the institutions' rising tuitions without damaging their quality.

The Condition of Education, 2020 Education Department,2021-04-30 The Condition of Education 2020 summarizes important developments and trends in education using the latest available data. The report presents numerous indicators on the status and condition of education. The indicators represent a consensus of professional judgment on the most significant national measures of the condition and progress of education for which accurate data are available. The Condition of Education includes an At a Glance section, which allows readers to quickly make comparisons across indicators, and a Highlights section, which captures key findings from each indicator. In addition, The Condition of Education contains a Reader's Guide, a Glossary, and a Guide to Sources that provide additional background information. Each indicator provides links to the source data tables used to produce the analyses.

Simulation and Its Discontents Sherry Turkle, 2022-11-01 How the simulation and visualization technologies so pervasive in science, engineering, and design have changed our way of seeing the world. Over the past twenty years, the technologies of simulation and visualization have changed our ways of looking at the world. In *Simulation and Its Discontents*, Sherry Turkle examines the now dominant medium of our working lives and finds that simulation has become its own sensibility. We hear it in Turkle's description of architecture students who no longer design with a pencil, of science and engineering students who admit that computer models seem more "real" than experiments in physical laboratories. Echoing architect Louis Kahn's famous question, "What does a brick want?", Turkle asks, "What does simulation want?" Simulations want, even demand, immersion, and the benefits are clear. Architects create buildings unimaginable before virtual design; scientists determine the structure of molecules by manipulating them in virtual space; physicians practice anatomy on digitized humans. But immersed in simulation, we are vulnerable. There are losses as well as gains. Older scientists describe a younger generation as "drunk with code." Young scientists, engineers, and designers, full citizens of the virtual, scramble to capture their mentors' tacit knowledge of buildings and bodies. From both sides of a generational divide, there is anxiety that in simulation, something important is slipping away. Turkle's examination of simulation over the past twenty years is followed by four in-depth investigations of contemporary simulation culture: space exploration, oceanography, architecture, and biology.

The Leader in Me Stephen R. Covey, 2012-12-11 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? *The Leader in Me* is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught *The 7 Habits of Highly Effective People* to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Rethinking School: How to Take Charge of Your Child's Education Susan Wise Bauer,2018-01-09 “If you read only one book on educating children, this should be the book.... With a warm, informative voice, Bauer gives you the knowledge that will help you flex the educational model to meet the needs of your child.” —San Francisco Book Review Our K-12 school system isn't a good fit for all—or even most—students. It prioritizes a single way of understanding the world over all others, pushes children into a rigid set of grades with little regard for individual maturity, and slaps “disability” labels on differences in learning style. Caught in this system, far too many young learners end up discouraged. This informed, compassionate, and practical guidebook will show you how to take control of your child's K-12 experience and negotiate the school system in a way that nurtures your child's mind, emotions, and spirit. Understand why we have twelve grades, and why we match them to ages. Evaluate your child's maturity, and determine how to use that knowledge to your advantage. Find out what subject areas we study in school, why they exist—and how to tinker with them. Discover what learning disabilities and intellectual giftedness are, how they can overlap, how to recognize them, and how those labels can help (or hinder) you. Work effectively with your child's teachers, tutors, and coaches. Learn to teach important subjects yourself. Challenge accepted ideas about homework and standardized testing. Help your child develop a vision for the future. Reclaim your families' priorities (including time for eating together, playing, imagining, traveling, and, yes, sleeping!). Plan for college—or apprenticeships. Consider out-of-the-box alternatives.

A Bee in the Sheets Beth Enson,2001 I get a kind of high reading Beth Enson's work, like I do breathing the high mountain air of New Mexico. Her language and vision are always unexpected and original. Her work arises not only from a great well of comic sense, but from her amazing grasp of the peculiar reality of human beings. I'm always astonished. --Ruth Stone.

Paying for College Howard R. Greene,Matthew W. Greene,2004-10-05 In the last 20 years, tuition has increased by a factor of more than 200 percent, which is 3 times the increase in earned income of the average family. It takes from 25 to 30 percent of a family's yearly after tax earnings to pay for a single child's college education. Utilizing their access to college counseling, admissions, and financial aid professionals at colleges and universities across the country, this father and son team have developed a program to make paying for college manageable. They enlighten, motivate, and encourage students and their parents to follow a set of 10 principles designed to help families get a handle on saving and financing a college education. Their mission is to reassure and to help families of every income level and at every stage of preparation to plan a strategy for paying for college.

The Political Economy of Higher Education Finance Julian L. Garritzmman,2018-06-09 This book analyzes the political economy of higher education finance across a range of OECD countries, exploring why some students pay

extortionate tuition fees whilst for others their education is free. What are the redistributive consequences of these different tuition-subsidy systems? Analysing the variety of existing systems, Garritzmann shows that across the advanced democracies “Four Worlds of Student Finance” exist. Historically, however, all countries’ higher education systems looked very much alike in the 1940s. The book develops a theoretical model, the Time-Sensitive Partisan Theory, to explain why countries have evolved from a similar historical starting point to today’s very distinct Four Worlds. The empirical analyses combine a wide variety of qualitative and quantitative evidence, studying higher education policies in all advanced democracies from 1945-2015.

