Materiales para ingeniería 1. Introducción a las propiedades, las aplicaciones y el diseño M. F. Ashby, David Rayner Hunkin Jones, 2008 Las innovaciones tecnológicas a menudo son consecuencia del uso inteligente de nuevos materiales, pero también muchos desastres en ingeniería están causados por un mal uso de los mismos. Por ello es vital que el ingeniero profesional conozca cómo se seleccionan los materiales y sepa cuáles se ajustan a las demandas de un diseño en particular; es decir, demandas económicas, estéticas, de resistencia y de durabilidad. El ingeniero debe comprender las propiedades de los materiales y sus limitaciones, y esta obra resulta una guía útil. Este libro es adecuado para un curso de Materiales de ingeniería impartido a estudiantes sin conocimientos previos en la materia. Está pensado para enlazar con las enseñanzas de diseño, mecánica y estructuras, y para satisfacer las necesidades de los estudiantes, enfatizando las aplicaciones de diseño. El texto es conciso, ofrece casos prácticos de aplicación y dispone de numerosos ejemplos al final de cada capítulo.

AGUA Santiago Ramírez, Juan Carlos Vega, 2017-08-22 En el año 2000 más de 1,000 millones de personas carecían de agua potable y en el 2010 los humanos consumimos entre el 70% y 90% del agua disponible; estas cifras dan cuenta de lo fundamental que es adquirir conocimientos, comprender, analizar y aportar soluciones para un mejor uso del líquido. La presente obra aborda temas de mucha importancia y complejidad como las fuentes desde donde obtiene el agua, los procedimientos para obtener agua potable y la utilización industrial de ésta enmarcada en el desarrollo sustentable. Los problemas actuales relativos a estos temas precisan de conocimientos y comprensión cabales con los cuales se pueda hacer frente a ellos. Es necesario comprender la problemática referente a la disposición de agua en calidad y cantidad para poder buscar soluciones al abastecimiento actual y futuro de este vital recurso. Este libro contribuye al aumento de propuestas adecuadas para la gestión sustentable del agua.

Ecología y capital Enrique Leff, 1994 La destrucción ecológica, la degradación ambiental y el deterioro de la calidad de vida de las mayorías aparece como un signo elocuente de los límites de la racionalidad económica sobre la cual se ha construido la civilización moderna. En la carrera desenfrenada del crecimiento económico se ha desterrado a la naturaleza de la esfera de la producción, subyugando las identidades culturales, socavando las bases de sustentabilidad ecológica del

planeta y ensanchando las desigualdades sociales. Desde una postura crítica del discurso de la globalización y del desarrollo sostenible, Enrique Leff desentraña las raíces profundas de la crisis ambiental -crisis de la razón instrumental y de la racionalidad económica dominantes-- y elabora los fundamentos de un nuevo paradigma productivo.

Psicología de la educación virtual César Coll, 2008-10 Psicología de la educación virtual versa sobre la educación y el aprendizaje en entornos virtuales al tiempo que se sitúa de forma clara y explícita en el ámbito de la psicología y, más concretamente, de la psicología de la educación. En el transcurso de las dos o tres últimas décadas ha habido una producción relativamente abundante, tanto en castellano como en otras lenguas, de libros que tratan temas relacionados con la educación y las tecnologías de la información y la comunicación (TIC) desde perspectivas epistemológicas, teóricas y disciplinares diversas. Cuando se analiza en su conjunto puede constatarse que esta producción responde de forma mayoritaria a preocupaciones y planteamientos de tipo sociológico, tecnológico o didáctico, y que las aproximaciones y los análisis psicológicos son más bien escasos. El objetivo de esta obra es contribuir a compensar esta carencia mediante la adopción de un punto de vista psicológico en el estudio de los procesos educativos que tienen lugar en entornos sustentados, total o parcialmente, en la utilización de tecnologías digitales de la información y la comunicación. La obra se estructura en cuatro partes: El impacto de las TIC sobre la educación y la psicología de la educación. Se centra en el estudio de los procesos de aprendizaje que tienen lugar como consecuencia de la participación de las personas en situaciones y actividades educativas caracterizadas por el uso de tecnologías digitales de la información y la comunicación. Factores y procesos psicológicos implicados en el aprendizaje virtual: Una mirada constructivista. Se tratan los tres vértices del triángulo interactivo: el aprendiz, el profesor y los contenidos del aprendizaje, así como sus interrelaciones. Entornos virtuales de enseñanza y aprendizaje. Se enfoca a los contextos instruccionales, de naturaleza virtual, que cuentan con una mayor presencia y aceptación en la actualidad, tanto entre los proyectos educativos más innovadores como en la investigación educativa y psicoeducativa. La enseñanza y el aprendizaje de competencias básicas en entornos virtuales. Se orienta a las principales competencias de carácter transversal consideradas en la mayoría de los informes internacionales como habilidades imprescindibles para sobrevivir en la sociedad-red.

Competencias docentes del profesorado universitario Miguel Ángel Zabalza, Miguel Ángel Zabalza Beraza, 2003-02-27 Quality and professional development - The thesis of this book is that the University develops a formative

task at the higher levels as required, in order to be effective, with regard to institutional conditions as well as the capacitation of their personnel. The formative mission of each university institution is concretized and carried out in its curricular offer and its quality of formation, for its part, it will depend in good measure on the performance of the teachers. Today it is beyond doubt that good teaching requires command of different competencies on the part of the teachers of each faculty or school. The “university curriculum”, the “teaching skills” and the “analysis of the teaching quality” are the three big parts in the book. Ten competencies that summarize the most important aspects of the university professors’ activity are analysed. Competencies that can serve as a mark of reference for a possible program of qualification of the university professors.
