The Art of Oriental Rugs - A Weaver's Perspective Kayvon Sadrabadi, 2020-02-07 Learn how to identify handmade rugs using techniques employed by experts without having years of experience! If you want a more in depth understanding of how experts identify rugs, then this eBook is what you've been searching for. But first a warning, this eBook is not for everyone. There are many fine books which address history, geography and designs; but they omit an important factor which experts rely on for identification - the specific weave pattern found on the back of the rug. If you wish to go beyond a cursory understanding of rugs, this is the eBook for you. The Art of Oriental Rugs - A Weaver's Perspective presents an insider-look which examines what is a weave, what causes it, and how to recognize it. This work is the result of examining hundreds of pieces through three years of intensive research. This is the first extended toolkit of its kind to demonstrate different Persian (rugs woven in the country of Iran) weaves based on their region and explore why they look the way they do. The goal is to establish generally accepted weave patterns attributed to each rug-weaving region in Iran. It is more than just samples from Iran however, it also includes pieces from Caucasus, Turkey, China, Turkmen and others. • With 1800+ pages it provides ample opportunity for an in-depth examination of weaves and many samples to aid in identification. • Depending on your level of interest, you can go as deep as you wish in understanding why weaves look the way they do on the back of each rug. • Although this work can be viewed on smaller screens, to be able to properly examine pictures including characteristics unique to each piece, it is intended for larger screens (8 inch or larger). It includes 500+ pictures of rugs woven in Iran (Persian) which are available in the market today. It includes 750+ closeup pictures of weaves from the backs of rugs from 170+ weaving regions around the world, including Iran (Persian), Caucasus, Turkey, China, Turkmen and others. This will aid in identifying rug origins. It also includes maps of each region with the different weaving types to help better understand how the regions use similar/different weaving techniques.

XX International Grassland Conference: Offered papers F.P. O'Mara, R.J. Wilkins, L. 't Mannetje, D.K. Lovett, P.A.M. Rogers, T.M. Boland, 2023-08-28 This book contains a compilation of offered papers presented at the main congress of the XX International Grassland Congress held in University College Dublin, Ireland from 26 June to 1 July, 2005. It is complemented by six other books arising from the XX IGC as listed on the back cover: the book of invited papers from the main congress and five books containing the proceedings of five satellite workshops held immediately after the main congress at locations in the

UK and Ireland (Aberystwyth, Belfast, Cork, Glasgow and Oxford). The workshops were designed to facilitate more in-depth presentations and discussions on more specialised topics of worldwide significance. The main congress brought together scientists from many disciplines, policy makers, consultants and producers involved directly in grass production and utilisation, as well as people in associated industries. They discussed issues around the theme of the congress, Grasslands : a Global Resource. The congress programme was organised around three main thematic areas: Efficient Production from Grassland Grassland and the Environment Delivering the Benefits from Grassland

In the Name of God of Wisdom Mr. Reza Zolfaghari, 2024-09-23 In the Name of God of Wisdom will reveal the innermost light of the scriptures in regards to the events of end times and all times by providing a simple yet hard-to-understand numerical philosophy and method for understanding and decoding the true messages of the sacred texts and of the field of consciousness by use of simple calculations that are based on the numerical patterns of the text of the Holy Quran that covers the root of all major religions. By understanding the concepts of these writings, you will discover that the text of the Holy Quran is not a historical book that was revealed for a particular group but it was an intelligent design and guideline for implementation of the events of the end-time programming for angels of the skies and the earth and for those who were in the know from among humanity. In these writings you will learn about the nature of reality and its relation to yourself as the microcosms of creation. You will learn about the existence of the “mathematical field of information” and the two “worlds of concepts” and “spirits” and their relations to human design. Read In the Name of God of Wisdom and discover for yourself that everything in creation, including your entire being and soul, is made of light-information, and this light-information or God particles are encoded within your cellular structure and are also inside every other atom in creation. About the Author Mr. Reza Zolfaghari's story begins in the picturesque town of Omidiyeh, Iran, in 1967. He was born into a loving family, with a father employed by the National Iranian Oil Company and a devoted mother who placed family above all else. Despite the modesty of their surroundings, Reza was raised amidst the richness of his parents' values—kindness, integrity, and generosity. Tragedy struck early in Reza's life when his eldest brother, Farzad, passed away while Reza was still in high school. This loss marked a turning point, but Reza's family remained a steadfast source of support and love. Encouraged by his family's unwavering belief in him, Reza pursued higher education in Information Technology at the Iran University of Science and Technology in Tehran, a decision that required his family to uproot themselves and move to the bustling capital city. Life took a somber turn when Reza's father was diagnosed with skin cancer, but Reza devoted himself entirely to caring for his father during this heartbreaking period, leaving an indelible mark on his soul. In 1995, Reza married his beloved wife, Mojgan, and together they began a family. Their journey led them to the United States in 2000, where they settled in New Jersey. The arrival of their daughters, Tiam and later Tiara, brought immeasurable joy, but also unforeseen challenges. Tiara's health struggles, including a life-threatening need for a liver transplant at just two weeks old, tested the family's

