

Green Great Wall China

David W. S. Wong, Kenneth K. K. Wong, Him Chung, James J. Wang

Gardens and Human Agency in the Anthropocene Maria Paula Diogo, Ana Duarte Rodrigues, Ana Simões, Davide Scarso, 2019-04-26 This volume discusses gardens as designed landscapes of mediation between nature and culture, embodying different levels of human control over wilderness, defining specific rules for this confrontation and staging different forms of human dominance. The contributing authors focus on ways of rethinking the garden and its role in contemporary society, using it as a crossover platform between nature, science and technology. Drawing upon their diverse fields of research, including History of Science and Technology, Environmental Studies, Gardens and Landscape Studies, Urban Studies, and Visual and Artistic Studies, the authors unveil various entanglements woven in the past between nature and culture, and probe the potential of alternative epistemologies to escape the predicament of fatalistic dystopias that often revolve around the Anthropocene debate. This book will be of great interest to those studying environmental and landscape history, the history of science and technology, historical geography, and the environmental humanities.

The Future of Sustainability Ray C. Anderson, Ian Spellerberg, Daniel E. Vasey, 2012-10-31 The Future of Sustainability, the tenth and final volume of the Berkshire Encyclopedia of Sustainability, brings together essays from a group of renowned scholars and well-known environmentalist thinkers. Crucial topics are considered in terms of the future of humanity and its relationship with the natural world, from the outlook for nuclear energy, cities, energy, agriculture, water, food security, mobility, and migration; the role of higher education; and the concept of collective learning. The volume concludes with a resource guide for teaching materials at several levels, a directory of leading undergraduate- and graduate-level programs in sustainability, and a combined index of the 10-volume set.

Agroforestry for Sustainable Intensification of Agriculture in Asia and Africa Jagdish Chander Dagar, Sharda Rani Gupta, Gudeta Weldesemayat Sileshi, 2023-04-19 This edited book opens up new vistas for sustainable intensification in agriculture to provide food to ever growing population as well as adapting to the risks of global environmental change. Diverting from conventional agriculture, the book explores new dimensions and concepts that have been identified for future research and development in sustaining agriculture in Asia and Africa regions. The chapters are written by leading researchers and practitioners in the field of agroforestry. The book demonstrates how agroforestry could be instrumental in bringing stability and sustainability in agricultural production. It offers sustainable solutions for the impending problems of

climate change, ecosystem degradation, declining agricultural productivity, and uncertain food security. It is an essential resource for students in agroforestry courses, as well as a valuable introduction to the field for professionals in related areas.

Stumbling Giant Timothy Beardson, 2013-05-21 “A thoughtful reconsideration of China’s actual place in the new world order, based on reality rather than fanciful speculation.” —Kirkus Reviews Can anything prevent China surpassing the United States and becoming the world’s top superpower? While predictions that China’s rise to global supremacy is a near-certainty have resulted in this belief becoming almost conventional wisdom, this book boldly counters such widely held assumptions. Investment strategist Timothy Beardson brings to light the daunting array of challenges that today confront China, as well as the inadequacy of the policy responses. Threats to China come on many fronts, Beardson shows, and by their number and sheer weight these problems will thwart any ambition to become the world’s “Number One power.” Drawing on extensive research and experience living and working in Asia over the last 35 years, the author spells out China’s situation: an inexorable demographic future of a shrinking labor force, relentless aging, extreme gender disparity, and even a falling population. Also, the nation faces social instability, a devastated environment, a predominantly low-tech economy with inadequate innovation, the absence of an effective welfare safety net, an ossified governance structure, and radical Islam lurking at the borders. Beardson’s nuanced, firsthand look at China acknowledges its historic achievements while tempering predictions of its imminent hegemony with a no-nonsense dose of reality.

Plan B 3.0: Mobilizing to Save Civilization Lester R. Brown,

China Robert B. Marks, 2017-02-13 This deeply informed and clearly written text provides a comprehensive and comprehensible history of China from prehistory to the present. Now updated to include recent political events and scientific research, the book focuses on the interaction of humans and their environment. Tracing changes in the physical and cultural world that is home to a fifth of humankind, Robert B. Marks illuminates the paradoxes inherent in China’s environmental narrative, demonstrating how historically sustainable practices can, in fact, be profoundly ecologically unsound. The author also reevaluates China’s traditional “heroic” storyline, highlighting the marginalization of nature and contacts with other peoples that followed the spread of Chinese civilization while examining the development of a distinctly Chinese way of relating to and altering the environment. Unmatched in his ability to synthesize a complex subject clearly and cogently, Marks has written an accessible yet nuanced history for any student interested in China, past or present, or indeed in the world’s environmental future.

