Lights Out Ted Koppel,2016-10-18 NEW YORK TIMES BESTSELLER • Ted Koppel reveals that a major cyberattack on America's power grid is not only possible but likely, that it would be devastating, and that the United States is shockingly unprepared. "Fascinating, frightening, and beyond timely."—Anderson Cooper Imagine a blackout lasting not days, but weeks or months. Tens of millions of people over several states are affected. For those without access to a generator, there is no running water, no sewage, no refrigeration or light. Food and medical supplies are dwindling. Devices we rely on have gone dark. Banks no longer function, looting is widespread, and law and order are being tested as never before. It isn't just a scenario. A well-designed attack on just one of the nation's three electric power grids could cripple much of our infrastructure—and in the age of cyberwarfare, a laptop has become the only necessary weapon. Several nations hostile to the United States could launch such an assault at any time. In fact, as a former chief scientist of the NSA reveals, China and Russia have already penetrated the grid. And a cybersecurity advisor to President Obama believes that independent actors—from "hacktivists" to terrorists—have the capability as well. "It's not a question of if," says Centcom Commander General Lloyd Austin, "it's a question of when." And yet, as Koppel makes clear, the federal government, while well prepared for natural disasters, has no plan for the aftermath of an attack on the power grid. The current Secretary of Homeland Security suggests keeping a battery-powered radio. In the absence of a government plan, some individuals and communities have taken matters into their own hands. Among the nation's estimated three million "preppers," we meet one whose doomsday retreat includes a newly excavated three-acre lake, stocked with fish, and a Wyoming homesteader so self-sufficient that he crafted the thousands of adobe bricks in his house by hand. We also see the unrivaled disaster preparedness of the Mormon church, with its enormous storehouses, high-tech dairies, orchards, and proprietary trucking company—the fruits of a long tradition of anticipating the worst. But how, Koppel asks, will ordinary civilians survive? With urgency and authority, one of our most renowned journalists examines a threat unique to our time and evaluates potential ways to prepare for a catastrophe that is all but inevitable.

Lights Out Adam Green, 2016-01-20 *Lights Out* by Ted Koppel - Key Summary & Analysis There exists a question about how probable that is. The guide of Koppel estimates the pessimists and optimists but does of separating details from fiction an unhealthy task. *Lights Out* lacks concentration. Koppel contends the energy grid is vulnerable to a cyberattack. He points to not enough business safety criteria, how seldom anybody seems able to preserving established hackers from a PC and how energy firms are influenced by the other person to get and transfer energy. Nonetheless he offers no examples of prosperous cyberattacks from the electrical market. His competition is the fact that since info has been stolen by hackers from Sony and suppliers, then there is on our energy a digital strike imminent. *Lights Out* accounts that Russia and China have the technological power to crack the U.S. power grid, however the guide points out that this assault be part of combat or would constitute an act of war itself. If America are at conflict with China or Russia, then we have troubles greater than a blackout. Even in the case of such an assault, Koppel reviews, it is unclear the blackout would be more than separated. The failures he does cite were a direct result natural problems. Moment of Truth Kelly McKinney, 2018-07-17 "Miami Beach Devastated by Monster Category 5 Hurricane" "Times Square Incinerated by Homemade Nuclear Bomb" "Magnitude 9.0 Earthquake Reduces Downtown Seattle to Rubble" These aren't actual headlines—but they could be. Even though they sound like next summer's blockbuster movies, each of these worst-case scenarios is a real threat—a threat for which America is hugely underprepared. But it doesn't have to be that way. This is not a book about disasters. Instead, *Moment of Truth* will tell you what these genuine threats mean for society as a whole, as well as for your region or town—or you. All we have to do is open our eyes and look beyond the "brick wall of hope" that clouds our vision in collective denial. In addition to advice for government, *Moment of Truth* contains practical steps that you can take now keep you and your family safe in the face of the next catastrophe. Because it may come down to just you.

Out of Darkness Ralph Nader, 2024-06-25 A collection of columns and essays that reveal Ralph Nader at his outspoken and prescient best, fighting the good fight against corporate corruption, unbalanced political power, consumer dangers, big pharma, and climate deniers. Features an introduction by Lewis Lapham. This collection is classic Nader—exhorting us to make our world and nation a better place, even when faced with unchecked political and corporate power, and perverse market and regulatory incentives. He starts with the declaration that the national Democratic Party bureaucrats are either inept or bewildered. With its record-setting campaign fundraising, he bemoans how the Party can't seem to figure out how to go on the offensive against the overtly lying, cruel, corrupt, law-breaking, Wall Street over Main Street, Trumpian Republican Party. In another essay he praises Canada, explaining that the majority of citizens love their health care system—Medicare-for-all, free choice of doctor and hospital, everybody in, nobody out and far less expensive with better outcomes overall. Highlighting heroes like Pete Seeger, Wendell Berry, the journalist Helen Thomas, Nader also celebrates citizens like the lesser-known charismatic George S. Hawkins, general manager of the District of Columbia Water and Sewer Authority who brought immense energy, vision, and ambitious, overdue plans to the forefront for American's public drinking water. Meanwhile, he doesn't shy away from enemies—for example Nader slams the evils of Big Pharma's strength and hold over Congress and infinite greed. Nader also brings American history to the present day with creative twists. "We need to remember Ben Franklin, our frugal forebear, who coined the phrase 'a penny saved is a penny earned,'" he writes. "Today he would say 'a trillion BTUs saved is a trillion BTUs earned.'" Ranging from hernia repair to auto safety reports and warnings about lethal super-bugs and global pandemics from 2013, Nader's essays and newspaper columns will inform and activate his legions of fans.

