The Routledge Companion to Linguistics in India Hemalatha Nagarajan, 2022-10-20 This companion offers a unique introductory study of linguistics in India. Well supplemented with sample problems and linguistic puzzles to bolster analytical skills and logical reasoning, it promotes a unique inquiry-based approach to learning linguistics. The volume looks at all the major subdisciplines of linguistics, including phonetics, phonology, morphology, semantics, syntax, and the interdisciplinary domains of psycholinguistics and neurolinguistics. It provides a wealth of data not only from many Indian languages belonging to the primary language families present in the country – Indo-Aryan, Dravidian, Austro-Asiatic, and Tibeto-Burman – but also from the endangered languages of the Tai-Kadai family of Assam and the Greater Andamanese family. The author gives a holistic view of the linguistic landscape of India and fills a significant gap in the study of the lesser-known languages of South Asia. This volume will be an excellent resource for students and researchers of Indian languages, cultural studies, South Asian studies, and all branches of linguistics.

Annotations in Scholarly Editions and Research Julia Nantke, Frederik Schlupkothen, 2020-10-26 The term ‘annotation’ is associated in the Humanities and Technical Sciences with different concepts that vary in coverage, application and direction but which also have instructive parallels. This publication mirrors the increasing cooperation that has been taking place between the two disciplines within the scope of the digitalization of the Humanities. It presents the results of an international conference on the concept of annotation that took place at the University of Wuppertal in February 2019. This publication reflects on different practices and associated concepts of annotation in an interdisciplinary perspective, puts them in relation to each other and attempts to systematize their commonalities and divergences. The following dynamic visualizations allow an interactive navigation within the volume based on keywords: Wordcloud  , Matrix  , Edge Bundling 

Embodiment in Cross-Linguistic Studies Iwona Kraska-Szlenk, 2019-02-11 Embodiment in Cross-Linguistic Studies: The ‘Head’ edited by Iwona Kraska-Szlenk adds to linguistic studies on embodied cognition and conceptualization while focusing on one body part term from a comparative perspective. The ‘head’ is investigated as a source domain for extending multiple concepts in various target domains accessed via metaphor or metonymy. The contributions in the volume provide comparative and case studies based on analyses of the first-hand data from languages representing all continents and diversified linguistic groups, including endangered languages of Africa, Australia and Americas. The book offers new reflections on the relationship between embodiment, cultural situatedness and universal tendencies of semantic change. The findings contribute to general research on metaphor, metonymy, and polysemy within a paradigm of cognitive linguistics.

The Evidential Basis of Linguistic Argumentation András Kertész, Csilla Rákosi, 2014-04-15 Currently, one of the methodological debates in linguistics focuses on the question of what kinds of data are allowed in different linguistic theories

and what subtypes of data can work as evidence for or against particular hypotheses. The first part of the volume puts forward a methodological framework called the 'p-model' that is expected to account for the data/evidence problem in linguistics. The aim of the case studies in the second part is to show how this framework can be applied to the everyday research practice of the working linguist, and how it can increase the effectiveness of linguistic theorising. Accordingly, the case studies exemplify that the p-model can come to grips with diverse object-scientific quandaries in syntax, semantics and pragmatics. The third part includes case studies that illustrate how it copes with metascientific issues such as inconsistency in linguistic theories and the relationship between thought experiments and real experiments.

Gender Acquisition in Spanish Jessica Diebowski, 2021-04-06 The comparative investigation of the acquisition of gender in Spanish by early and late bilinguals of different language combinations is highly debated and crucial as the phenomenon of gender involves grammatical features that differ in all three languages under investigation. Against this background, both early and late bilinguals face an arduous learning task which differs in complexity. Couched within a generative framework, the empirical study focuses on 257 participants with different levels of proficiency in Spanish ranging from low to advanced, and through a series of tests aims to discover which extra-linguistic and intra-linguistic factors act as triggers for non-native outcomes in adult heritage speakers and L2 learners. The observed morphological variability is argued not to stem from a representational (i.e. syntactic) deficit, but rather from a mapping problem in L2 learners and heritage speakers. Successful attainment in terms of gender is possible but dependent on the interplay between various extralinguistic and linguistic factors.

Evolution of Direct Discourse Marking from Classical to Late Latin Jana Mikulová, 2022-09-19 If you read a work by

Cicero or Seneca and then open *The Pilgrimage of Egeria*, Augustine, or Gregory of Tours, you will soon notice that Late Latin authors quote authorities differently. They provide a perfect example of synthesising two potentially conflicting traditions – “classical” and “biblical”. This book examines how the system of direct discourse marking developed over the centuries. It focuses on selecting marking means, presents the dynamics of change and suggests factors that might have been at play. The author guides the reader on the path that goes from the Classical prevalence of *inquit* to the Late innovative mix of marking words including the very classical *inquit*, an increased use of *dico*, the newly recruited *ait*, and *dicens*, influenced by biblical translations. The book suggests that Late authors tried to make reading and understanding easier by putting quotative words before quotations and increasing the use of redundant combinations (e.g. “he answered saying”).

Intonation Units Revisited Dagmar Barth-Weingarten, 2016-09-15 Intonation units have been notoriously difficult to identify in natural talk. Problems include fuzzy boundaries, lack of exhaustivity, and the potential circularity involved when studying their interface with other language-organizational dimensions. This volume advocates a way to resolve such problems: the ‘cesura’ approach. Cesuras, or breaks in the flow of talk, are created by discontinuities in the prosodic-phonetic parameters of speech that cluster to various extents at certain points in time. Using conversation-analytic and interactional-linguistic methodology, the volume identifies the parameters creating cesuras in talk-in-interaction and proposes ways to notate them depending on the researcher’s goal. It also offers a way to study the role of cesuras at the prosody-syntax interface non-circularly, which leads to new insights concerning language variation and change. The volume will thus be of major import to anyone working with natural spoken language, its chunks, its various dimensions, and its variation and change.
