

Relieve De La Selva Misionera

Juan Papadakis

Ecología Guillermo Briceño, 2023-02-17 HACE mucho que los problemas ecológicos han alcanzado una dimensión global: la contaminación de la atmósfera y de las entes hídricas, la destrucción de la capa de ozono, el efecto invernadero, el cambio climático, la sobrepesca en los océanos, la superpoblación humana, y un largo etcétera. Entonces ¿por qué centrarse ahora en el neotrópico? Sencillamente porque es uno de los últimos bastiones de ecosistemas y de biodiversidad que queda en pie tras la codicia del extractivismo mundial.

Por un futuro rural Marcelo Sili, 2021-11-24 Desde mediados del siglo XX y hasta la actualidad, la Argentina apostó a la industrialización y la urbanización como estrategia de desarrollo. Dentro de este contexto, el mundo rural no fue pensado como territorio de vida, sino y ante todo como un lugar privilegiado para producir materias primas y divisas para sostener el Estado y múltiples dimensiones de la vida nacional. El resultado de esta estrategia nacional y la invisibilización y el desconocimiento de los problemas del mundo rural terminaron consolidando un país profundamente urbanizado, desequilibrado, y con grandes desigualdades en términos de oportunidades y calidad de vida. Este libro describe esta realidad, pero además, y como punto clave, pone el acento en analizar cómo en las últimas décadas se están generando, en el mundo rural argentino, dinámicas que contribuirían a construir un nuevo mapa de la Argentina, dinámicas que se exacerban y potencian día a día, especialmente a partir de la crisis por el covid-19. La hipótesis que guía este libro es que los nuevos procesos emergentes, como la migración de la ciudad al campo, el cambio tecnológico en la producción y las comunicaciones, las nuevas formas de relación con la naturaleza, la diversificación productiva y la valorización del patrimonio biocultural, entre otros, tienen la capacidad necesaria para crear un nuevo modelo de organización y desarrollo rural, si es que se aplican las políticas correctas. Este nuevo modelo rural contribuiría también a cambiar el paradigma de desarrollo argentino, que

todavía se sigue basando en la sustitución de importaciones, la industrialización y la urbanización. El libro define y caracteriza el modelo de organización y desarrollo de los territorios rurales que podría emerger, y avanza finalmente con un conjunto sencillo de ideas claves para la construcción y consolidación de este modelo.