resilience and strength. In 2012, Reza embarked on a transformative spiritual retreat in Brazil, returning with a newfound perspective on life and spirituality. His deep dive into religious texts such as the Quran and the works of Rumi led him to uncover profound insights, shaping his worldview in every way. Tragedy struck once again in 2016 when Tiara passed away at the age of 11, leaving Reza and his family devastated. The loss propelled Reza deeper into his spiritual and intellectual pursuits, leading him to isolate himself from many, but drawing closer to his family and a select circle of friends. Despite his solitude, Reza's impact on those around him was undeniable. In February 2022, he completed his life's work before passing away in March, leaving behind a legacy of love, resilience, and spiritual exploration that continues to inspire all who knew him.

Tigris and Euphrates Rivers: Their Environment from Headwaters to Mouth Laith A. Jawad, 2021-09-12 The system of the Tigris-Euphrates Rivers is one of the great river systems of southwestern Asia. It comprises the Tigris and Euphrates Rivers, which follow roughly parallel courses through the heart of the Middle East. The lower portion of the region that they run through is known as Mesopotamia, was one of the cradles of civilisation. There are several environmental factors that govern the nature of the two rivers and shape the landscape the two rivers running through. Geological events create rivers, climate monitor the water supply, the surrounding land influences the vegetation and the physical and chemical features of water. The Tigris-Euphrates system runs through the territory of four countries, Iraq, Iran, Turkey and Syria. Therefore, any scientific approach to the environment of these two rivers should include the natural history events in these countries. The book Tigris and Euphrates Rivers: Their Environment from Headwaters to Mouth will be divided into nine parts. These parts deal with the issues of the environment, the status of the flora and fauna, the abiotic aspects, ecology, hydrological regime of the two rivers, the biotic aspects. Water resources, stress of the environment, conservation issues. Since the book of Julian Rzoska Euphrates and Tigris Mesopotamian Ecology and Destiny in 1980, no book or major reference has been published that includes between its cover the facts and information that the present book will present. Therefore, the importance of the present book falls in stating the present status of the environment of the two rivers and the comparison of their environment between now and that of 37 years ago as given by J. Rzoska (1980). The recent studies showed that there are a large number of natural and political events that happened within the last three decades in the area of the Tigris-Euphrates river system that for sure have done a great change to the environment of the two rivers and consequently changing the biological and non-biological resources of the two rivers. This book will be a reference book to both Academic and students across the Middle East in different disciplines of knowledge to use in their researches on Tigris-Euphrates river system. The scholars interested in this area will use this book as a guide to compare this freshwater system with other areas in Asia and the world.

