*The Report: Philippines 2019* Oliver Cornock, The Philippines' cooling inflation, improved ease of doing business and increased openness to foreign participation are set to encourage more foreign direct investment. A wealth of infrastructure investment under President Rodrigo Duterte's flagship Build Build Build programme should ease congestion, reduce regional inequality and further boost the flourishing tourism industry.

*Asian Data Privacy Laws* Graham Greenleaf,2014-10-16 The first work to examine data privacy laws across Asia, covering all 26 countries and separate jurisdictions, and with in-depth analysis of the 14 which have specialised data privacy laws. Professor Greenleaf demonstrates the increasing world-wide significance of data privacy and the international context of the development of national data privacy laws as well as assessing the laws, their powers and their enforcement against international standards. The book also contains a web link to an update to mid-2017.

*Privacy and Data Protection Law in the Philippines* Leandro Angelo Y. Aguirre,Celine Melanie A. Dee,2022-11-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical guide to privacy and data protection law in the Philippines covers every aspect of the subject, including the protection of private life as a fundamental – constitutional – right, the application of international and/or regional conventions protecting the right to privacy, privacy rights in the context of electronic communications or at the workplace, and the protection of individuals regarding the processing of personal data relating to them. Following a general introduction about the country, the monograph assembles its information and guidance in two parts: (1) protection of privacy, including national case law regarding the protection of this fundamental right, specific legislation on the confidentiality of interpersonal communications, and sector-specific rules regarding privacy protection, such as privacy rights of employees, patients, consumers or celebrities; (2) personal data protection, including not only general rules on data quality, legitimate processing, data retention, data subject rights, security and accountability, but also specific provisions regarding the processing of health data or other sensitive personal information, further processing for research purposes, exemptions for law enforcement or national security purposes, and rules regarding liabilities, sanctions and redress.

*Courting Migrants* Katrina Burgess,2020-07-20 Migrants have, for some time, engaged in the politics of their homelands

from a distance, but, as this book argues, politicians are increasingly looking beyond their national boundaries for electoral and political support. While migrants rarely cast decisive votes in homeland elections, they are not marginal to homeland politics. *Courting Migrants* looks at how extraterritorial outreach by homeland states and parties alters the boundaries of political membership and intersects with migrant agency to transform politics at home. It addresses three specific questions: under what conditions and in what ways do homeland authorities reach out to migrants? How do these migrants respond? And, to what extent does their response affect homeland governance? Katrina Burgess argues that globalization and the spread of democracy since the 1970s have encouraged politicians in the Global South to reach out to migrants in search of economic resources, foreign policy support, and/or electoral advantage. They do so by cultivating feelings of loyalty that induce some kinds of migrant engagement while discouraging others. Whether or not these politicians succeed depends on where migrants are located, how many resources they have, what kinds of identities they value, and why they left their homeland in the first place. This interaction between outreach and engagement has implications, in turn, for how migrants are responding to the current wave of populism and authoritarianism around the globe. The book is based on in-depth research on state-migrant relations in four high-migration countries: Turkey, Dominican Republic, Philippines, and Mexico.

*Human Rights Responsibilities in the Digital Age* Jonathan Andrew,Frédéric Bernard,2021-08-26 This book examines the tangled responsibilities of states, companies, and individuals surrounding human rights in the digital age. Digital technologies have a huge impact – for better and worse – on human lives; while they can clearly enhance some human rights, they also facilitate a wide range of violations. States are expected to implement efficient measures against powerful private companies, but, at the same time, they are drawn to technologies that extend their own control over citizens. Tech companies are increasingly asked to prevent violations committed online by their users, yet many of their business models depend on the accumulation and exploitation of users' personal data. While civil society has a crucial part to play in upholding human rights, it is also the case that individuals harm other individuals online. All three stakeholders need to ensure that technology does not provoke the disintegration of human rights. Bringing together experts from a range of disciplines, including law, international relations, and journalism, this book provides a detailed analysis of the impact of digital technologies on human rights, which will be of interest to academics, research students and professionals concerned by this issue.

*Violence at Sea* Peter Lehr,2006-11-02 *Violence at Sea* is an overview of maritime piracy, examining threats that piracy poses to global security and commerce, as well as measures and policies to mitigate the threat. The essays analyze piracy activities in key shipping lanes (including the African coast, the Arabian Sea, the Bay of Bengal, and the Straits of Malacca-South China Sea); piratical groups and their capabilities; case studies on overlaps between piracy, terrorism, and organized crime; legal and policy hurdles to combating piracy; tactical recommendations for combating piracy; and new trends and

developments in the area. The counter response to maritime terrorism has been slow in coming, hampered by issues rooted in sovereignty, the laws of the sea, and the inherent challenges of international coordination. Yet given the likelihood that threats posed by piracy will not recede, but rather increase, all actors affected by maritime security will, sooner or later, need to address these challenges.

**Guide to Biometrics** Ruud M. Bolle,Jonathan H. Connell,Sharath Pankanti,Nalini K. Ratha,Andrew W. Senior,2013-06-29 Starting with fingerprints more than a hundred years ago, there has been ongoing research in biometrics. Within the last forty years face and speaker recognition have emerged as research topics. However, as recently as a decade ago, biometrics itself did not exist as an independent field. Each of the biometric-related topics grew out of different disciplines. For example, the study of fingerprints came from forensics and pattern recognition, speaker recognition evolved from signal processing, the beginnings of face recognition were in computer vision, and privacy concerns arose from the public policy arena. One of the challenges of any new field is to state what the core ideas are that define the field in order to provide a research agenda for the field and identify key research problems. Biometrics has been grappling with this challenge since the late 1990s. With the maturation of biometrics, the separate biometrics areas are coalescing into the new discipline of biometrics. The establishment of biometrics as a recognized field of inquiry allows the research community to identify problems that are common to biometrics in general. It is this identification of common problems that will define biometrics as a field and allow for broad advancement.
