Measures of Personality and Social Psychological Attitudes John P. Robinson,Phillip R. Shaver,Lawrence S. Wrightsman,2013-10-22 Measures of Personality and Social Psychological Attitudes: Volume 1 in Measures of Social Psychological Attitudes Series provides a comprehensive guide to the most promising and useful measures of important social science concepts. This book is divided into 12 chapters and begins with a description of the Measures of Personality and Social Psychological Attitudes Project's background and the major criteria for scale construction. The subsequent chapters review measures of response set; the scales dealing with the most general affective states, including life satisfaction and happiness; and the measured of self-esteem. These topics are followed by discussions of measures of social anxiety, which is conceived a major inhibitor of social interaction, as well as the negative states of depression and loneliness. Other chapters examine the separate dimensions of alienation, the predictive value of interpersonal trust and attitudes in studies of occupational choice and racial attitude change, and the attitude scales related to locus of control. The final chapters look into the measures related to authoritarianism, androgyny, and values. This book is of great value to social and political scientists, psychologists, nurses, social workers, non-academic professionals, and students.

Defining the Construct by the Measure L. Todd Thomas,1994

Communication Research Measures Rebecca B. Rubin,Philip Palmgreen,Howard E. Sypher,2020-08-26 The development of communication as a discipline has resulted in an explosion of scales tapping various aspects of interpersonal, mass, organizational, and instructional communication. This sourcebook brings together scales that measure a variety of important communication constructs. The scales presented are drawn from areas of interpersonal, mass, organizational, and instructional communication--areas in which the use of formal, quantitative scales is particularly well developed. Communication Research Measures reflects the recent important emphasis on developing and improving the measurement base of the communication discipline. It results in an equal amount of labor saved on the part of the scholars, students, and practitioners who find this book useful, and it contributes in a significant way to research efforts. Originally published by Guilford Press in 1994, now available from Routledge.

Handbook of Research on Electronic Surveys and Measurements Reynolds, Rodney A.,Woods, Robert,Baker, Jason D.,2006-09-30 This book is the comprehensive reference source for innovative knowledge on electronic surveys. It provides

complete coverage of the challenges associated with the use of the Internet to develop online surveys, administer Web-based instruments, and conduct computer-mediated assessments. This combination of how-to information about online research coupled with profiles of specific measures makes it an indispensable reference--Provided by publisher.

Intercultural Communication James W. Neuliep,2020-01-28 Intercultural Communication: A Contextual Approach introduces students to the fundamental topics, theories, concepts, and themes of intercultural communication. Best-selling author James W. Neuliep presents a clear model for examining communication within a variety of contexts, including cultural, microcultural, environmental, sociorelational, and perceptual. Each chapter focuses on one context and explores the combination of factors within that context, including setting, situation, and circumstances. The updated Eighth Edition reflects the most recent research in the field and further incorporates the role of modern technology and its impact on intercultural communication. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.

Social Anxiety Mark R. Leary,Robin M. Kowalski,1997-07-04 Why does social anxiety occur, and why are some people more prone to it than others? Drawing on work on personality and social psychology, clinical and counselling psychology, communication and sociology, this book provides an overview of basic and applied research in the feelings of anxiety, shyness and embarrassment that are often the consequences of quite ordinary social encounters.; The authors examine the features of situations that elicit social anxiety, personality variables that Predispose People To Be Socially Anxious, The Cognitive And Emotional experience of social anxiety, its evolutionary and physiological underpinnings, and strategies for prevention and treatment. The book includes scales for measuring different manifestations of anxiety, as well as boxed material providing coverage of topics ranging from social anxiety among famous personalities to the implications of social anxiety for student achievement.