Biological Control of Insect and Mite Pests in Iran Javad Karimi, Hossein Madadi, 2022-04-29 The book provides a

reference to biological control of arthropod pests in agriculture and of public health importance in Iran. A quick glance over the literature shows a long history of biocontrol attempts in the country. Some historically important events highlighting the interest of Iranian academic, research and extension fields to the natural enemies and their applied aspects are provided. Iran, with an exception of the former USSR, was a pioneer in both basic and applied biocontrol in West Asia. The book consists of four parts: three parts for predators, parasitoids and pathogens, and last part for other approaches and analyses of the current state of biological control in Iran. The book provides the most up-to-date information on pest control and related topics of entomology in Iran. The chapters are written by scholars from major Universities and research centers in Iran.

Computers in Earth and Environmental Sciences Hamid Reza Pourghasemi, 2021-09-22 Computers in Earth and Environmental Sciences: Artificial Intelligence and Advanced Technologies in Hazards and Risk Management addresses the need for a comprehensive book that focuses on multi-hazard assessments, natural and manmade hazards, and risk management using new methods and technologies that employ GIS, artificial intelligence, spatial modeling, machine learning tools and meta-heuristic techniques. The book is clearly organized into four parts that cover natural hazards, environmental hazards, advanced tools and technologies in risk management, and future challenges in computer applications to hazards and risk management. Researchers and professionals in Earth and Environmental Science who require the latest technologies and advances in hazards, remote sensing, geosciences, spatial modeling and machine learning will find this book to be an invaluable source of information on the latest tools and technologies available. - Covers advanced tools and technologies in risk management of hazards in both the Earth and Environmental Sciences - Details the benefits and applications of various technologies to assist researchers in choosing the most appropriate techniques for purpose - Expansively covers specific future challenges in the use of computers in Earth and Environmental Science - Includes case studies that detail the applications of the discussed technologies down to individual hazards

Iran is More Than Persia Brenda Shaffer, 2022-12-19 Iran is More than Persia: Ethnic Politics in Iran analyses Iranian politics from a unique perspective, one that focuses on the relations between the Persian-dominated Iranian state and the country's ethnic minorities. The book explores the stability of the ruling regime in light of the challenges that multiethnicity brings. Persians comprise less than half of the population of Iran and more than 40 percent of Iranians lack fluency in the Persian language. An overwhelming majority of non-Persian groups inhabit most of Iran's border regions; as such the book explores Iran's foreign policy toward neighboring states that share co-ethnic populations. Iran's ethnic minorities inhabit the state's poorest provinces and the country's growing environmental and water supply challenges hit the ethnic minority provinces harder than the Persian center, adding an ominous ethnic character to what are often presented as purely environmental or economic challenges. The book further examines the potential impact of ethnic based unrest in Khuzestan

on Iran's oil production, Iran's main oil producing region. Drawing on a rich assortment of primary data and interviews, this book offers unparalleled insights into ethnic politics in Iran. It will be of interest to upper-level undergraduates and postgraduates, researchers and professionals interested in the Middle East, international relations, and ethnic studies.

Women's Entrepreneurship in Iran Leyla Sarfaraz, 2016-09-16 This book presents the nature, challenges and successful cases of female entrepreneurship in Iran. The first part of the book provides a comprehensive insight into Iran's entrepreneurship ecosystem and its accessibility for women by exploring and analyzing data from relevant national and international sources, in particular from the Statistical Center of Iran, Global Entrepreneurship Monitor, World Bank (Doing Business, Gender Equality and Development), World Economic Forum (Global Gender Gap Report, Global Competitiveness Report), and the United Nations Development Plan. Trends in entrepreneurial perceptions and intentions, as well as developments in entrepreneurial activity in Iran from 2008 to 2013, are also studied for both genders. In order to establish a benchmark for the relative position of Iranian women in the region, the main related indices are also compared to those in Egypt, Pakistan, Saudi Arabia and Turkey. In turn, the second part of the book highlights selected role models of growth-oriented female Iranian entrepreneurs who have successfully run a variety of traditionally male-dominated businesses in Iran and internationally, despite the hostile business environment and various gender stereotypes.

