Sociology in Mexico Gina Zabłudovsky, 2023-12-09 This open access book presents a condensed history of Sociology in Mexico from its origins, through to the middle of the 19th century and up to the present day. The book analyses the interaction between sociology and the main economic, political and social change in the country, including the 1910 Mexican Revolution, the main social movements, the role of the intellectual exiles from Spain and Latin America, and the participation of women, who have often remained invisible in the history of sociology. The book explores how sociological discourse played a fundamental role in the separation of secular and public education and the search for a 'national project' from 1868 onwards, despite the lack of an institute of social research until 1930; how sociology became an autonomous social science, led by a few intellectuals and public figures, as it became institutionalized in universities, and the effect this had on the development of the discipline; the influence of Marxism during the 1970s; and the progression from a process of specialization after the fall of the Berlin Wall to a new trend of working in collective projects with an increasing interdisciplinary perspective in the first decades of the 21st century.

Antifascism and Sociology Ana Alejandra Germani, 2017-09-08 In this fascinating account of the master social scientist and policy innovator, Gino Germani, written by his daughter, the reader will find a rich social and intellectual history. Germani's life traversed Italy under Mussolini's fascism, Argentina under Peronism, and North America during the glorious days of the social sciences' postwar expansion. With high irony, the biography concludes with Germani's return to Naples,

Italy, as what Ana Germani correctly calls an outsider in the homeland. This is a volume that should be uniquely appealing to area specialists, social psychologists, and those concerned with the cross-currents of politics and society. From his youth in Italy, which he left as a result of persecution by the Fascist authorities, through his long and distinguished career in international social science, and a career carved out in a series of exiles, Germani maintained a unity of purpose based on a liberal world outlook in political terms and a struggle against totalitarianism. Social science was the cement that bound Germani's affirmations of democracy and his opposition to dictatorship. In Argentina, Germani is recognized as the founder of modern scientific sociology. There as elsewhere, his work was grounded on the presumption that a biometric society was the ground on which all science develops. Living and working during one of the most fertile periods in the development of social research in Argentina, Germani was the central protagonist of its most fertile period. Argentina served as a central focal point for discussion and debate on the practices of modern societies and the cultural forms. Whether in Italy, Argentina, or the United States, German's work took seriously the individual and transpersonal events that helped form social structures of modernization. The book is rich in details, providing a full bibliography of the works of Germani, his relationships with foundations, universities and personnel, and brief profiles of individuals who worked with and knew him.

Sustainable Development in the Anthropocene Luis-Alberto Padilla,2021-09-16 In the Anthropocene sustainable development responds to socio-economic, environmental and political crises provoked by humankind due to global warming and the great acceleration of human intervention in ecosystems. This book introduces readers to current debates on sustainable development and to a holistic and multidisciplinary approach. Regional integration and supranational institutions

are fundamental for sustainable development. The democratisation of the international system requires a new multilateralism. Global problems of demography, economic ideology of unlimited growth, the prevailing technocratic paradigm, consumerism, problems of waste, fossil fuels, industrial food production, use of fertilisers, water management and climate change are discussed, and the importance of multilateral agreements for security, sustainable peace and development is explored. This planetary crisis may be solved by international cooperation based on the UN sustainable development goals. This book - provides a concise synthesis of the main subjects of sustainable development studies- links development studies to multilateral diplomacy as practised by UN bodies and organisations- gives a new holistic and multidisciplinary approach to environmental and social sciences in the Anthropocene epoch.

Sociology in Colombia Janneth Aldana Cedeño, 2023-09-09 This Palgrave Pivot presents a historical reflection about the development of sociology in Colombia from the late nineteenth century into the mid-twentieth century, a period in which the process of professionalization in the discipline occurred due to the creation of university training programs, as well as the extension of research centers and groups nationwide. The book exposes the different interrelations at the local, regional and international ambits that, only in part, offer a similar panorama to what happened in other Latin American processes in relation to the academic institutionalization of sociology. The role of international networks and government initiatives, national and foreign, was central to this development and, in general, to the take-off of sociology in the country, as happened in others nations such as Argentina, Brazil and Mexico. This book argues that, in Colombia, having these networks and initiatives during the Cold War generated various tensions, which appeared early, between these forms of financing as a political effort to contain left movements in the region (especially after the Cuban Revolution) and the attempt to achieve an autonomous science. However, the Colombian case presents some peculiarities in the configuration of sociology at the national level. These are associated, to a large extent, with the phenomena that have been decisive in the history of the country: a nation without dictatorships between 1960 and 1970, unlike other South American countries, but with a restricted democracy that even today offers difficulties in order to accept alternative forces. This book also considers the effects of the longest armed conflict known in the continent and its own historical transformations in the face of the role played by various actors such as guerrillas, drug trafficking and paramilitary groups. The book thus discusses, under a specific case study, the role of science as well as the possibilities of social transformation through human action. This book constitutes not only a journey on the academic institutionalization and the professional practice of sociology in Colombia; it is also an opportunity to think about what is coming in this field in a possible post-conflict scenario.

North-South University Research Partnerships in Latin America and the Caribbean Gustavo Gregorutti, Nanette Svenson, 2018-06-06 This volume examines research productivity within schools in Latin America and the Caribbean (LAC) and presents examples of various successful LAC North-South programs which have propelled university research in the

region. Much of the scholarly work on North-South research to date has concentrated principally on joint publications and co-authorship bibliometrics. In this book, cases are explored within the context of study on international research collaborations to highlight the motivations, mechanics, limitations, and success factors involved in the North-South relationships and their resulting research output.

The Power Struggles over the Post-neoliberal Social Security System Reforms in Venezuela and Ecuador Ezequiel Luis Bistoletti, 2018-08-25 This book carries out a comparative analysis of the power struggles over the post-neoliberal social security reforms in Venezuela and Ecuador. The research breaks down why the social security system reform initiated by Hugo Chávez' government in Venezuela has come down since its passing in 2002, whereas the social security system reform initiated by Rafael Correa's government in Ecuador has come along in spite of the obstacles since 2007. All in all, the analysis determined that the struggles over the social security system reforms in both countries remarkably corresponded to each other with regard to their structural conditions, points of contention, and contending actors. In contrast, the analysis established substantial divergences regarding the ways in which the struggles over both reforms came about, due to the divergent development of the struggles for hegemony between government and opposition. These divergences finally brought about the indefinite stagnation of the reform in Venezuela and the advancement of subsequent partial reforms aimed at the universalization of social security in Ecuador.
