Many Hands Make a Farm Jack Kittredge, Julie Rawson, 2023-11-16 From Northeast Organic Farmers Lifetime Achievement Award: Jack Kittredge and Julie Rawson In this heartfelt and unflinching memoir, two activists recount the nearly half century they've spent questioning authority while raising a family, building a self-reliant community, starting an organic farm, leading a farming organization, and experiencing the struggles and joys of living a purposeful life. Many Hands Make a Farm traces the journey of organic farming pioneers Julie Rawson and Jack Kittredge from their early years of bright-eyed excitement, through the long slog for economic stability, to the formation of a thriving community and a growing natural farming movement. Along the way, they established relationships with farming leaders across the country during the creation of the National Organic Program. Julie and Jack met while working as community organizers in Boston. After falling in love and starting a family, they decided to use Jack's irregular earnings as a board game designer to support a move to a rural area where they could grow healthy food and earn their living at home, so they could be present for their four children. What began as a family homestead soon grew into the small, diversified Many Hands Organic Farm. Julie and Jack have intentionally chosen to live their lives differently than the mainstream, prioritizing minimizing energy use, raising food organically, not relying on credit, favoring natural health care, participating in the arts, working creatively, and instilling the values of hard work and responsibility in their children. In a time when society at large was "going along to get along," Julie and Jack stood out as leaders and iconoclasts. They believe that taking risks and making bold decisions can unlock one's potential and lead to actions that enrich the spirit, the family, and the community. Many Hands Make a Farm will resonate with fans of original thinkers from Henry David Thoreau and Wendell Berry to Lynn Margulis and Adelle Davis. The book strongly conveys the message of finding roots in a community, respecting the Earth, and combining social justice work with the joys and challenges of raising a family. These themes shine through on every page, making this memoir a must-read for anyone seeking inspiration and guidance on finding meaning in their life. Told in complementary, alternating narratives between husband and wife, this informative and heartfelt memoir is uplifting from start to finish.—Booklist

Optical Fiber Sensor Technology L.S. Grattan,B.T. Meggitt,2013-03-09 Environmental and chemical sensors in optical fiber sensor technology The nature of the environment in which we live and work, and the precarious state of many aspects of the natural environment, has been a major lesson for scientists over the last few decades. Public awareness of the issues involved is high, and often coupled with a scepticism of the ability of the scientist and engineer to provide an adequate, or even rapid solution to the preservation of the environment before further damage is done, and to achieve this with a minimum of expenditure. Monitoring of the various aspects of the environment, whether it be external or internal to ourselves and involving chemical, physical or biomedical parameters is an essential process for the well-being of mankind and of the individual. Legislative requirements set new standards for measurement and control all around us, which must be met by the most appropriate of the technologies available, commensurate with the costs involved. Optical fiber sensor technology has a major part to play in this process, both to complement existing technologies and to promote new solutions to difficult measurement issues. The developments in new sources and detectors covering wider ranges of the electromagnetic spectrum, with higher sensitivity, allow the use of techniques that some time ago would have been considered inappropriate or lacking in sufficient sensitivity.

Design for Life Stuart Walker,2017-04-21 Stuart Walker's design work has been described as life-changing, inspiring, disturbing and ferocious. Drawing on an extraordinarily diverse range of sources and informed by creative practice, *Design*

for Life penetrates to the heart of modern culture and the malaise that underlies today's moral and environmental crises. The author argues that this malaise is deep-seated and fundamental to the modern outlook. He shows how our preoccupation with technological progress, growth and the future has produced a constricted view of life – one that is both destructive and self-reinforcing. Based on over twenty-five years of scholarship and creative practice, he demonstrates the vital importance of solitude, contemplation, inner growth and the present moment in developing a different course – one that looks squarely at our current, precarious situation while offering a positive, hopeful way forward – a way that is compassionate, context-based, human scale, ethically motivated and critically creative. *Design for Life* is an intensely original contribution that will be essential reading for design practitioners and students. Written in a clear, accessible style, it will also appeal to a broader readership, especially anyone who is concerned with contemporary society's rising inequalities and environmental failings and is looking for a more constructive, balanced and thoughtful direction.