Diversity, Distribution, and Current Status A.K. Tiwari, Kadriye Caglayan, Abdullah M. Al-Sadi, Mehdi Azadvar, Saman Abeyasinghe, 2023-04-01 Diversity, Distribution, and Current Status is the first volume in a three-volume series dedicated to the analysis of this important group of plant pathogens across Asia with a particular focus on geographic distribution. This book offers updated data on the most prevalent phytoplasma diseases specific to each region. Phytoplasmas are emerging plant pathogens all around the world, causing significant economic losses to crops, as well as affecting international trade. The chapters in Volume 1 look closely at different countries and regions across Asia, providing data on country-wide distribution, phytoplasma groups, insect vectors and transmission. The Phytoplasma Diseases in Asian Countries series will be an essential read for university students, researchers and agriculturalists interested in Plant Pathology. Volume 1 will be of particular interest to those needing the latest data on the distribution and transmission rates specific to the various regions of Asia. - Reviews the geographical distribution of different phytoplasma diseases across Asia - Organized by country, providing an in-depth analysis of the phytoplasma prevalent in different regions - Provides a wealth of data associated with each phytoplasma disease - Highlights the insect vectors transmitting the bacteria

Remote Sensing and GIS in Peri-Urban Research Mehebab Sahana, 2024-09-05 Remote Sensing and GIS in Peri-Urban Research: Perspectives on Global Change, Sustainability and Resilience, Eleventh Edition provides the most recent methods and techniques, incorporating geoinformatics-based practices to map, evaluate, and model urban landscape attributes and changes. The book provides theory, methodology, and future perspectives of remote sensing and GIS

techniques applied to peri-urban modelling, analysis and sustainability through the use of spatio-temporal geospatial datasets. It also includes case studies of real-world data sets, with applicable algorithms, techniques and methods for study. This will be a useful reference for researchers and academics in remote sensing, GIS, and spatial analysis, and environmental or urban scientists wanting to implement remote sensing technologies in their research. - Outlines applications of geospatial technologies for visualization of land use dynamics including spatial information about population distributions, built-up areas and degree of urbanization based on global and local datasets - Provides methodology for identification of peri-urban interfaces using techniques to identify peri-urban space and dynamics using remote sensing and GIS techniques - Includes worldwide case studies by experts from different countries increasing the understanding of the nature of global peri-urbanization and growth

Cultural Dynamics of Water in Iranian Civilization Majid Labbaf Khaneiki, 2020-09-23 This book traces “water” back to the most primitive animistic notions that are still lingering on in the shape of such rituals as qanat marriage or rain-making. Water, in the Iranian philosophy, is used in an attempt to find an explanation for the genesis of the universe, as described in Zoroastrian Akhshij philosophy, according to which water is one of the four fundamental elements of the creation. The concept of time began to germinate in the Iranian mind, when they had to count the passage of time in order to divide their scarce water resources. Water became so omnipresent in Iranian culture that it reached even the most mysterious seclusion of the Sufi monks. In Iran’s local communities, water culture is a thread that runs through different types of production systems. This book goes beyond indigenous water knowledge and traditional irrigation techniques, and conceptualizes water as a pivotal element of Iran’s social identity, cultural dynamics and belief systems, where it examines the role of intermittent droughts in engendering and diffusing intangible cultural elements across the Iranian plateau. This book delves into Iran’s political organizations most of which were ensnared in a water-dependent lifecycle constituting a historical pattern described in this book as “hydraulic collapse” .

Handbook of Irrigation System Selection for Semi-Arid Regions Mohammad Albaji, Saeid Eslamian, Abd Ali Naseri, Faezeh Eslamian, 2020-07-22 The Handbook of Irrigation System Selection for Semi-Arid Regions compares the various types of available irrigation systems for different regions and conditions, and explains how to analyze field data to determine the suitability of the land for surface, sprinkle, or drip irrigation systems. The book focuses on strategies for irrigation development and management and examines deficit irrigation and partial root-zone drying systems. Also, solute leaching modeling under different irrigation systems, soil moisture conditions, and organic fertilizer application in arid areas are discussed. Further, it examines multi-criteria decision making for irrigation management and the appraisal of agricultural lands for irrigation in hot, sub-humid regions. Features: Presents comparative analysis to aid in the selection of the most appropriate types of irrigation systems according to land characteristics. Includes numerous practical case studies. Offers

parametric evaluation systems for irrigation purposes. Considers data from semi-arid zones, each with different sub-climates. Focusing on semi-arid land, the book highlights parametric evaluation systems for irrigation purposes, along with the use of analytical hierarchy processes integrated with GIS to determine which systems are best suited. This comprehensive and well-illustrated handbook will be of great interest to students, professionals, and researchers involved with all aspects of irrigation in semi-arid regions.

