Global Politics Roni Kay M. O'Dell, Sasha Breger Bush, 2020-12-30 Global Politics: A Toolkit for Learners is an innovative and exciting new learner-centered approach to the study of international relations. Leveraging decades of in-class teaching and learning experiences, authors Roni Kay M. O'Dell and Sasha Breger Bush have developed evidence-based teaching and learning practices which support a scaffolded, skills-oriented approach. Each chapter introduces historical documents from key political events, important concepts and the techniques learners need to independently and actively engage with primary sources. Readers are encouraged to develop a personal connection with global issues, to consider matters of justice, freedom and equality, and to think critically about possibilities for social transformation in the global arena.

An Introduction to Philosophy Steven B. Sherman, Richard A. Holland, Gary S. Osmundsen, Peter J. Rasor, 2025-03-18 Designed for students in Christian colleges and seminaries, An Introduction to Philosophy surveys the four main areas of philosophy - logic, metaphysics, epistemology, and ethics - in an accessible and engaging manner. Yet it also covers important topics sometimes left unaddressed in introductions, including: why philosophy matters in our day critical thinking and intellectual virtue a brief history of philosophy philosophical hermeneutics the relationship between philosophy, faith, and worldview religious epistemology bioethics, sexual ethics, other types of ethics a Christian philosophy of life Grounded in the Christian intellectual tradition, each chapter in An Introduction to Philosophy includes student-friendly features such as chapter summaries, explanatory sidebars, reflection questions, vocabulary words and definitions, and suggestions for further reading. Professors and students will find it to be a broad and useful overview, perfect for undergraduate and seminary students alike.

Individuals as Producers of Their Own Development Richard M. Lerner, 2021-03-30 In the World Library of Psychologists series, international experts present career-long collections of what they judge to be their most interesting publications—extracts from books, key articles, research findings, and practical and theoretical contributions. Professor Richard M. Lerner has been prominent in the application of developmental science across the life span for half a century, investigating dynamic, relational development systems, and their potential impact on positive youth development (PYD) and social justice. In this collection, Professor Lerner presents the development of his theory of, and research about, relations between life-span human development and contextual or ecological change, exploring the mutually influential relations between humans and their peer, family, school, and community contexts. Including a specially written introduction, in which Professor Lerner reflects on the importance of mentorship and contextualises both the field and the evolution of his wide-ranging career, this collection will be a valuable resource for students and researchers of developmental psychology.

On Reasoning and Argument David Hitchcock, 2017-04-06 This book brings together in one place David Hitchcock's most significant published articles on reasoning and argument. In seven new chapters he updates his thinking in the light of subsequent scholarship. Collectively, the papers articulate a distinctive position in the philosophy of argumentation. Among other things, the author: • develops an account of "material consequence" that permits evaluation of inferences without problematic postulation of unstated premises. • updates his recursive definition of argument that accommodates chaining and embedding of arguments and allows any type of illocutionary act to be a conclusion. • advances a general theory of relevance. • provides comprehensive frameworks for evaluating inferences in reasoning by analogy, means-end reasoning, and appeals to considerations or criteria. • argues that none of the forms of arguing ad hominem is a fallacy. • describes proven methods of teaching critical thinking effectively.

The Routledge Handbook of Social Change Richard Ballard, Clive Barnett, 2022-09-30 The Routledge Handbook of Social Change provides an interdisciplinary primer to the intellectual approaches that hold the key to understanding the complexity of social change in the twenty-first century. We live in a world of intense social transformation, economic uncertainty, cultural innovations, and political turmoil. Established understandings of issues of well-being, development, democratisation, progress, and sustainability are being rethought both in academic scholarship and through everyday practice, organisation and mobilisation. The contributors to this handbook provide state-of-the-art introductions to current thinking on central conceptual and methodological approaches to the analysis of the transformations shaping economies,

politics, and societies. Topics covered include social movements, NGOs, the changing nature of the state, environmental politics, human rights, anti-globalism, pandemic emergencies, post-Brexit politics, the politics of resilience, new technologies, and the proliferation of progressive and reactionary forms of identity politics. Drawing on disciplines including anthropology, human geography, political sociology, and development studies, this is a comprehensive and authoritative introduction to researching key issues raised by the challenge of making sense of the twenty-first century futures.

Thinking from Things Alison Wylie, 2002-11-13 In this long-awaited compendium of new and newly revised essays, Alison Wylie explores how archaeologists know what they know. Examining the history and methodology of Anglo-American archaeology, Wylie puts the tumultuous debates of the last thirty years in historical and philosophical perspective.

Legal Reasoning Martin P. Golding, 2001-03-02 In a book that is a blend of text and readings, Martin P. Golding explores legal reasoning from a variety of angles—including that of judicial psychology. The primary focus, however, is on the 'logic' of judicial decision making. How do judges justify their decisions? What sort of arguments do they use? In what ways do they rely on legal precedent? Golding includes a wide variety of cases, as well as a brief bibliographic essay (updated for this Broadview Encore Edition).
