Disable some controls on a form based on a condition Sep 13, 2021 · I have a form that have several controls on it. I want to disable some of them when the user doesn't have complete authority to them. But when I run the code it says, "Object doesn't support this property or method". I don't know what my fault is. ... [How to Disable All Input Controls Inside a Form Using jQuery](#) You can use the jQuery prop() method in combination with the :input selector to disable all ,
