Instituto Geológico y Minero de España

La construcción medieval Eugène-Emmanuel Viollet-le-Duc, 1996 El artículo Construcción del célebre Dictionnaire raisonné de Viollet-le-Duc, describe aquel periodo de la historia de la construcción en el que la arquitectura resultante es inseparable de las disposiciones constructivas que la hacen posible. Viollet explica los principios de la partida, su desarrollo, adaptación y transformación, a través de una serie de ejemplos, analizados detalladamente y justificados con asombrosa perspicacia, y no pierde la oportunidad de mostrarlos como ejemplo a seguir por la arquitectura de su (nuestro) tiempo.

La construcción de puentes en el siglo XVIII Jean-Rodolphe Perronet, 2005 Este libro recopila, por primera vez en español en una obra conjunta, la parte más significativa del trabajo escrito realizado por Jean Rodolphe Perronet (1708-1794) así como la totalidad de las láminas de dichos trabajos. La obra de Perronet, originalmente publicada en Francia en 1782 por la Imprenta Real sigue siendo poco conocida hoy en día. Su trabajo es parte del desarrollo general de la ingeniería francesa de las estructuras del s. XVIII. Obsesionado por modernizar puentes y caminos, en una constante búsqueda de progreso sobreponiendo los límites del arco de piedra, con un gran dominio técnico y el constante desafío de levantar obras cada vez más ligeras, renovó las reglas de construcción usadas hasta entonces. Interesado por las formas de construcción góticas y criticado por sus atrevidas creaciones, algunas no se realizaron porque el riesgo de colapso se consideró demasiado elevado.

Contestó a sus detractores comparando el soporte de los puentes modernos con los pilares de las iglesias góticas: el traslado del empuje horizontal a los estribos en los puentes, o a los arbotantes en las iglesias, explicaba la ligereza de los soportes verticales en estas obras de fábrica. Legó a sus sucesores un tipo de intuición que integraba la dimensión plástica con un interés por el orden y el método.

Escritos sobre la construcción cohesiva y su función en la arquitectura Rafael Guastavino, Rafael Guastavino

Moreno, 2006 Rafael Guastavino (1842-1908) nació en Valencia y estudió en Barcelona. Allí realizó sus primeras obras con un empleo extensivo de bóvedas tabicadas, que él consideraba un modo Acohésivo distinto de la construcción tradicional. En 1881 emigró América y fundó una empresa para la construcción de bóvedas tabicadas. Fue un éxito y participó en la construcción algunos de los edificios americanos más importantes. El presente volumen recoge la traducción al castellano de los dos libros que publicó en América: El ensayo sobre la construcción cohesiva de 1892 y la Función de la fábrica en la construcción moderna, en 1896 y 1904. Ambos libros contienen numerosas observaciones pertinentes sobre la construcción tabicada, pero, sobre todo, son importantes pues nos ayudan a entender el pensamiento y la obra de quizás el último gran constructor de bóvedas de fábrica.

La construcción de las catedrales medievales Percy Watson, 1990-08-09 La división estructural en libros base y monografías referidas a hechos cruciales para la interpretación de la historia de los pueblos (conflictos, desarrollo social, cultural y tecnológico, vida cotidiana, pensamiento) permite tanto la comprensión global de la historia de la humanidad, como la profundización sobre determinados acontecimientos o aspectos generalmente ignorados en los manuales al uso. Los estudiantes encuentran así una forma atractiva y unas amplias posibilidades de su aplicación al estudio de las múltiples facetas del devenir histórico y de las diferencias culturales y sociales. Se combinan así los grandes acontecimientos históricos con aspectos referidos a la vida cotidiana, al pensamiento o a los avances tecnológicos. Se ofrece de este modo una

pluralidad de recursos para la investigación individual o colectiva, y para el desarrollo de actividades sobre temas que, a su vez, relacionan la historia del pasado para la comprensión del mundo actual. Todos los libros de esta colección contienen abundantes ilustraciones, esquemas, mapas y gráficos aclaratorios de los textos, y han sido diseñados en un formato especialmente adecuado para la consulta y el trabajo de los alumnos y alumnas