Iranian and Minority Languages at Home and in Diaspora Anousha Sedighi, 2023-02-20 While the typology, syntax, and morphology of Iranian languages have been widely explored, the sociolinguistic aspects remain largely understudied. The present companion addresses this essential yet overlooked area of research in two ways: (i) The book explores multilingualism within Iran and its neighbouring countries. (ii) It also investigates Iranian heritage languages within the diasporic context of the West. The scope of languages covered is vast: In addition to discussing Iranian minority languages such as Tati and Balochi, the book explores non-Iranian minority languages such as Azeri, Turkmen, Armenian and Mandaic. Furthermore, the companion investigates Iranian heritage languages such as Wakhi, Pashto, and Persian within their diasporic and global contexts. In the current era of migration and globalization, minority and heritage speakers are increasingly valuable resources. By focusing on the speakers, the companion provides new insights into a multitude of sociolinguistic issues including language attitude and identity, language use and literacy practices, language policy, language shift and loss. The companion is an essential reference for those interested in Iranian languages, minority languages, heritage languages, sociolinguistics, bilingualism, language policy and planning, diaspora and migration studies, as well as those researching in related fields.

The Normative Nature of Social Practices and Ethics in Professional Environments de Vries, Marc J., Jochemsen, Henk, 2019-04-12 Professionals function in what can be called “social practices.” Norms in the practice set professionals’ responsibilities and rights and classify what is seen as morally proper and improper. Tensions arise when norms emerge that are not coherent with the nature of the practice. For example, when a hospital is assessed on the basis of economic criteria only, staff will feel uncomfortable and find difficulty in functioning properly in that practice. The Normative Nature of Social Practices and Ethics in Professional Environments is an essential research book that helps professionals in a variety of practices understand how normativity in their practice either helps or hampers them to function well and align with what they see as their personal and professional responsibility. Additionally, it explains the normative practical model/approach and how it can be applied to a series of concrete practices, as well as the role of innovative and disruptive technologies in these practices. Featuring a broad range of topics such as governance theory, sustainable development, and engineering, this book is ideally designed for managers, philosophers, sociologists, professionals, academicians, and researchers.

Zoonosis Jacob Lorenzo-Morales, 2012-04-04 Zoonotic diseases are mainly caused by bacterial, viral or parasitic agents

although unconventional agents such as prions could also be involved in causing zoonotic diseases. Many of the zoonotic diseases are a public health concern but also affect the production of food of animal origin thus they could cause problems in international trade of animal-origin goods. A major factor contributing to the emergence of new zoonotic pathogens in human populations is increased contact between humans and animals. This book provides an insight on zoonosis and both authors and the editor hope that the work compiled in it would help to raise awareness and interest in this field. It should also help researchers, clinicians and other readers in their research and clinical usage.

From Challenges to Opportunities Negin Shah Hosseini, Pauline Runge, Joachim Schroeder, 2023-05-03 The articles compiled in this publication present the findings from an international interdisciplinary project on counselling in the field of disability. The research was conducted over a four-year period during a dialogue between six universities in Iraq, Iran and Germany. The participating researchers contributed their expertise from the fields of special education, social work and psychology. The internationality and diversity of the project group additionally enabled an interdisciplinary approach to the subjects of disability and counselling. The challenges and opportunities in these areas were determined and compared during a differentiated analysis of the counselling structures in the fields of action of family counselling, career counselling and university counselling. The articles thus reflect a range of different professional perspectives and regional contexts, along with the authors' individual points of view.
