The book addresses fundamental aspects of educational technology theory, research and practice that span various users, contexts and settings; includes a full range of engaging exercises for students that will contribute to their professional growth; and offers the following 4-step pedagogical features inspired by M. D. Merrill's *First Principles of Instruction*: **TELL**: Primary presentations and pointers to major sources of information and resources **ASK**: Activities that encourage students to critique applications and share their individual interpretations **SHOW**: Activities that demonstrate the application of key concepts and complex skills with appropriate opportunities for learner responses **DO**: Activities in which learners apply key concepts and complex skills while working on practice assignments and/or projects to be created for their electronic portfolios The second edition of this textbook covers the core objectives addressed in introductory educational technology courses while adding new sections on mobile learning, MOOCs, open educational resources, big data, and learning analytics along with

suggestions to instructors and appendices on effective writing, professional associations, journal and trade magazines.

The Philosophy of Education (RLE Edu K) Harry Schofield, 2013-05-13 There are many students who find philosophy of education difficult, because they have never received teaching in the basic essentials of general philosophy. This book begins by asking the basic question 'what is philosophy?' and examines a number of possible answers. Step by step the reader is introduced to the modern techniques of linguistic and concept analysis. Whenever a technical term is used it is explained and illustrated by reference to familiar situations in everyday life.

Hermeneutics and Education Shaun Gallagher, 1992-10-01 Shaun Gallagher is Associate Professor of Philosophy at Canisius College, and co-editor of the forthcoming book, Merleau-Ponty, Hermeneutics, and Postmodernism, which will be published by SUNY Press.

Decentralizing Education in Transition Societies Ariel Fiszbein, 2001-01-01 This book is about education system reform in Central and Eastern Europe, with emphasis on decentralization and management. In the past, local authorities served as implementation arms of the central ministry, while finance and decision-making were controlled by the central government, leaving local communities with little influence. New education laws in most countries of the region have altered this balance. A moderate approach may be the least disruptive short-term solution for societies undergoing socioeconomic transition. In 1997 the World Bank Institute participated in a research project to study intergovernmental roles in the delivery of education services in the Czech Republic, Hungary, Poland, Albania, Bulgaria, and Romania. Each country assembled a research team

of academics, educators, and policy advisors led by an education specialist. Each team produced a report, which was discussed and revised during four information-sharing seminars, and they are presented here. The challenge these countries face is how to develop new institutions that can effectively enlist state, civil-society, and private-sector resources to achieve educational goals. This book should be of interest to educators and other readers interested in Central and Eastern European area studies. Its multidisciplinary methodology will also provide useful insights to development policymakers in other sectors. (RT)

School Leadership for Democratic Education in South Africa Tsediso Michael Makoelle, Thabo Makhalemele., Pierre du Plessis, 2021-07-29 School Leadership for Democratic Education in South Africa explores the democratization and modernization of education in South Africa, analyzing the state of school leadership in South African schools from the time of the new democratic education dispensation in 1994 to the present day. The book maps out what the future of education in South Africa could look like and explores the most conducive educational environments for change in South African schools. It adopts a critical approach to analyzing leadership and management in the context of school governance, school effectiveness, teacher development, multiculturalism and equity in education. Contributions explore the democratization and modernization of education in South Africa through examining different perspectives, achievements and challenges, and also consider issues around access to technology, language policy and the curriculum along with new literature on selected aspects of leadership. This book will be of great interest for researchers, scholars, and students in the fields of educational leadership, sociology of education, and teacher education.

Basics in Education Ms. Pooja Sharma, Dr. Kotra Balayogi, Dr. Daniel Michal Khan, Dr. Kiran Bala Patel, Dr Pallavi Kaul, Education is the cornerstone of personal and societal development, shaping individuals' lives and influencing the future of communities and nations. As we navigate the complexities of the modern world, understanding the foundational elements of education becomes increasingly essential. Basics in Education aims to provide a comprehensive exploration of the fundamental concepts and principles that underpin effective educational practice. This book is designed for educators, students, and anyone with an interest in the educational field. It covers a wide range of topics, including the meaning of knowledge, various ways of knowing, the process of knowledge construction, and the principles of curriculum development. Each chapter delves into key aspects of education, offering insights into how knowledge is organized, constructed, and applied within educational settings. The journey of writing this book has been both challenging and rewarding. It involved extensive research, thoughtful reflection, and valuable discussions with experts in the field. The aim has been to create a resource that not only imparts knowledge but also inspires educators to reflect on their practices and engage with educational theories critically. The exploration of knowledge organization within schools, the principles guiding curriculum formulation, and the process of developing syllabi and textbooks are presented with the intent to foster a deeper

understanding of educational practices. By examining these areas, the book seeks to equip readers with the tools and insights needed to enhance their educational approaches and contribute meaningfully to the field.

