web in his early research the author van rijn 1984a b c has fo cused on sediment transport and bed roughness in steady river flow using a diffusion type of approach a set of equations has been proposed to describe the near bed concentration and the ver tical distribution of the sediment concentrations over the depth

web a method is presented that makes the classification of bed forms the prediction of the bed form dimensions and the effective hydraulic roughness of the bed forms feasible the proposed relationships are based on the analysis of reliable flume and field data a verification analysis using about 1 500 alternative reliable flume and field data shows