Handbook of Social and Evaluation Anxiety H. Leitenberg,2013-11-11 For a long time I have wanted to put together a book about social and evaluation anxiety. Social-evaluation anxiety seemed to be a stressful part of so many people's everyday experience. It also seemed to be apart of so many of the clinical problems that I worked with. Common terms that fit under this rubric include fears of rejection, humiliation, criticism, embarrassment, ridicule, failure, and abandonment. Examples of social and evaluation anxiety include shyness; social inhibition; social timidity; public speaking anxiety; feelings of self-consciousness and awkwardness in social situations; test anxiety; performance anxiety in sports, theater, dance, or music; shame; guilt; separation anxiety; social withdrawal; procrastination; and fear of job interviews or job evaluations, of asking someone out, of not making a good impression, or of appearing stupid, foolish, or physically unattractive. In its extreme form,

sodal anxiety is a behavior disorder in its own right sodal phobia. This involves not only feelings of anxiety but also avoidance and withdrawal from sodal situations in which scrutiny and negative evaluation are antipated. Sodal-evaluation anxiety also plays a role in other clinical disorders. For example, people with agoraphobia are afraid of having a panic attack in public in part because they fear making a spectacle of themselves. Moreover, even their dominant terrors of going crazy or having a heart attack seem to reflect a central concern with sodal abandonment and isolation.

Communicating Roy Berko,Andrew Wolvin,Darlyn R. Wolvin,Joan E. Aitken,2016-09-16 This highly-regarded introduction to communication book offers a comprehensive blend of basic communication theory, research, and skills, with a strong emphasis on relationship communication (social), workplace (career), and intercultural communication (culture). Communicating introduces the basic principles of communication and applies them to interpersonal, group, interviewing, and public speaking contexts. The book stresses communication competence through boxed material, Learn by Doing activities, thought-provoking questions, and self-assessment tests. New and strengthened pedagogy highlights and reinforces the book's social, career, and cultural themes, with a particular emphasis on intercultural communication and communicating in an increasingly high-tech, global environment.

Argumentation Lapakko Ph. D. David Lapakko Ph. D.,David Lapakko,2009-10 Argumentation: Critical Thinking in Action, 2nd ed., explores a wide variety of issues and concepts connected to making arguments, responding to the arguments of others, and using good critical thinking skills to analyze persuasive communication. Key topics include the nature of claims, evidence, and reasoning; common fallacies in reasoning; traits associated with good critical thinking; how language is used strategically in argument; ways to organize an argumentative case; how to refute an opposing argument or case; cultural dimensions of argument; and ways to make a better impression either orally or in writing.

Willingness to Communicate in Instructed Second Language Acquisition Anna Mystkowska-Wiertelak,Mirosław Pawlak,2017-02-17 This book offers a comprehensive account of individual differences variables as well as contextual factors that impinge on second language learners' willingness to communicate (WTC). Firstly, it adopts a macro-perspective on WTC, which entails an attempt to identify variables that are related to WTC, taking into account the specificity of the Polish higher education setting. Secondly, it embraces a micro-perspective on WTC, striving to pinpoint the individual and contextual influences on levels of WTC in the course of regularly-scheduled, naturally-occurring English classes, as well as to capture the dynamic nature of WTC during such classes. Together, these perspectives bring the reader closer to understanding the mechanisms underlying WTC in specific contexts, thereby providing a basis for recommendations for classroom practice that could translate into learners' success. It will be of interest to second language acquisition researchers and students, as well as to methodologists and materials writers who can use the research findings to improve the practice of teaching and learning speaking in the language classroom.

Encyclopedia of the Sciences of Learning Norbert M. Seel,2011-10-05 Over the past century, educational psychologists and researchers have posited many theories to explain how individuals learn, i.e. how they acquire, organize and deploy knowledge and skills. The 20th century can be considered the century of psychology on learning and related fields of interest (such as motivation, cognition, metacognition etc.) and it is fascinating to see the various mainstreams of learning, remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology. Beyond folk psychology and its naïve theories of learning, psychological learning theories can be grouped into some basic categories, such as behaviorist learning theories, connectionist learning theories, cognitive learning theories, constructivist learning theories, and social learning theories. Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines, such as philosophy and epistemology, education, information science, biology, and – as a result of the emergence of computer technologies – especially also in the field of computer sciences and artificial intelligence. As a consequence, machine learning struck a chord in the 1980s and became an important field of the learning sciences in general. As the learning sciences became more specialized and complex, the various fields of interest were widely spread and separated from each other; as a consequence, even presently, there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely. The Encyclopedia of the Sciences of Learning provides an up-to-date, broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields, including relevant areas of instruction, pedagogy, cognitive sciences, and especially machine learning and knowledge engineering. This modern compendium will be an indispensable source of information for scientists, educators, engineers, and technical staff active in all fields of learning. More specifically, the Encyclopedia provides fast access to the most relevant theoretical terms provides up-to-date, broad and authoritative coverage of the most important theories within the various fields of the learning

sciences and adjacent sciences and communication technologies; supplies clear and precise explanations of the theoretical terms, cross-references to related entries and up-to-date references to important research and publications. The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning; the entries are written by a distinguished panel of researchers in the various fields of the learning sciences.