Gone Dark Amanda Panitch, 2023-04-04 When a terrorist attack cuts electricity across North America, teenaged Zara and her would-be boyfriend Gabe set out to find Gabe's sister--her best friend Estella--relying on skills Zara learned from her survivalist father.

He Caught the Westbound Dayton Lummis, 2017-04-19 He caught the westbound is an old American hobo expression for someone who has departed from this life. In the case of this book it is employed to be symbolic of a passing American way of life and the people who created that. We live in troubled times, and the author often uncomfortably reminds us so. Yet positive travel experiences relieve the pessimism wherein the author says, It could be worse. But not much . . .

The Cyber Risk Handbook Domenic Antonucci, 2017-04-03 Actionable guidance and expert perspective for real-world cybersecurity The Cyber Risk Handbook is the practitioner's guide to implementing, measuring and improving the counter-cyber capabilities of the modern enterprise. The first resource of its kind, this book provides authoritative guidance for real-world situations, and cross-functional solutions for enterprise-wide improvement. Beginning with an overview of counter-cyber evolution, the discussion quickly turns practical with design and implementation guidance for the range of capabilities

expected of a robust cyber risk management system that is integrated with the enterprise risk management (ERM) system. Expert contributors from around the globe weigh in on specialized topics with tools and techniques to help any type or size of organization create a robust system tailored to its needs. Chapter summaries of required capabilities are aggregated to provide a new cyber risk maturity model used to benchmark capabilities and to road-map gap-improvement. Cyber risk is a fast-growing enterprise risk, not just an IT risk. Yet seldom is guidance provided as to what this means. This book is the first to tackle in detail those enterprise-wide capabilities expected by Board, CEO and Internal Audit, of the diverse executive management functions that need to team up with the Information Security function in order to provide integrated solutions. Learn how cyber risk management can be integrated to better protect your enterprise Design and benchmark new and improved practical counter-cyber capabilities Examine planning and implementation approaches, models, methods, and more Adopt a new cyber risk maturity model tailored to your enterprise needs The need to manage cyber risk across the enterprise—inclusive of the IT operations—is a growing concern as massive data breaches make the news on an alarmingly frequent basis. With a cyber risk management system now a business-necessary requirement, practitioners need to assess the effectiveness of their current system, and measure its gap-improvement over time in response to a dynamic and fast-moving threat landscape. The Cyber Risk Handbook brings the world's best thinking to bear on aligning that system to the enterprise and vice-a-versa. Every functional head of any organization must have a copy at-hand to understand their role in achieving that alignment.

Justice for People on the Move Gillian Brock, 2020-02-20 Offers a comprehensive framework that can assist in responding to new justice challenges for people on the move.

The Age of Perversion Danielle Knafo, Rocco Lo Bosco, 2016-12-01 American Board and Academy of Psychoanalysis Book Prize Winner for 2018 (Theoretical Category) We have entered the age of perversion, an era in which we are becoming more like machines and they more like us. The Age of Perversion explores the sea changes occurring in sexual and social life, made possible by the ongoing technological revolution, and demonstrates how psychoanalysts can understand and work with manifestations of perversion in clinical settings. Until now theories of perversion have limited their scope of inquiry to sexual behavior and personal trauma. The authors of this book widen that inquiry to include the social and political sphere, tracing perversion's existential roots to the human experience of being a conscious animal troubled by the knowledge of death. Offering both creative and destructive possibilities, perversion challenges boundaries and norms in every area of life and involves transgression, illusion casting, objectification, dehumanization, and the radical quest for transcendence. This volume presents several clinical cases, including a man who lived with and loved a sex doll, a woman who wanted to be a Barbie doll, and an Internet sex addict. Also examined are cases of widespread social perversion in corporations, the mental health care industry, and even the government. In considering the continued impact of technology, the authors discuss how it is changing

the practice of psychotherapy. They speculate about what the future may hold for a species who will redefine what it means to be human more in the next few decades than during any other time in human history. The Age of Perversion provides a novel examination of the convergence of perversion and technology that will appeal to psychoanalysts and psychoanalytic psychotherapists, social workers, mental health counselors, sex therapists, sexologists, roboticists, and futurists, as well as social theorists and students and scholars of cultural studies.

The Sound of Light Sarah Sundin, 2023-02-07 Sundin shines in her newest novel. Her craft is inimitable, and her literary finesse radiates from every page.--Booklist starred review When the Germans march into Denmark, Baron Henrik Ahlefeldt exchanges his nobility for anonymity, assuming a new identity so he can secretly row messages for the Danish Resistance across the waters to Sweden. American physicist Dr. Else Jensen refuses to leave Copenhagen and abandon her research--her life's dream. While printing resistance newspapers, she hears stories of the movement's legendary Havmand--the merman--and wonders if the mysterious and silent shipyard worker living in the same boardinghouse has something to hide. When the Occupation cracks down on the Danes, these two passionate people will discover if there is more power in speech . . . or in silence. Bestselling author of more than a dozen WWII novels, Sarah Sundin offers pens another story of ordinary people responding to extraordinary circumstances with faith, fortitude, and hope for a brighter future. Sundin grounds this suspenseful tale in rich historical detail.--Publishers Weekly
