Learning and Teaching for Teachers Pradeep Kumar Misra, 2021-10-18 This book provides a comprehensive and balanced description of learning and teaching by connecting it to secondary and higher education teachers' experiences and practices in day-to-day life. Woven around research conducted by educationists, psychologists, and practitioners around the globe, this book presents key concepts and addresses significant discussions and concerns with regard to learning and teaching in the present age. Seeking to help teachers understand learners' learning needs, preferences, and styles and manage their teaching plans, priorities, and practices accordingly, it details the main ideas and emerging practices related to learning and teaching in a very easy to 'read, understand, and practice' way. Combining the traditional textbook-style approach of content description with a self-learning approach based on various real-world situations and activities related to both learning and teaching, this textbook is particularly valuable for teachers in school education, higher education, and teacher education. This book is also an essential resource for fulfilling teachers' continuing professional development requirements. Whole Person Librarianship Sara K. Zettervall, Mary C. Nienow, 2019-08-14 Whole Person Librarianship guides librarians through the practical process of facilitating connections among libraries, social workers, and social services; explains why those connections are important; and puts them in the context of a national movement. Collaboration between libraries and social workers is an exploding trend that will continue to be relevant to the future of public and academic libraries. Whole Person Librarianship incorporates practical examples with insights from librarians and social workers. The result is a new vision of library services. The authors provide multiple examples of how public and academic librarians are connecting their patrons with social services. They explore skills and techniques librarians can learn from social workers, such as how to set healthy boundaries and work with patrons experiencing homelessness; they also offer ideas for how librarians can self-educate on these topics. The book additionally provides insights for social work partners on how they can benefit from working with librarians. While librarians and social workers share social justice motivations, their methods are complementary and yet still distinct—librarians do not have to become social workers. Librarian readers will come away with many practical ideas for collaboration as well as the ability to explain why collaboration with social workers is important for the future of librarianship.

Practical suggestions are connected to the lived experiences of self-study practitioners making sense of their field through the process of writing. This book will be of interest to doctoral and novice self-study writers, and experienced authors seeking to develop their practice.
