Saudi Arabia and the Gulf Arab States Today Sebastian Maisel, John A. Shoup, 2009-02-17 This extremely timely and helpful ready reference will familiarize all students and readers with the Gulf region and Saudi Arabia, Bahrain, Dubai, the UAE, Kuwait, Oman, Yemen, and Qatar. These states are bound by the desert culture, the Gulf, new oil economy, and Islam, to name some commonalities. Most Americans know something about the region, such as oases, dates, camels, oil, Bedouin tribes, and the legends of Lawrence of Arabia to Osama bin Laden. Islamic concepts and practices are still unfamiliar. On one extreme, Saudi Arabia, the cradle of Islam, has been largely closed off to Western tourists. On the other extreme, Dubai courts tourist dollars as it constructs modern architectural showcases. This is the first A-Z encyclopedia to focus on the Gulf, illuminating the land, people, religion, culture and traditions, institutions, economy, and much more for general readers. The more than 200 essay entries have a current focus with historical context as necessary. The breadth of coverage means that this resource will be of use for a wide range of researchers and browsers. Besides individual entries on each state, major cities and regions are also profiled. The natural environment and human adaptation to it receives significant space. Islamic customs and rules and various interpretations are clearly explained. Essays on topics such as key public figures, institutions, major events, politics, and state structures—some based on sources often not available in English—make this two-volume set the first-choice resource for accurate information. Suggestions for further reading accompany most entries; a chronology, selected bibliography, and photos also complement the text.

Saudi Arabia Grace Edwards, 2023-12-22 Written by a female Middle East expert, Bradt's Saudi Arabia is the first English-language travel guide from a mainstream publisher that focuses exclusively on the Kingdom, which has now opened for general tourism as part of rapid political, economic and social reforms. With detailed advice on what to see and do, listings for accommodation and restaurants, guidance on cultural etiquette and advice for women and other diverse travellers, this book provides the practical information adventurous tourists need to explore this new, exciting destination. Saudi Arabia will appeal to adventure travellers, offering activities ranging from pristine, world-class scuba diving to mountain-trekking. With dramatic scenery including a desert that stretches for hundreds of kilometres (where you can camp like a Bedouin) and several accessible nature reserves, visitors looking for undisturbed landscapes are spoilt for choice. Culture vultures will appreciate pre-Islamic rock art, Nabatean heritage, Mada'in Saleh (the sister city to Jordan's Petra in

Jordan) and six UNESCO World Heritage Sites rarely visited by international tourists. Particularly after sundown, when Saudi Arabia truly comes alive, urbanites can explore the cities of Riyadh and Jeddah, where shopping opportunities range from traditional souqs to top-end malls where the wealthy go to see and be seen. Gastronomists can enjoy varied cuisine, from fine dining worthy of a Michelin star to traditional meals served on the floor, shared by all and eaten by hand. This guide dispels misinformation by providing an unbiased, up-to-date and comprehensive resource that accurately reflects what Saudi Arabia now offers visitors from all backgrounds. Most outsiders know little about the Kingdom other than from typically negative media coverage, so may be pleasantly surprised at its rich history and youthful population eager to extend hospitality to guests respecting their culture and traditions. A comprehensive guide combining detailed travel information about the entire Kingdom (from the Northern Borders to Asir, and from Hejaz to Eastern Province) with a chapter explaining some of the main practices of and reasons for the hajj and umrah pilgrimages, plus contextual insights covering cultural etiquette, reforms and women travellers, Bradt's Saudi Arabia is the perfect companion for people who thrive on off-the-beaten-path travel.

