web these are notes for the lecture  
course differential geometry i given by  
the second author at eth zurich h in the  
fall semester 2017 they are based on a  
lecture course<sup>1</sup> given by the first author  
at the university of wisconsin madison  
in the fall semester 1983 one can  
distinguish extrinsic differential  
geometry and intrinsic differential  
geometry

manifolds and tangent bundles as  
taught e g in the differential geometry i  
course during the fall semester 2015  
contents in this course we will define  
riemannian metrics on smooth  
manifolds and use them to study  
geodesics we also study derivatives of  
vector fields with respect to each other  
leading to the notion of connection