The World Atlas of Deserts and Drylands David Thomas, 2024-11-12 A richly illustrated atlas of the world’s deserts and drylands, their ecosystems, and their environments Deserts and drylands account for more than 40 percent of land on our planet. Characterized by a lack of water and extreme temperatures, they are the result of atmospheric stability, large landmass characteristics, rain shadows, and cold ocean currents. They appear harsh and hostile, but deserts and drylands

are also exceptionally beautiful environments. Desert ecosystems often teem with diverse forms of life that exhibit astonishing ingenuity in the face of such forbidding conditions. The World Atlas of Deserts and Drylands takes readers on a guided tour of some of the most awe-inspiring desert environments on Earth, explaining their environmental and ecological dynamics and describing the techniques used to categorize and map them. From the ever-expanding Gobi of Mongolia and China to the ancient Namib of coastal Africa, this is the ultimate reference book for deserts. Features a wealth of color photos, maps, and infographics Describes the resilient and complex biodiversity of the world's desert and dryland terrains Covers subtropical deserts, continental deserts, rain shadow deserts, and ocean margin deserts Addresses the challenges posed by global warming and human activity, and discusses solutions and opportunities Written by a team of leading experts

Landscape Ecology for Sustainable Environment and Culture Bojie Fu, Bruce Jones K, 2013-03-26 Climate change and the pressures of escalating human demands on the environment have had increasing impacts on landscapes across the world. In this book, world-class scholars discuss current and pressing issues regarding the landscape, landscape ecology, social and economic development, and adaptive management. Topics include the interaction between landscapes and ecological processes, landscape modeling, the application of landscape ecology in understanding cultural landscapes, biodiversity, climate change, landscape services, landscape planning, and adaptive management to provide a comprehensive view that allows readers to form their own opinions. Professor Bojie Fu is an Academician of Chinese Academy of Sciences and Chair of scientific committee at the Research Center for Eco-Environmental Sciences, Chinese Academy of Sciences, Beijing, China. Professor K. Bruce Jones is the Executive Director for Earth and Ecosystem Sciences Division at Desert Research Institute, University of Nevada, Las Vegas, USA.

The World's Population Fred M. Shelley, 2014-12-16 This one-volume encyclopedia examines key topics, major world players, and imminent problems pertaining to the world's ever-growing population. According to the United Nations, the population of our planet reached 7 billion people in 2011. What areas of the world have the most people? What measures, if any, are in place to control the population? Why is Europe's population shrinking, while the rest of the world is growing? This eye-opening encyclopedia answers questions like these by examining significant issues and topics relating to the population and exploring profiles of the most populated countries and cities of the world. More than 100 alphabetically arranged entries focus on such topics as census, demography, megacity, overpopulation, and urban sprawl. Author Fred M. Shelley, an accomplished academic in the field of environmental sustainability, reveals the steps taken by major cities such as Rio de Janeiro, Paris, Tokyo, Beijing, Mexico City, Seoul, Manila, and New Delhi in handling their population, and what is being done in China and other countries to prevent overcrowding. The text includes a discussion of how factors like migration patterns, war, and disease impact population change. This comprehensive encyclopedia also includes primary document excerpts from court cases, legislation, and political speeches relating to population issues.

Meeting China Halfway Lyle J. Goldstein, 2015-05-01 Though a US-China conflict is far from inevitable, major tensions are building in the Asia-Pacific region. These strains are the result of historical enmity, cultural divergence, and deep ideological estrangement, not to mention apprehensions fueled by geopolitical competition and the closely related “security dilemma.” Despite worrying signs of intensifying rivalry, few observers have provided concrete paradigms to lead this troubled relationship away from disaster. This book is dramatically different in that Lyle J. Goldstein’s focus is on laying bare both US and Chinese perceptions of where their interests clash and proposing new paths to ease bilateral tensions through compromise. Each chapter contains a “cooperation spiral” —the opposite of an escalation spiral—to illustrate these policy proposals. Goldstein makes one hundred policy proposals over the course of this book to inaugurate a genuine debate regarding cooperative policy solutions to the most vexing problems in US-China relations. Goldstein not only parses findings from American scholarship but also breaks new ground by analyzing hundreds of Chinese-language sources, including military publications, never before evaluated by Western experts. *Meeting China Halfway*, new in paperback, remains a refreshing and unique contribution to the study of the world’s most important bilateral relationship.

