Teens Choosing to Read Gay Ivey,Peter Johnston,2023 In a sea of troubling reporting about education, teaching, reading, and the wellbeing of teens, Ivey and Johnston bring some good news that shows what happens when we stop underestimating young people. This accessible book offers an engaging account of a 4-year study of adolescents who went from reluctant to enthusiastic readers. These youth reported that reading not only helped them manage their stress, but also helped them negotiate happier, more meaningful lives. This amazing transformation occurred when their teachers simply allowed them to select their own books, invited them to read, with no strings attached, and provided time for them to do so. These students, nearly all of whom reported a previously negative relationship with reading, began to read voraciously inside and outside of

school; performed better on state tests; and transformed their personal, relational, emotional, and moral lives in the process. This illuminating book leads readers on a tour of adolescents' reading lives in their own words, offering a long-overdue analysis of students' deep engagement with literature. The text also includes research to inform arguments about what students should and should not read and the consequences of limiting students' access to the books that interest them through censorship. Book Features: Links young adults' reading engagement with socio-emotional and intellectual development. Provides nuanced descriptions of teaching practices that facilitate student agency in learning. Features student voices that have been absent in debates about what is appropriate for young people to read and under what circumstances. Connects student perspectives on reading, with positive outcomes of reading, to research from other disciplines. Illuminates the breadth and depth of the responsibilities of teaching English language arts.

Faith in Reading David Paul Nord, 2004-08-19 In the twenty-first century, mass media corporations are often seen as profit-hungry money machines. It was a different world in the early days of mass communication in America. Faith in Reading tells the remarkable story of the noncommercial religious origins of our modern media culture. In the early nineteenth century, a few visionary entrepreneurs decided the time was right to reach everyone in America through the medium of print. Though they were modern businessmen, their publishing enterprises were not commercial businesses but nonprofit societies committed to the publication of traditional religious texts. Drawing on organizational reports and archival sources, David Paul Nord shows how the managers of Bible and religious tract societies made themselves into large-scale manufacturers and distributors of print. These organizations believed it was possible to place the same printed message into the hands of every

man, woman, and child in America. Employing modern printing technologies and business methods, they were remarkably successful, churning out millions of Bibles, tracts, religious books, and periodicals. They mounted massive campaigns to make books cheap and plentiful by turning them into modern, mass-produced consumer goods. Nord demonstrates how religious publishers learned to work against the flow of ordinary commerce. They believed that reading was too important to be left to the market revolution, so they turned the market on its head, seeking to deliver their product to everyone, regardless of ability or even desire to buy. Wedding modern technology and national organization to a traditional faith in reading, these publishing societies imagined and then invented mass media in America.

Are They Really Reading? Jodi Crum Marshall, 2002 All too often the poorest readers learn that if they keep quiet during sustained silent reading (SSR), they're doing okay--no reading required. This is especially true in middle school where class sizes are large and instructional emphasis is on content rather than reading. In *Are They Really Reading?*, Jodi Crum Marshall discusses how to find out if your students are using SSR time wisely and what to do about it if they're not. Her book describes how to support middle-grade readers who need it the most, while embracing a research-proven need to increase independent, self-selected reading time for students. Jodi shares lessons and anecdotes from her classroom and from her experience as a reading specialist implementing her model schoolwide. She expands the traditional concepts of SSR to include read-alouds, writing, and accountability to scaffold struggling middle-grade students. Bolstered by these additional supports, Jodi's students dramatically increased their interest and ability in reading through a program they named Supporting Student Literacy (SSL). Classroom teachers will appreciate the clear direction on how and why to implement an SSR program. Administrators will appreciate the guidance for establishing a schoolwide literacy block that substantially improves student motivation and learning. *Are They Really Reading?* answers the following important questions: Why should I start an SSR program? How do I build a classroom library? Where do I get funding for books and other materials? How do I prepare the students for SSR? How do I motivate students to read? What is the role of the teacher? How do I assess SSR? If you don't currently use a sustained silent reading program, this book will help you get started on the right track. If you worry that some of your students aren't really reading during SSR or if you want to enhance your program, here is a roadmap that is instructionally sound and flexible enough to fit your students' needs.
