Diagnóstico de motores diesel mediante el análisis del aceite usado Bernardo Tormos Martínez,2005 El objetivo de la serie de monografías TEMAS AVANZADOS EN MOTORES DE COMBUSTIÓN INTERNA es construir una aportación a la literatura técnica en lengua castellana en este campo. Se ha intentado que el contenido de la serie sea un fiel reflejo de los últimos desarrollos científicos y tecnológicos en el campo de los motores térmicos, tanto en lo que se refiere a nuevos conceptos y desarrollos como a la mejor comprensión de los fenómenos básicos que determinan el funcionamiento del motor, bien mediante el uso de técnicas experimentales avanzadas, bien mediante el desarrollo y utilización de modelos. Las monografías se dirigen tanto a investigadores que trabajen en la Universidad o en la Industria, como a profesionales de la automoción.

Governing Climate Change Jolene Lin,2018-06-21 Cities are no longer just places to live in. They are significant actors on the global stage, and nowhere is this trend more prominent than in the world of transnational climate change governance (TCCG). Through transnational networks that form links between cities, states, international organizations, corporations, and civil society, cities are developing and implementing norms, practices, and voluntary standards across national boundaries. In introducing cities as transnational lawmakers, Jolene Lin provides an exciting new perspective on climate change law and policy, offering novel insights about the reconfiguration of the state and the nature of international lawmaking as the involvement of cities in TCCG blurs the public/private divide and the traditional strictures of 'domestic' versus 'international'. This illuminating book should be read by anyone interested in understanding how cities - in many cases, more than the countries in which they're located - are addressing the causes and consequences of climate change.