Digest of Education Statistics, 2020 Education Department, 2022-06-30 The Digest of Education Statistics provides a compilation of statistical information covering the broad field of education from prekindergarten through graduate school. It includes a selection of data from many sources and draws especially on the results and activities carried out by the National Center for Education Statistics (NCES).

Abolishing School Fees in Africa, 2009 Progress in literacy and learning, especially through universal primary education, has done more to advance human conditions than perhaps any other policy. Our generation has the possibility of becoming the first generation ever to offer all children access to good quality basic education. But it will only happen if we have the political commitment -- at the country as well as at the international level -- to give priority to achieve this first in human history. And it will only happen if also those who cannot afford to pay school fees can benefit from a complete cycle of good quality primary education. Investment in good quality fee-free primary education should be a cornerstone in any government's poverty reduction strategy.

Really Good Schools James Tooley, 2021-04-12 James Tooley has taken his argument about the transformative power of low-cost private education to a new and revelatory level in *Really Good Schools*. This is a bold and inspiring manifesto for a global revolution in education. —Niall C. Ferguson, Milbank Family Senior Fellow, Hoover Institution, Stanford University Almost overnight a virus has brought into question America's nearly 200-year-old government-run K-12 school-system—and prompted an urgent search for alternatives. But where should we turn to find them? Enter James Tooley's *Really Good Schools*. A distinguished scholar of education and the world's foremost expert on private, low-cost innovative education, Tooley takes readers to some of the world's most impoverished communities located in some of the world's most dangerous places—including such war-torn countries as Sierra Leone, Liberia, and South Sudan. And there, in places where education experts fear to tread, Tooley finds thriving private schools that government, multinational NGOs, and even international charity officials deny exist. Why? Because the very existence of low-cost, high-quality private schools shatters the prevailing myth in the U.S., U.K., and western Europe that, absent government, affordable, high-quality schools for the poor could not

exist. But they do. And they are ubiquitous and in high demand. Founded by unheralded, local educational entrepreneurs, these schools are proving that self-organized education is not just possible but flourishing—often enrolling far more students than free government schools do at prices within reach of even the most impoverished families. In the course of his analysis Tooley asks the key questions: | What proportion of poor children is served? | How good are the private schools? | What are the business models for these schools? | And can they be replicated and improved? The evidence is in. In poor urban and rural areas around the world, children in low-cost private schools outperform those in government schools. And the schools do so for a fraction of the per-pupil cost. Thanks to the pandemic, parents in America and Europe are discovering that the education of their children is indeed possible—and likely far better—without government meddling with rigid seat-time mandates, outdated school calendars, absurd age-driven grade levels, and worse testing regimes. And having experienced the first fruits of educational freedom, parents will be increasingly open to the possibilities of ever greater educational entrepreneurship and innovation. Thankfully, they have Really Good Schools to show the way.

School Leadership for Democratic Education in South Africa Tsediso Michael Makoele, Thabo Makhalemele., Pierre du Plessis, 2021-07-29 *School Leadership for Democratic Education in South Africa* explores the democratization and modernization of education in South Africa, analyzing the state of school leadership in South African schools from the time of the new democratic education dispensation in 1994 to the present day. The book maps out what the future of education in South Africa could look like and explores the most conducive educational environments for change in South African schools. It adopts a critical approach to analyzing leadership and management in the context of school governance, school effectiveness, teacher development, multiculturalism and equity in education. Contributions explore the democratization and modernization of education in South Africa through examining different perspectives, achievements and challenges, and also consider issues around access to technology, language policy and the curriculum along with new literature on selected aspects of leadership. This book will be of great interest for researchers, scholars, and students in the fields of educational leadership, sociology of education, and teacher education.

Investing in Your Child's Future Nicola Field, 2012-01-24 Most parents dream of giving their children the best possible education. However an education - primary, secondary and tertiary - costs money. Parents of a child born in 2006 can pay approximately \$250K for a child's lifetime education according to the latest research from the Australian Scholarships Group. And costs are constantly on the rise. *Investing in Your Child's Future* is aimed at parents and future parents, grandparents and other family members, and covers children's education from pre-school to tertiary studies. It is designed to show readers how they can secure and contribute to their children's future and can benefit from a higher education at the institution of their choice, without sacrificing their lifestyle or financial security, and regardless of their income. *Investing in Your Child's Future* shows readers how they can finance all, or some, of their children's education by planning ahead, implementing

simple strategies and saving money as early and as regularly as possible. When your children are young, it's easy to delay funding their education as it is not an immediate expense. However, education is a major expense, regardless of whether you choose a private or public education, and the sooner you start saving, the more money you will accumulate, and the sooner you can stop worrying about your child's future.