The Report: Saudi Arabia 2009 ,

The Eye of the Storm Salidor Christoffel Coetzee, 2021-03-02 A Quest for Truth This book is dedicated to the world's most vulnerable people who suffer from atrocities stemming from wars, poverty, addictions, and foremost those who were infected by or died because of the COVID-19 coronavirus. A virus that was created in and originating from China, Wuhan City in the Hubei province. The virus spread rapidly, creating immense havoc across the globe, sparing no country or human being, a virus without borders, with devastating effects. It is time for introspection and reflection, a time for a psychological and spiritual makeover, time to remove idols from our midst and honour one God, the God of Adam and Eve, God of Abraham, Sarah, Hagar, Ishmael and Isaac, God the oneness. The story of Abraham is retold in the book from a Christian biblical perspective, but more so from a Muslim belief, the Quran perspective, a constructive attempt to align and bridge the divides between nations during these difficult, testing times. Through the book, the author fulfils that commitment and promise made as a young boy to God, to spread God's message of hope and love into the world, to bridge the cultural divide, to promote care for the poor and homeless. Similar to the COVID-19 coronavirus, God's grace, love, and forgiveness have no borders. The world is in desperate need of spiritual cure and revival, across borders. It is a world in constant chaos and turmoil instigated and promulgated by politicians, and business and country leaders' ethical misbehaviour across the globe, hearts and minds contaminated by a deadly infected 'cancerous' disease for example lust, arrogance, and greed, fraudulent and corrupt hearts and minds, an extremism philosophy and theology in its own right. The author sadly lost his wife in 2010 due to breast cancer. In 2011, he was on the verge of becoming a tramp in the streets of South Africa. Yes, a highly qualified individual with years of experience as a financial manager in a big corporate company, with 8 years high-level academic

accomplishments. If people ask him, 'How was it possible?' he will tell them it is very possible; it all depends on every individual's personal circumstances. God the Oneness knows every hair on your head, He loves and cares about you anyway, wherever and whatever you are. The author lived and worked for seven years of his career as a cost engineer for a large oil-and-gas company in Saudi Arabia. He also previously worked as financial manager for a joint-venture oil-and-gas company in Iran, Arya Sasol Polymer Company (ASPC), a joint-venture company with 50 per cent ownership from oil-and-gas company National Petroleum Company (NPC), Iran and 50 per cent ownership from oil-and-gas company Sasol South Africa. Both companies were represented on the ASPC board by three directors, respectively. He had the joy and fulfilment of visiting many countries during his short life, apart from working and living in Saudi Arabia and Iran. A journey always has a starting and a finishing point, starting life from fertilisation to an unborn fruit in the womb of your mother until you pass on to something much bigger and better, eternal life, heavenly freedom and peace in the presence of God, the Creator and oneness. In the book, Saudi Arabia and Iran are extensively discussed to provide insight to the reader. The two countries are uniquely different, but in many ways the same. The author attempts to give the reader a glimpse of life as an expatriate worker in both countries, Saudi Arabia and Iran—a journey never to forget or to regret, a humble, faithful, committed contribution to mankind, in a dynamic and diverse way, in a dynamic and diverse multicultural environment. In some instances, the author feels obliged to speak the truth, and only the truth, because truth matters, for the sake of reflection, admission, repentance, and necessary corrective action by business leaders, politicians, and governments alike, to take a leaf from the author's book of life. The Leadership Challenge are discussed, using Nelson Mandela, a previous president of South Africa as an example to explain the concept of Servant leadership. Few images in history are more powerful than that of Nelson Mandela, fist raised in a dignified grey suit, walking after his release from 27 years of imprisonment, his short walk to freedom. Mandela was only 44 years old when he was given a life sentence by the apartheid regime for his leadership of the African National Congress, an organisation outlawed by the South African government for its anti-apartheid actions and positions. After providing the reader with evidential background, the last two chapters deal with the author's personal experiences in Iran and Saudi Arabia respectively, two countries that are way apart from each other. The two countries, apart from being constantly in conflict with each other, are also in conflict with other countries, because of their deeply rooted differences in religion and cultures, but more so because of their greed and love for oil, or black gold. They are ways apart and indifferent, but with so much in common.