Intercultural Communicative Competence and Individual Differences Judit Dombi, 2021-02-19 This book presents a concise critical overview of the literature on intercultural communicative competence (ICC) and offers insights into research on this concept. As a novel contribution to the field, the book frames ICC in relation to other learner variables, such as motivation, willingness to communicate, communication apprehension, and self-perceived communication competence. Based on empirical data, the study proposes and tests a model of English majors' ICC interacting with individual differences related to L2 communication. The findings highlight that students' beliefs about their own performance, their apprehension from communication situations and their language learning motivation were successfully integrated into a new model of intercultural communicative competence as understood in an interactional EFL context.

Communicative Behaviour of a Language Learner Dagmara Gałajda, 2017-06-16 This book investigates and analyzes the way in which factors such as communication apprehension, self-perceived communicative competence and group dynamics influence the communicative behavior of a foreign-language learner. It also focuses on interpersonal communication, group communication and public speaking. Using selected models it characterizes and analyzes all types of communication with reference to communication in the language classroom, with a particular emphasis on the foreign-language context. The author also presents some conclusions and implications for both language teachers and language learners, as well as offering suggestions for further research in the field of classroom communication. The results of the

study serve as a point of reference for teachers interested in the construct of willingness to communicate and other communication variables related to the issue of communication in a foreign language. The work also raises teachers' awareness of individual learner differences in the context of communication in the foreign-language classroom.

Post-Pandemic Pedagogy Joseph M. Valenzano III, 2021-11-01 Post-Pandemic Pedagogy: A Paradigm Shift discusses how the COVID-19 pandemic radically altered teaching and learning for faculty and students alike. The increased prevalence of video-conferencing software for conducting classes fundamentally changed the way in which we teach and seemingly upended many best practices for good pedagogy in the college classroom. Whether it was the reflection over surveillance software, or the increased mental health demands of the pandemic on teachers and students, or the completely reshaped ways in which classes and co-curricular experiences were delivered, the pandemic year represented an opportunity for one of the largest shifts in our understanding of good pedagogy unlike any experienced in the modern era. This edited collection explores what we thought we knew about a variety of teaching ideas, how the pandemic changed our approach to them, and proposes ways in which some of the adjustments made to accommodate the pandemic will remain for years to come. Scholars of communication, pedagogy, and education will find this book particularly interesting.

The Routledge Handbook of Public Speaking Research and Theory Stevie M. Munz, Tim McKenna-Buchanan, Anna M. Wright, 2024-04-18 Providing a comprehensive survey of the empirical research, theory, and history of public speaking, this handbook fills a crucial gap in public speaking pedagogy resources and provides a foundation for future research and pedagogical development. Bringing together contributions from both up-and-coming and senior scholars in the field, this book offers a thorough examination of public speaking, guided by research across six key themes: the history of public speaking; the foundations of public speaking; issues of diversity, equity, and inclusion; considerations of public speaking across contexts; assessment of public speaking; and the future of public speaking in the twenty-first century. The evidence-based chapters engage with a broad discussion of public speaking through a variety of viewpoints to demonstrate how subtopics are connected and fraught with complexity. Contributors explore public speaking in education, business and professional settings, and political contexts, and outline how skills learned through public speaking are applicable to interpersonal, small group, and business interactions. Reinforcing the relevance, importance, and significance of public speaking in individual, interpersonal, social, and cultural communication contexts, this accessibly written handbook will be an indispensable resource for public speaking instructors and program administrators. It will also be valuable reading for Communication Pedagogy and Introduction to Graduate Studies courses.