The National Geographic Magazine, 1927 Indexes kept up to date with supplements.

The United States and China Since World War II: A Brief History Chi Wang, 2014-12-18 This book surveys the complicated history of U.S.-Chinese relations. After two brief chapters providing historical context, the focus shifts to the mid-twentieth century, the wartime alliance, the war's bitter aftermath, and the decades since World War II, including the path from normalisation to China's hosting of the 2008 Summer Olympics. The author traces the ways in which the two countries have managed the blend of common and competitive interests in their economic and strategic relationships; the shifting political base for Sino-American relations within each country; the emergence and dissolution of rival political coalitions supporting and opposing the relationship; the evolution of each society's perceptions of the other; and ongoing differences regarding controversial topics like Taiwan and human rights. The author's early years in China, American education, and career as a China expert and an advisor on U.S.-China relations and cultural affairs for over fifty years, have afforded him unique opportunities to observe and participate in the development of this important relationship.

World Leadership In The Balance: China And The Us Clash For Supremacy Pierre-antoine Donnet, 2021-05-19 China and the United States have entered a multifaceted cold war: trade, high tech, space, defense, environment and values as they jostle for influence throughout the world. This rivalry between the world's top two economic powers will likely dominate the decades to come and its outcome is uncertain. After the American century, this new century may indeed be China's, or it may not. With Joe Biden's election as president of the United States, we are certainly in for a change of leadership style. But in terms of substance, US policy towards China is likely to remain tough. How will Beijing react? What strengths and weaknesses does China have in this long struggle for supremacy against the United States? This book analyzes the different

aspects of this disconcerting rivalry that has had, and will continue to have, an impact on our daily lives. The coronavirus pandemic has further exposed the failings of a monolithic Chinese system that does not tolerate freedom of expression but it has also, paradoxically, placed China in a position of strength against the United States.

Food Cultures of China Qian Guo,2023-07-27 Exploring the rich and varied culinary traditions of China, this book enables a better understanding of Chinese history and culture through food. Part of Bloomsbury's Global Kitchen series, this book takes readers on a food tour of China, covering everything from daily staples to holiday specialties. In addition to discovering China's long culinary history, you'll learn about recent trends, foreign influences, and contemporary food and dietary concerns, such as obesity and environmental sustainability. Chapters are organized thematically, making it easy to focus in on particular courses or types of dishes. For those hungry for a more hands-on approach, each chapter includes a collection of accessible recipes that allow readers to bring the subject to life in their own kitchens. The main text is supplemented by sidebars that offer interesting bite-sized facts, a chronology of important dates in China's culinary history, and a glossary of key food- and dining-related terms. Sun Yat-sen, the founding father of modern China, asserted that China's food culture was the most advanced and sophisticated in the world, despite the country lagging the West in science, industry, and civic engagement. Today, many people outside China immediately envision iconic dishes like fried rice, egg rolls, or sweet and sour pork when they think of Chinese food. But China has a much richer and more diverse set of culinary traditions. China's food culture is one of the oldest in the world, evolving over thousands of years. It has been shaped by a myriad of forces, from historical struggles with food insecurity to the modern push toward speed and convenience. Across this large nation, unique cuisines emerged that reflect the varied geography, climate, and customs of different regions.

Rural Development in Transitional China Jacob Eyferth,Peter Ho,Eduard Vermeer,2004-08-02 Since the late 1970s, China has experienced the most rapid social and economic changes in world history. Over 200 million rural inhabitants were lifted out of absolute poverty and tens of millions became wealthier than the average urban resident. This book offers an authoritative and in-depth analysis of the social and economic changes that have swept through the Chinese countryside. Topics covered include: land tenure and rural labour, social welfare, poverty alleviation, rural resettlement, food security, natural resource management and rural industrialization.

Forest and Land Management in Imperial China N. Menzies,1994-09-01 Although China is generally considered to have suffered continuous deforestation over most of its history, forests were protected or even planted and maintained for centuries in some places. This study identifies six such cases. It uses historical evidence to show that individuals and communities act to manage resources sustainably for a number of reasons including economic benefit, religious or symbolic purposes, and that sustainability of the management system depends on the form of control exerted over the resource.

