Alberto Manguel, Gianni Guadalupi

The Real Atlantis-In the Eye of the Sahara Martin K. Ettington, There have been many books and movies about whether Atlantis really existed and where it was located. Now we have a new candidate location which meets the criteria established by Plato much better than any of the other candidates. A location which is the exact same size as the fabled city and is located by more than one ancient source. The story of the Eye of the Sahara is truly amazing and once you read it you will become convinced like I am of this logically being the real location of the mythical city of Atlantis. There are even ancient maps which show the location of Atlantis to be in the area of this Eye of the Sahara Lots of history and related information in this study of where Atlantis was really located.

The Destruction of Civilization about 10,500 B.C. Martin K. Ettington, There is much of human history which we don't know due to lost records, the oceans covering our ancestor's cities, natural disasters, and reasons we don't know. There are also many anomalies which have been found showing ruins and objects from the far past which should not exist. Some of the Historical Facts this book is based on: Plato said that Atlantis was destroyed 9,000 years before his time in Greece. Plato lived in 433 B.C. which would have meant Atlantis was destroyed 9,433 years B.C. or 11,433 years before the current age. The Younger Dryas Period in History was between roughly 12,900 and 11,600 years ago according to paleontologists and archeologists. Many researchers think this period of climate change resulted from comets hitting the Earth at this time. The Vulture Stone at Gobekli Tepe which some scientists have interpreted as having a record of comets hitting the Earth about 11,000 B.C. My study on ancient history has led me to write a number of books on the topic which can be found on my website at this link: <https://mkettingtonbooks.com/ancient-history.html> The above facts and all of my research has led me to conclude that there were ancient world spanning civilizations which existed and were destroyed on the Earth in the 9,000 B.C. to 11,000 B.C period. There may have been earlier civilizations too, but the focus of this book is on that time period. The following chapters review some of the evidence of these ancient civilizations which existed at these same very ancient times.

Comics and Archaeology Zena Kamash,Katy Soar,Leen Van Broeck,2022-10-06 This book adds to the scant academic literature investigating how comics transmit knowledge of the past and how this refraction of the past shapes our

understanding of society and politics in sometimes damaging ways. The volume comes at these questions from a specifically archaeological perspective, foregrounding the representation and narrative use of material cultures. It fulfils its objectives through three reception studies in the first part of the volume and three chapters by comic creators in the second part. All six chapters aim to grapple with a set of central questions about the power inherent in drawn images of various kinds.

A Companion to Magical Realism Stephen M. Hart, Wen-chin Ouyang, 2005 The Companion to Magical Realism provides an assessment of the world-wide impact of a movement which was incubated in Germany, flourished in Latin America and then spread to the rest of the world. It provides a set of up-to-date assessments of the work of writers traditionally associated with magical realism such as Gabriel Garcia Marquez in particular his recently published memoirs], Alejo Carpentier, Miguel Angel Asturias, Juan Rulfo, Isabel Allende, Laura Esquivel and Salman Rushdie, as well as bringing into the fold new authors such as W.B. Yeats, Seamus Heaney, Jos Saramago, Dorit Rabinyan, Ovid, Mar a Luisa Bombal, Ibrahim al-Kawni, Mayra Montero, Nakagami Kenji, Jos Eustasio Rivera and Elias Khoury, discussed for the first time in the context of magical realism. Written in a jargon-free style, and with all quotations translated into English, this book offers a refreshing new interdisciplinary slant on magical realism as an international literary phenomenon emerging from the trauma of colonial dispossession. The companion also has a Guide to Further Reading. Stephen Hart is Professor of Hispanic Studies, University College London and Doctor Honoris Causa of the Universidad Nacional Mayor de San Marcos, Lima, Peru. Wen-chin Ouyang lectures in Arabic Literature and Comparative Literature at the School of Oriental and African Studies, London. CONTRIBUTORS: Jonathan Allison, Michael Berkowitz, John D. Invader Moon Rob Shelsky, 2016-02-23 A UFO investigator presents a provocative theory about how the moon got here, who brought it here, and why—with fascinating historical evidence! Was the moon always in our skies? UFO investigator Rob Shelsky doesn't think so. In *Invader Moon* he reveals the secret history of a time before the moon, its dramatic arrival, and its momentous impact on Earth's civilizations. Shelsky contends that there were two distinct civilizations on our planet—ours, and one before ours. He goes on to suggest that the earlier civilization did not originate on Earth. When it arrived here, it brought the moon along with it. Offering more than mere conjecture, Shelsky supports his theory with physical and archeological evidence, historical records, and oral histories from around the world.

My Incredible Paranormal, Spiritual, and Out of the Box Experiences Martin K. Ettington, Many of my friends who know me well and know some of my experiences insist I should write an autobiography because many people will find my stories fascinating. My life has been about my spiritual, and paranormal explorations of the world, and studies of our universe. These views are discussed in over one hundred books; which is detailed near the end of this autobiography. These stories include a spirit attacking me, many prophecies of mine—some of which saved my life. Also a fight with a bear in the wilderness and many other strange experiences which includes a spiritual enlightenment event, and specific memories from before my birth during, and just after it. My education as an engineer at a top school has also led me to an analytical point of view about the world; but I've also remained open to new and “impossible” experiences without denying that they really happened. This has led me to a pretty unique point of view as a writer about many “out of the box” subjects which some professionals condemn as illusionary—but many individuals really experience. The experiences of my life in this book should also give you a good idea of the circumstances which created the person I am today, and why I write the books that I do. I've grouped my major life experiences mostly sequentially, but some things which took place over longer periods of time are grouped together. So there is some overlap in different chapters of my life. But you can see how all these topics blend together.
