A Comprehensive Guide to Geriatric Rehabilitation E-Book Timothy L. Kauffman, Ronald W. Scott, John O. Barr, Michael L. Moran, 2014-09-05 Now in its third edition, this trusted clinical guide enables both the busy practitioner and student to review or to learn about a range of pathologies, conditions, examinations, diagnostic procedures, and interventions that can be effectively used in the physical rehabilitation of older people. It presents a broad overview of age-related physiological changes as well as specific professional discipline perspectives. Organized into eleven distinct and interrelated units, the first unit begins with key anatomical and physiological considerations seen with aging which have significant impact on the older person. The second and third units go on to review important aging-related conditions and disorders of the musculoskeletal and neuromuscular/neurological systems respectively. Neoplasms commonly encountered in older people are the focus of the fourth unit; while aging-related conditions of the cardiovascular, pulmonary, integumentary and sensory systems are presented in units five through seven. Unit eight highlights a range of specific clinical problems and conditions commonly encountered with older patients. Critically, all of these units emphasize important examination and diagnostic procedures needed for a thorough evaluation and stress interventions that can be of significant benefit to the older patient. The ninth unit presents select physical therapeutic interventions that are especially important in managing rehabilitative care. Key societal issues related to aging are discussed in the tenth unit. Finally, the concluding eleventh unit focuses on the successful rehabilitation team that includes both professional and non-professional caregiver members. - A trusted guide to the conditions and problems faced when evaluating and treating geriatric patients - Extensive coverage over 84 chapters, each written by an expert in the field - Includes imaging, vision and the aging ear - Cross-referenced - providing the complexity and inter-relatedness of co-morbidities common to aging patients - Collaborative international perspective - Chapters on the aging spine; frailty; safe pilates for bone health; health care for older people - Additional renowned editor - Ronald W. Scott - Revised title to reflect the comprehensive scope of content covered (previously entitled Geriatric Rehabilitation Manual)

Textbook of Veterinary Physiology Pradip Kumar Das, Veerasamy Sejian, Joydip Mukherjee, Dipak Banerjee, 2023-08-31 This textbook explores the fundamental qualitative and quantitative aspects of veterinary physiology. It presents the morphological description of the organs, tissues, and cells involved in the physiological system with species variation. The book provides the most up-to-date information and in-depth knowledge in animal physiology. The book addresses a broad

range of topics, including the physiology of digestion in, monogastric animals, ruminants, and birds, and cardio vascular and respiratory system in different animals. The chapters contain a wealth of information on the areas related to the endocrine system, excretory system, body fluid homeostasis, hematology, male and female reproductive systems, coordination of body functions, and regulation of brain functions and sense organs. Further, this book acquaints students with advanced topics like immune system, assisted reproductive technology, ovarian dynamics, environmental physiology and thermoregulation, and behavioral physiology. This textbook contains clear illustrations including graphical abstracts and study questions for each chapter making this book a valuable learning resource for veterinary sciences and veterinary medicine students. Further to attract students and create interest in them, interesting facts related to animal physiology have also been highlighted in form of “Know more widges”.

Reproductive Toxicology, Second Edition J Witorsch Raphael, 1995-06-30 Presents not only the major principles and current issues in the field but also provides a physiologic basis for the actions and reactions to reproductive toxic agents. The volume is divided into three sections. The first focuses on the current concepts of normal mammalian reproductive function from the systems to subcellular level. The second explains how toxic substances disrupt the normal functioning of elements of the mammalian reproductive system. The third section discusses other issues of long-standing or recent interest to the field, such as clinical aspects, epidemiology, and the toxic effects of low-energy electromagnetic fields and tobacco, alcohol, and other substances of abuse. Biochemistry of Women A.S Curry, 2018-05-04 This book concerns the clinical chemistry of women from conception to the grave. It concerns their medical problems and the laboratories role in elucidating these and in monitoring treatment. The book represents the current state of the art and although in many areas there are sometimes widely divergent opinions, it is good that these should be aired so that problem areas can be revealed and opinions revised when further experimental work is done as a consequence.
