*The Keepers of the Keys (Bears of the Ice #3)* Kathryn Lasky, 2019-05-14 Perfect for fans of His Dark Materials! Against all odds, cubs Stellan, Jytte, Third, and Froya have found the key hidden inside the legendary Den of Forever Frost. Now, they have everything they need to destroy the dangerous ice clock. Everything . . . except an army. The power-hungry Grand Patek will stop at nothing to protect the clock, the source of his authority. And so, it's up to the cubs to convince the animals of Ga'Hoole to join the fight-a journey that'll take them from the fabled owl parliament to the rugged territory of the wolves of the beyond. But the owls and the wolves have secrets of their own -- secrets that threaten to fracture the fragile alliance. Do Stellan and Jytte have what it takes to become the leaders of the resistance? Or will the bears be left on their own to battle the greatest enemy Ga'Hoole has ever known?

**The Quest of the Cubs** Kathryn Lasky, 2018 A stunning new series from Newbery Honoree Lasky set in the legendary world of Ga'hoole. For generations, the noble polar bears have ruled the Northern Kingdoms. But now, their society is on the brink of collapse. Its survival is up to a pair of twin cubs.

*The Den of Forever Frost (Bears of the Ice #2)* Kathryn Lasky, 2018-10-09 Perfect for fans of His Dark Materials! Bestselling author Kathryn Lasky's brilliant imagery of the fantasy ice world and her believably strong, determined bears won't disappoint readers. -- Booklist Cubs Stellan and Jytte survived their treacherous trek across the Nunquvik, but their quest to rescue their mother has only begun. Svenna is imprisoned at the sinister Ice Clock-the headquarters of the Grand Patek whose dangerous influence is spreading throughout the bear kingdom. Only one bear has ever stood up to the Grand Patek-Svern, the cubs' father, a famous warrior who's been in exile for years. And so, along with their friend Third, the cubs set out to find Svern in the legendary Den of Forever Frost-a place some bears claim never existed at all. But time is running out. The Grand Patek has a secret weapon at his disposal-one with the power to destroy everything the creatures of Ga'Hoole hold dear. In this second book in the Bears of the Ice series, bestselling author Kathryn Lasky lures readers deeper into a vividly-imagined fantasy world full of magic, adventure . . . and animal heroes unlike any other.

**The Den of Forever Frost** Kathryn Lasky, 2018-10-09 In a race against time, young polar bear cubs travel the icy north searching for a way to rescue their land from an evil cult and save the world from a cataclysm.--Publisher's description.

**Ice** Mariana Gosnell, 2011-04-27 Like the adventurer who circled an iceberg to see it on all sides, Mariana Gosnell, former Newsweek reporter and author of *Zero Three Bravo*, a book about flying a small plane around the United States, explores ice in all its complexity, grandeur, and significance. More brittle than glass, at times stronger than steel, at other times flowing like molasses, ice covers 10 percent of the earth's land and 7 percent of its oceans. In nature it is found in myriad forms, from the delicate needle ice that crunches underfoot in a winter meadow to the massive, centuries-old ice that forms the world's glaciers. Scientists theorize that icy comets delivered to Earth the molecules needed to get life started, and ice ages have shaped much of the land as we know it. Here is the whole world of ice, from the freezing of Pleasant Lake in New Hampshire to the breakup of a Vermont river at the onset of spring, from the frozen Antarctic landscape that emperor penguins inhabit to the cold, watery route bowhead whales take between Arctic ice floes. Mariana Gosnell writes about frostbite and about the recently discovered 5,000-year-old body of a man preserved in an Alpine glacier. She discusses the work of scientists who extract cylinders of Greenland ice to study the history of the earth's climate and try to predict its future. She examines ice in plants, icebergs, icicles, and hail; sea ice and permafrost; ice on Mars and in the rings of Saturn; and several new forms of ice developed in labs. She writes of the many uses humans make of ice, including ice-skating, ice fishing, iceboating, and ice climbing; building ice roads and seeding clouds; making ice castles, ice cubes, and iced desserts. Ice is a sparkling illumination of the natural phenomenon whose ebbs and flows over time have helped form the world we live in. It is a pleasure to read, and important to read—for its natural science and revelations about ice's influence on our everyday lives, and for what it has to tell us about our environment today and in the future.

**On Thin Ice** Richard Ellis, 2010-12-07 From a graceful writer who's written some of the best natural history books of the past decade" (The New York Times Book Review) comes an urgent, stirring celebration and a rallying cry on behalf of one of earth's greatest natural treasures. Polar bears—fierce and majestic—have captivated us for centuries. Feared by explorers, revered by the Inuit, and beloved by zoo goers everywhere, they are a symbol for the harsh beauty and muscular grace of the Arctic. But as global warming threatens the ice caps' integrity, the polar bear has also come to symbolize the environmental peril that has arisen due to harmful human practices. In the past twenty years alone, the world population of polar bears has shrunk by half. Today they number just 22,000.

