Critical Race Narratives Carl Gutierrez-Jones, 2001-08 The beating of Rodney King, the killing of Amadou Diallo, and the LAPD Rampart Scandal: these events have been interpreted by the courts, the media and the public in dramatically conflicting ways. *Critical Race Narratives* examines what is at stake in these conflicts and, in so doing, rethinks racial strife in the United States as a highly-charged struggle over different methods of reading and writing. Focusing in particular on the practice and theorization of narrative strategies, Gutiérrez-Jones engages many of the most influential texts in the recent race debates including *The Bell Curve*, *America in Black and White*, *The Alchemy of Race and Rights*, and *The Mismeasure of Man*. In the process, *Critical Race Narratives* pursues key questions posed by the texts as they work within, or against, disciplinary expectations: can critical engagements with narrative enable a more democratic dialogue regarding race? what promise does such experimentation hold for working through the traumatic legacy of racism in the United States? Throughout, *Critical Race Narratives* initiates a timely dialogue between race-focused narrative experiment in scholarly writing and similar work in literary texts and popular culture.

Movies in American History Philip C. DiMare, 2011-06-17 This provocative three-volume encyclopedia is a valuable resource for readers seeking an understanding of how movies have both reflected and helped engender America's political, economic, and social history. *Movies in American History: An Encyclopedia* is a reference text focused on the relationship between American society and movies and filmmaking in the United States from the late 19th century through the present. Beyond discussing many important American films ranging from *Birth of a Nation* to *Star Wars* to the *Harry Potter* film series, the essays included in the volumes explore sensitive issues in cinema related to race, class, and gender, authored by international scholars who provide unique perspectives on American cinema and history. Written by a diverse group of distinguished scholars with backgrounds in history, film studies, culture studies, science, religion, and politics, this reference guide will appeal to readers new to cinema studies as well as film experts. Each encyclopedic entry provides data about the film, an explanation of the film's cultural significance and influence, information about significant individuals involved with that work, and resources for further study.

Posthumanism Pramod K. Nayar, 2014 This timely book examines the rise of posthumanism as both a material condition and a developing philosophical-ethical project in the age of cloning, gene engineering, organ transplants and implants. Nayar first maps the political and philosophical critiques of traditional humanism, revealing its exclusionary and 'speciesist' politics that position the human as a distinctive and dominant life form. He then contextualizes the posthumanist vision which, drawing upon biomedical, engineering and techno-scientific studies, concludes that human consciousness is shaped by its co-evolution with other life forms, and our human form inescapably influenced by tools and technology. Finally the book explores posthumanism's roots in disability studies, animal studies and bioethics to underscore the constructed nature of 'normalcy' in bodies, and the singularity of species and life itself. As this book powerfully demonstrates, posthumanism marks a radical reassessment of the human as constituted by symbiosis, assimilation, difference and dependence upon and with other species. Mapping the terrain of these far-reaching debates, *Posthumanism* will be an invaluable companion to students of cultural studies and modern and contemporary literature.

Biotechnology and the Human Good C. Ben Mitchell,2007-04-23 Some of humankind's greatest tools have been forged in the research laboratory. Who could argue that medical advances like antibiotics, blood transfusions, and pacemakers have not improved the quality of people's lives? But with each new technological breakthrough there comes an array of consequences, at once predicted and unpredictable, beneficial and hazardous. Outcry over recent developments in the reproductive and genetic sciences has revealed deep fissures in society's perception of biotechnical progress. Many are concerned that reckless technological development, driven by consumerist impulses and greedy entrepreneurialism, has the potential to radically shift the human condition—and not for the greater good. *Biotechnology and the Human Good* builds a case for a stewardship deeply rooted in Judeo-Christian theism to responsibly interpret and assess new technologies in a way that answers this concern. The authors jointly recognize humans not as autonomous beings but as ones accountable to each other, to the world they live in, and to God. They argue that to question and critique how fields like cybernetics, nanotechnology, and genetics might affect our future is not anti-science, anti-industry, or anti-progress, but rather a way to promote human flourishing, common sense, and good stewardship. A synthetic work drawing on the thought of a physician, ethicists, and a theologian, *Biotechnology and the Human Good* reminds us that although technology is a powerful and often awe-inspiring tool, it is what lies in the heart and soul of who wields this tool that truly makes the difference in our world.

Is Human Nature Obsolete? Harold W. Baillie,Timothy Casey,2005 An interdisciplinary exploration of whether modern genetics and bioengineering are leading us to a posthuman future.