China David W. S. Wong,Kenneth K. K. Wong,Him Chung,James J. Wang,2018-02-21 China has become a superpower,

exerting significant influence globally. This accessible text integrates thematic and regional coverage to provide a panoramic view of China--its physical geography; population, including ethnic diversity; urban development; agriculture and land use; transportation networks; dynamic economic processes; and environmental challenges. Cultural and political geography topics are woven throughout the chapters. The text also offers in-depth assessments of selected regions, capturing the complexity of this vast and populous country. It is richly illustrated with more than 150 maps, tables, figures, and photographs--including 8 pages in full color--which are available as PowerPoint slides at the companion website. Pedagogical Features *Chapter-opening learning objectives. *Chapter-opening key concepts and terms. *Extensive notes pointing students to relevant online resources. *Engaging topic boxes in every chapter.

The World in a Grain Vince Beiser, 2018-08-07 A finalist for the PEN/E. O. Wilson Literary Science Writing Award The gripping story of the most important overlooked commodity in the world--sand--and the crucial role it plays in our lives. After water and air, sand is the natural resource that we consume more than any other--even more than oil. Every concrete building and paved road on Earth, every computer screen and silicon chip, is made from sand. From Egypt's pyramids to the Hubble telescope, from the world's tallest skyscraper to the sidewalk below it, from Chartres' stained-glass windows to your iPhone, sand shelters us, empowers us, engages us, and inspires us. It's the ingredient that makes possible our cities, our science, our lives--and our future. And, incredibly, we're running out of it. The World in a Grain is the compelling true story of the hugely important and diminishing natural resource that grows more essential every day, and of the people who mine it, sell it, build with it--and sometimes, even kill for it. It's also a provocative examination of the serious human and environmental costs incurred by our dependence on sand, which has received little public attention. Not all sand is created equal: Some of the easiest sand to get to is the least useful. Award-winning journalist Vince Beiser delves deep into this world, taking readers on a journey across the globe, from the United States to remote corners of India, China, and Dubai to explain why sand is so crucial to modern life. Along the way, readers encounter world-changing innovators, island-building entrepreneurs, desert fighters, and murderous sand pirates. The result is an entertaining and eye-opening work, one that is both unexpected and involving, rippling with fascinating detail and filled with surprising characters.

Natural Resource Conflicts M. Troy Burnett, 2016-09-19 Natural resource and environmental conflicts have long been issues confronting human societies. This case-based examination of a wide range of natural resource disputes exposes readers to many contemporary examples that offer reasons for both hope and concern. The Rwandan genocide, the Sudanese civil war, and perpetual instability in the Middle East and Africa: each of these crises have arguably been instigated and maintained by natural resource disputes. China has undertaken a Herculean task to plant hundreds of millions of trees along its margins in an effort to save Beijing from crippling dust storms and halt the expansion of the Gobi desert. Will it work, and is it worth it? These and many other cases of conflict stemming from natural resource or environmental concerns are

explained and debated in this up-to-date examination of contemporary and ongoing topics. The book examines conflicts over precious resources and minerals, such as diamonds, oil, water, and fisheries, as well as the pursuit of lesser-known minerals like Coltan and other rare earth elements—important resources in our technological age—in remote locations such as Greenland and the Congo. Each topic contains an overview and two position essays from different authors, thereby providing the reader with highly informative and balanced perspectives. Reference entries accompany each topic as well, helping students to better understand each issue. As the world hurtles into the 21st century, these natural resource issues are becoming increasingly important, with all global citizens having a significant stake in how these conflicts arise and play out.

Criminology and Democratic Politics Tom Daems, Stefaan Pleysier, 2020-12-31 Criminology and Democratic Politics brings together a range of international leading experts to consider the relationship between criminology and democratic politics. How does criminology relate to democratic politics? What has been the impact of criminology on crime and justice? How can we make sense of the uses, non-uses, and abuses of criminology? Such questions are far from new, but in recent times they have moved to the centre of debate in criminology in different parts of the world. The chapters in Criminology and Democratic Politics aim to contribute to this global debate. Chapters cover a range of themes such as punishment, knowledge, and penal politics; crime, fear, and the media; democratic politics and the uses of criminological knowledge; and the public role of criminology. An accessible and compelling read, this book will appeal to students and scholars of criminology, sociology, and politics and all those interested in how criminology relates to democratic politics in modern times.