**Ice Rivers** Jemma Wadham, 2021-05-06 Longlisted for the Wainwright Prize Shortlisted for the Richard Jeffries Award The story of one woman's passion for glaciers As one of the world's leading glaciologists, Professor Jemma Wadham has devoted her career to the glaciers that cover one-tenth of the Earth's land surface. Today, however, these 'ice rivers' are in peril. High up in the Alps, Andes and Himalaya, once-indomitable glaciers are retreating; in Antarctica, meanwhile, thinning ice sheets are releasing meltwater to sensitive marine foodwebs, and may be unlocking vast quantities of methane stored deep beneath them. The potential consequences for humanity are almost unfathomable. Jemma's first encounter with a glacier, as a student, sparked her love of these icy landscapes. There is nowhere on Earth she feels more alive. Whether abseiling down crevasses, skidooing across frozen fjords, exploring ice caverns, or dodging polar bears - for a glaciologist, it's all in a day's work. Prompted by an illness that took her to the brink of death and back, in *Ice Rivers* Jemma recalls twenty-five years of expeditions around the globe, revealing why the glaciers mean so much to her - and what they should mean to us. As she guides us from the Alps to the Andes, the importance of the ice to crucial ecosystems and human livelihoods becomes clear - our lives are entwined with these coldest places on the planet. This is a memoir like no other: an eye-witness

account by a top scientist at the frontline of the climate crisis, and an impassioned love letter to the glaciers that are her obsession.

**Meltdown!: Global Warming Puts the World on Thin Ice** John Perritano, 2009-08-07 Describes how global warming is affecting the planet.

**Polar Bears** IUCN/SSC Polar Bear Specialist Group. Working Meeting, 2006 These proceedings provide an overview of the ongoing research and management activities on polar bears in the circumpolar arctic. Together with the previous 13 proceedings, they provide an historic record of international efforts in protecting, studying and managing polar bears. With recent documentation of how warmer arctic climate might affect the sea ice habitat of polar bears, the predictions of even warmer climate in the next decades, and documentation of effects on polar bears subpopulations, an evaluation of the red list status of polar bear subpopulations was followed by an increased conservation designation of vulnerable. In the complexity of possible interactions between climate change, local harvest, and in some areas high levels of pollutants, an increased level of international cooperation was advocated.

**Proceedings of a Synthesis Meeting** Joe Clyde Truett, 1984 Presents and evaluates available environmental data - transport and fate of pollutants, environmental hazards, biota and their food resources, and socioeconomic issues - related to potential offshore petroleum development in Barrow Arch planning area. Contains information presented at first Barrow Arch Synthesis Meeting held in Girdwood, Alaska, October 31- November 2, 1983.

**Arctic Sea Ice Decline** Eric T. DeWeaver, Cecilia M. Bitz, L.-Bruno Tremblay, 2013-05-28 Published by the American Geophysical Union as part of the Geophysical Monograph Series, Volume 180. This volume addresses the rapid decline of Arctic sea ice, placing recent sea ice decline in the context of past observations, climate model simulations and projections, and simple models of the climate sensitivity of sea ice. Highlights of the work presented here include An appraisal of the role played by wind forcing in driving the decline; A reconstruction of Arctic sea ice conditions prior to human observations, based on proxy data from sediments; A modeling approach for assessing the impact of sea ice decline on polar bears, used as input to the U.S. Fish and Wildlife Service's decision to list the polar bear as a threatened species under the Endangered Species Act; Contrasting studies on the existence of a tipping point, beyond which Arctic sea ice decline will become (or has already become) irreversible, including an examination of the role of the small ice cap instability in global warming simulations; A significant summertime atmospheric response to sea ice reduction in an atmospheric general circulation model, suggesting a positive feedback and the potential for short-term climate prediction. The book will be of interest to

researchers attempting to understand the recent behavior of Arctic sea ice, model projections of future sea ice loss, and the consequences of sea ice loss for the natural and human systems of the Arctic.

*Proceedings of the First International Scientific Meeting on the Polar Bear* University of Alaska Fairbanks, 1966  
Proceedings of the first International Scientific Meeting on the Polar Bear, held in Fairbanks, Alaska in 1965, to report on the current state of knowledge of the biology, ecology and conservation needs of the polar bear (*Ursus maritimus*) in Alaska, Canada, Greenland, Scandinavia and the Soviet Union.

Prevention and Control of Wildlife Damage Scott E. Hygnstrom, 2010-11 A comprehensive reference on vertebrate species that can cause economic damage or become nuisance pests. Reviews all vertebrate species that come into conflict with human interests in North America. Includes agricultural, commercial, industrial, and residential pest problems and recommends solutions; emphasizes prevention; outlines and explains all currently registered and recommended control methods and materials. Contains dozens of chapters written by various authors. Figures.

The Last Polar Bear Steven Kazlowski, Theodore Roosevelt, 2008 Scientists agree that by the end of this century the polar bear will be the first mammal threatened with extinction due to climate change. *The Last Polar Bear* is the first book to fully document that story. The continued survival of these magnificent white bears in their warming, and melting, Arctic world is uncertain, yet their fate is also a wake-up call compelling us to act now to stem global warming. Through Steven Kazlowski's unparalleled imagery, the most critical environmental issue of our time is brought to life. *The Last Polar Bear* places the reality of climate change in our hands. We see the plight of the polar bear, an animal already feeling the detrimental effects of our reliance on fossil fuels, as its icy habitat melts. Over the course of the last six years, wildlife photographer Steven Kazlowski has photographed the polar bear in its wild habitat, from Hershel Island in Canada to Point Hope in Alaska. *The Last Polar Bear* pairs his intimate images with anecdotes about his Arctic adventures, as well as authoritative essays about the polar bear in the context of climate change. Alaska based writers Richard Nelson, Charles Wohlforth, Nick Jans, and leading USGS polar bear biologist Steven C. Amstrup draw on decades of experience in the Arctic to cover the biological, cultural, and anthropological aspects of climate change. Dan Glick, long-time correspondent for Newsweek, addresses the history of climate change while Frances Beinecke, president of the Natural Resources Defence Council, and Theodore Roosevelt IV offer perspectives on activism and politics.