The Red Sea Abdel Majid Farid,2022-03-07 First published in 1984, The Red Sea shines light on one of the world's most important strategic waterways: Red Sea. A large proportion of Europe's energy requirements are transported through the Red Sea, and provides a vital navigation for western military transport. It is also at the heart of an area of volatile regional conflict. This book reviews the economic, political and strategic prospects for the Red Sea and the countries which adjoin it. There is also discussion of the wider international implications of conflict in the Red Sea, in particular the strategic concerns of the United States and the erstwhile USSR. This book will be of interest to students of history, geography and international relations.

Historical Dictionary of Saudi Arabia J.E. Peterson,2020-03-06 The Kingdom of Saudi Arabia now has been under the spotlight of Western curiosity for more than 80 years. More than 15% of the world's total oil reserves lie underneath Saudi Arabia and, in the early 1990s, the kingdom became the world's largest crude oil producer. Not surprisingly, a world highly dependent on oil regards the desert kingdom as an area of intense strategic concern, as reflected in the coalition of forces assembled on Saudi soil to oust Iraq from Kuwait in 1991. Also, it played a major role in the invasion of Saddam Husayn's

Iraq in 2003 and shares concern with the West over Iran's nuclear intentions throughout the 21st century. This third edition of Historical Dictionary of Saudi Arabia contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 1,000 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students, researchers, and anyone wanting to know more about Saudi Arabia.

Digital Twin and Blockchain for Smart Cities Amit Kumar Tyagi, 2024-10-15 The book uniquely explores the fundamentals of blockchain and digital twin technologies and their uses in smart cities. In the previous decade, many governments explored artificial intelligence, digital twin, and blockchain, and their roles in smart cities. This book discusses the convergence of two transformative technologies, digital twin and blockchain, to address urban challenges and propel the development of smarter, more sustainable cities. This convergence empowers cities to create real-time replicas of urban environments (digital twins) and secure, transparent data management (blockchain) to improve city planning, management, and civic services. In this application, the concept of a digital twin involves creating a virtual, data-driven replica of a city or specific urban systems, such as transportation, energy, or infrastructure. This digital twin mirrors the real world, gathering data from various sensors, IoT devices, and other sources to provide a holistic view of the city's operations. Furthermore, blockchain technology offers a decentralized and tamper-resistant ledger for securely storing and managing data. In the context of smart cities, blockchain can ensure data integrity, privacy, and transparency, enabling trust and collaboration among various stakeholders. This book covers many important topics, including real-time city modeling; data security and the trustworthy storage of sensitive urban data; transparent governance to facilitate accountable governance and decision-making processes in smart cities; improved city services; disaster resilience (by providing insights into vulnerabilities and efficient resource allocation during crises); sustainable urban planning that optimizes resource allocation, reduces energy consumption, and minimizes environmental impact, which fosters sustainable development; citizen engagement; and much more. This book will not only provide information about more efficient, resilient, and sustainable urban environments, but it also empowers citizens to be active participants in shaping the future of their cities. By converging these technologies, cities can overcome existing challenges, encourage innovation, and create more livable, connected, and responsive urban spaces. Audience This book has a wide audience in computer science, artificial intelligence, and information technology as well as engineers in a variety of industrial manufacturing industries. It will also appeal to economists and government/city policymakers working on smart cities, the circular economy, clean tech investors, urban decision-makers, and environmental professionals.

Sustainable Development (2 Volume Set) C.A. Brebbia,2015-10-06 This collection of research papers, presented at

meetings organised by the Wessex Institute of Technology (WIT), concerns a variety of issues relating to the area of sustainable development. WIT has a long and very successful record of organising conferences on the topic of sustainability, which requires an interdisciplinary approach. Any sustainable solutions that are derived solely from the perspective of a single discipline may have unintended damaging consequences that create new problems. Thus effective sustainable solutions require the collaboration of scientists and engineers from various disciplines, as well as planners, architects, environmentalists, policy makers, social scientists, and economists. The contents of this book reflect that interdisciplinary approach, and include topics under the main areas of: Sustainable development and planning; Disaster management; Air pollution; Urban transport; Ecosystems and Water resources management.