La construcción en el proyecto del paisaje Robert Holden,Jamie Liversedge,2013-02-23 La construcción de un buen proyecto del paisaje requiere un amplio conocimiento de los materiales su fabricación y sus características técnicas y de la práctica constructiva. Este libro analiza los principios básicos de la construcción en el proyecto del paisaje, y constituye una valiosa introducción dirigida a todas aquellas personas implicadas en el proyecto, la especificación y la ejecución de arquitectura del paisaje. Haciendo especial hincapié en la sostenibilidad y en la buena práctica, el libro abarca todos los aspectos de la construcción del proyecto del paisaje: desde los principios generales de la disciplina y una detallada introducción a los materiales, hasta los elementos constructivos, el montaje de componentes y, finalmente, la protección y los acabados. El estudio combina dibujos de detalles constructivos especialmente confeccionados para esta edición con bocetos elaborados a mano, textos informativos, tablas, ejemplos y numerosas fotografías. El volumen se completa con un detallado glosario, una bibliografía especializada y un apéndice que contiene información técnica de fácil consulta.

Léxico de la construcción Joaquín Antuña,2009 En 1962 se publicó la primera edición del léxico de la construcción del Instituto Eduardo Torroja de la Construcción y del Cemento. Reunir las palabras relacionadas con una actividad tan antigua como la construcción, fue en su momento una empresa titánica y naturalmente inacabada. Los cambios en la forma de construir llevan de forma inevitable a la extinción por desuso de una buena parte del léxico, por lo que esta obra adquiere un considerable valor arqueológico que irá creciendo con el tiempo. En esta reedición se ha respetado el contenido de la edición original, solo unas mínimas modificaciones ortográficas y de orden alfabético. Se ha hecho una pequeña aportación de términos que en la edición original se destacaban con un asterisco porque su significado no aparecía en la decimotercera

edición del diccionario de la Real Academia Española y que ahora si figuran en el diccionario de la RAE disponible en la red y consultado durante el mes de julio de 2009.

Stereotomy José Calvo-López, 2020-08-08 This book deals with the general concepts in stereotomy and its connection with descriptive geometry, the social background of its practitioners and theoreticians, the general methods and tools of this technology, and the specific procedures for the members built in hewn stone, including arches, squinches, stairs and vaults, ending with a chapter discussing the open problems in this field. Thus, it can be used as a reference book in the subject, but it can also read as a compelling narrative on this subject, one of the main branches of pre-industrial technology. Construction in hewn stone requires the use of geometrical methods and tools to assure that individual stones, either blocks or voussoirs, fit with one another and conform to the general shape of walls, arches or vaults. During the Late Middle Ages and the Renaissance, such techniques and instruments were developed empirically by masons and architects. Later on, learned mathematicians and engineers introduced refinements in these procedures and this branch of knowledge, known as stereotomy, furnished much material to descriptive geometry, a science born with the French Revolution which provided the foundation for projective geometry.

La construcción del conocimiento histórico Heraclio Bonilla, 2017-12-28 La construcción del conocimiento histórico. Errata y bricolaje de la Historia, reconstruye y comenta, en su primera parte, las peripecias seguidas en la elaboración del conocimiento en el campo de la Historia, proceso sin horizontes y de ahí su caracterización como errata, y, en función de los humores cambiantes de la coyuntura y de las modas académicas de la disciplina, por lo tanto como un bricolaje. El mensaje que nos transmite Heraclio Bonilla en esta sección inicial es que es necesario repensar la Historia, rescatar lo mejor de cada tradición, a fin de construir un tipo de análisis a la altura de las exigencias del presente. La segunda parte es una propuesta de análisis de la complejidad histórica de la región andina, en su unidad y en su diversidad. Así, trata de ir más allá de los esencialismos vigentes para pensar esta realidad a partir de las principales coordenadas de su configuración y de su cambio. La primera edición de este libro fue publicada por la Universidad Nacional de Colombia en el año 2014 y se agotó en pocos meses. Heraclio Bonilla en esta segunda edición hace un agregado extenso en lo que corresponde a la revisión de la historiografía.
