web some points to remember when
solving fluid pressure problems the
pressure due to the fluid always acts
perpendicular the surface a particle
underwater will feel the same pressure
from all directions pressure increases
linearly with depth $p = \rho g h$ $p = \rho g h$
assumes a constant density and thus is
valid only for incompressible

statics is the field of physics that
involves the study of fluids at rest
because these fluids are not in motion
that means they have achieved a stable
equilibrium state so fluid statics is
largely about understanding these fluid
equilibrium conditions when focusing
on incompressible fluids such as liquids
as