Psychology and the Study of Education Cathal Ó Siochrú, 2018-02-07 *Psychology and the Study of Education: Critical Perspectives on Developing Theories* explores both the insights and applications that psychology can offer in a range of educational contexts. Introducing the reader to a wide variety of sources, from cutting edge research to key studies from the past, it offers new perspectives on the psychology of education. This includes re-examining core theories of learning, unpicking key learning processes and reconsidering the role of factors such as memory, creativity and gender in learning. Questioning myths and misconceptions, it challenges the reader to develop a critically reflective approach and asks them to reconsider the potential value of psychology in both understanding and influencing education. With discussion points and recommended readings provided in every chapter to enhance sessions and challenge students, issues explored include: Reconsidering what we think we know about the psychology of education. Memory: How we learn by remembering and imagining. Creativity: Creative learning and learning creativity. Reading, writing and dyslexia: Understanding the myths and exploring the challenges. Embodiment: The entanglement of brain, body and environment in learning. Social understanding: Learning to relate and its role in education. Gender: The origins of gender identity and its impact on education. Behaviourism: Taking a second look at its wider relevance to learning. Piaget: A fresh perspective on Piagetian theory and method. Vygotsky: Socio-cultural theories and collective learning. Your guide to the complex and evolving field that is psychology of education, this is an essential text for students of Education Studies, Disability Studies, Early Childhood or Childhood and Youth Studies and Teacher Education; ideal for anyone who has already been introduced to a little psychology and would like to know more, or anyone teaching psychology on an education course. Whether you are taking your first steps or looking for your next challenge, this book has something to offer anyone who wants to take their study of the psychology of education to the next level.

How Autism is Reshaping Special Education Mark K. Claypool, John M. McLaughlin, 2017-02-08 Special education in the United State is based on the concept of access—public schools are open to all children. But access is no longer a sufficient foundation. Approaches and accommodations that lead to academic success are increasingly demanded for those with learning disabilities. Functional, independent-living, and employable skills are requisite, but rare, for those with serious handicapping conditions. Since the last reauthorization of the Individuals with Disabilities Act, four events have transpired that will have a dramatic impact on the next iteration of the federal law: the increase in the number of children diagnosed with autism, the rise of applied behavior analysis, the birth of social media, and the reality of unbundling. In *How Autism Is Reshaping Special Education: The Unbundling of IDEA*, Claypool and McLaughlin explore the effect of these events on a special education process burdened by regulation, where advances in the behavioral sciences and neurosciences blur the

lines between education and medicine, and where social media fosters aggressive advocacy for specific disabilities. 2018 International Book Awards: Finalist Education/Academic 2018 Next Generation Indie Book Awards: Finalist Education/Academic (Non-Fiction) 2017 Best Book Awards: Finalist Education/Academic

NOAA's Education Program National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee for the Review of the NOAA Education Program, 2010-07-23 There is a national need to educate the public about the ocean, coastal resources, atmosphere and climate. The National Oceanic and Atmospheric Administration (NOAA), the agency responsible for understanding and predicting changes in the Earth's environment and conserving and managing coastal and marine resources to meet the nation's economic, social and environmental needs, has a broad mandate to engage and coordinate education initiatives on these topics. Since its creation in 1970, the NOAA has supported a variety of education projects that cover a range of topics related to the agency's scientific and stewardship mission. NOAA uses formal and informal learning environments to enhance understanding of science, technology, engineering and mathematics (STEM) and to advance environmental education. The work of this agency overlaps and complements the missions of other federal agencies, institutions of higher education, private and nonprofit organizations. Coordination among these agencies and organizations has been challenging. Limited education resources and the inherently global nature of NOAA's mission make strategic partnerships critical in order for the agency to accomplish its goals. Additionally, clear education goals, planning, and strategic use of resources are critical aspects for effective partnerships. NOAA's Education Program: Review and Critique provides a summary of the national education context for NOAA's role in education which is twofold: first is to advance the environmental literacy of the nation, and second is to promote a diverse workforce in ocean, coastal, Great Lakes, atmospheric and climate sciences. The book also describes the strengths and weaknesses of the education strategic plan, the education evaluation approach of the agency and strategies for improving the evaluation process.

Politics, Policies and Pedagogies in Education Bob Lingard, 2013-07-24 In the World Library of Educationalists, international experts compile career long collections of what they judge to be their finest pieces of work – extracts from books, key articles, salient research findings, major theoretical and practical contributions – so the world can read them in a single manageable volume. Readers will be able to follow the themes and strands and see how their work contributes to the development of the field. Bob Lingard has spent the last 30 years researching and writing in universities in Australia, England and Scotland about changing education policy issues. His work is written from a sociological perspective and with a commitment to social justice. He is the co-editor and co-author of 17 books and more than 100 journal articles and book chapters. In Politics, Policies and Pedagogies in Education, Bob Lingard provides critical sociological engagement with the politics of education. The focus is education policy and the impact of globalization, including epistemological and

methodological issues necessary for researching education policy today. Topics analyzed include: educational restructuring new accountabilities and testing mediatization of education policy policy as numbers the global policy field and policy borrowing pedagogies. Lingard also considers the nature of educational research today. He has selected 12 of his key writings and in a critical introduction situates and contextualizes the work against key developments in the field and in the changing world.
