Encyclopedia of Twentieth Century Architecture R. Stephen Sennott,2004 For more information including the introduction, a full list of entries and contributors, a generous selection of sample pages and more, visit the Encyclopedia of 20th Century Architecture website. Focusing on architecture from all regions of the world, this three-volume set profiles the twentieth century's vast chronicle of architectural achievements, both within and well beyond the theoretical confines of modernism. Unlike existing works, this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types, movements, styles, and building practices across traditional geographic and cultural boundaries.

Roma. Dal Rinascimento ai giorni nostri Vittorio Sgarbi,2022-12-13T00:00:00+01:00 Ci sono luoghi che attraversiamo quotidianamente nelle nostre città e che nella fretta di una meta da raggiungere manchiamo di cogliere. Roma è piena di queste occasioni di bellezza: dai palazzi rinascimentali, attraverso la grande stagione del Barocco, alle architetture avveniristiche di questo secolo, tra chiese, fontane, piazze e musei, luoghi celebri e sorprese da scoprire. Vittorio Sgarbi compie una ricognizione totale delle bellezze architettoniche di Roma, suggerisce al lettore una serie di itinerari d'autore per orientarsi tra queste meraviglie e compone un'opera straordinaria per la quantità di edifici e autori citati. Con oltre 650 schede di autori e 1500 opere segnalate, questo libro è una guida alle architetture della capitale e uno strumento prezioso di conoscenza della storia artistica della città, che guarda al suo passato ma anche ai nuovi progetti in corso di realizzazione. A turisti e abitanti di Roma non resta altro che alzare gli occhi e, fosse anche solo per pochi secondi, fermarsi a godere con consapevolezza le mirabilia della città eterna.

Teorie figure architetti del Modernocontemporaneo Aa.Vv.,2012-02-03T00:00:00+01:00 La pubblicazione di questo volume segue a distanza di cinque anni l'uscita della raccolta di scritti in onore di Ludovico Quaroni intitolata "Modernocontemporaneo". Allora il titolo costituiva non più che un'ipotesi di lavoro che si è rivelata ricca di potenzialità e di possibili linee di ricerca. L'anno successivo decidemmo di invitare alcuni studiosi amici e colleghi, anche di altre discipline, a confrontarsi con le nostre tesi, ne uscì un volumetto di "scritti ulteriori" denso di riflessioni e di critiche. Ora abbiamo avvertito la necessità di riprendere l'argomento e tentare di portare a sintesi alcune dei temi lanciati e emersi nei volumi precedenti e nel dibattito che hanno suscitato. Più volte ci siamo trovati a spiegare le motivazioni dell'uso di questa parola "modernocontemporaneo". Più volte, declinandola in maniera soggettiva, abbiamo posto l'accento sui valori della continuità che tengono insieme le espressioni contemporanee più alte e sostanziate delle arti visive e nello specifico dell'architettura, all'esperienza delle avanguardie storiche, del movimento moderno, e della modernità tutta. L'obiettivo è inquadrare e valutare la produzione attuale di maggiore riconoscibilità e presenza sulla scena internazionale, che oggi possiamo ritenere storicizzata, nel rapporto con le proprie radici e con l'individuazione di possibili linee di ricerca future. La storia dell'architettura è stata la fonte primaria dell'apprendimento della disciplina finché i materiali della storia e quelli del presente sono rimasti sufficientemente omogenei; oggi è urgente reinventare modi alternativi creativi e non elusivi di misurarsi di nuovo se non con la storia, con le proprie radici.

Storia dell'architettura contemporanea II Marco Biraghi,2023

Post-Western Histories of Architecture Pilar Maria Guerrieri,Marco Biraghi,2023-06-23 This book seeks to provide an alternative post-Western perspective to the history of contemporary architecture. It puts forward detailed critical analyses of various areas of the world, including Europe, Latin America, Africa, China, Australia, India and Japan, where particular movements of architecture have developed as active 'political acts'. The authors focus on a broad spectrum of countries, architectures and architects that have developed a design approach closely linked to the building context. The concept of context is broad and includes various economic, social, cultural, political and natural aspects. In all cases, the architects selected in this book have chosen to view context as an opportunity. However, each architect has considered certain specific aspects of context: some have been very attentive to the social context, others to material aspects or typological issues, and

still others to aspects related to political visions or economic factors. The analysis critically highlights interesting, creative and respectful design approaches towards local conditions, such as sustainability in Nordic Europe, climate-conscious design in Africa, and the 'bottom-up' sensitivity of India. The book's main aim is to retrace, through both theoretical arguments and case studies, the debate that focuses on politics and the environment. Thanks to its valuable examples, this book strives to make a conscious contribution to establishing a bulwark against the current 'flattening-out' processes that architecture is experiencing. This book will be of relevance to researchers, teachers and students interested in the history of architecture, architecture and planning, and postcolonial studies.

New Frontiers of Construction Management Marco Alvisè Bragadin, Kalle Kähkönen, Emlyn Witt, 2025-06-02 This book comprises the select proceedings of the 3rd Construction Management Workshop (CMW 24), New Frontiers of Construction Management, held in Ravenna, Italy on November 7-8, 2024. It highlights key research topics that could be drivers of change and innovation in the management of the construction and building processes in its various stages, including design, construction, operation and maintenance, disposal and reuse. It represents a contribution to the debate and an introduction to new methods and tools addressing building production and management. The contributions focus on the use of methodologies for Construction Project Management, especially those that have witnessed recent developments because of the digitalization of building processes, the use of Artificial Intelligence and the search for environmental sustainability. Topics include AI and Digitalization of building processes, Building Information Modelling and Built Heritage, Construction Project Management and Lean Construction, Off-site Construction, Occupational Health and Safety management, Environmental impacts, Circular Economy, Low carbon, Life Cycle Assessment in construction projects.

Digital Modernism Heritage Lexicon Cristiana Bartolomei, Alfonso Ippolito, Simone Helena Tanoue Vizioli, 2021-08-11 The book investigates the theme of Modernism (1920-1960 and its epigones) as an integral part of tangible and intangible cultural heritage which contains the result of a whole range of disciplines whose aim is to identify, document and preserve the memory of the past and the value of the future. Including several chapters, it contains research results relating to cultural heritage, more specifically Modernism, and current digital technologies. This makes it possible to record and evaluate the changes that both undergo: the first one, from a material point of view, the second one from the research point of view, which integrates the traditional approach with an innovative one. The purpose of the publication is to show the most recent studies on the modernist lexicon 100 years after its birth, moving through different fields of cultural heritage: from different forms of art to architecture, from design to engineering, from literature to history, representation and restoration.

The book appeals to scholars and professionals who are involved in the process of understanding, reading and comprehension the transformation that the places have undergone within the period under examination. It will certainly foster the international exchange of knowledge that characterized Modernism
