Guitar Tablature Functionality in Cubase 14 new Score Editor Feb 20, 2025 · The release notes for Cubase 14 contains a paragraph about the new score editor, and there is background information on the developer's blog. Note that this new editor is still missing MusicXML import within Cubase, but the release notes say it "will be implemented in the future". In addition, there is a completely free version of Dorico SE that you could also check out. *Putting a 22-fret neck on a body designed for 21 (Strat content)* Theoretically, it sounds like it should work without making major structural changes to the guitar and/or experiencing intonation issues, but I would like to ask here before considering putting theory into practice . **I tried every NAM profile on Tonehunt to find the best... so you ...** These are all good choices. This has been said a lot but I found that the cab made more difference than the capture. For example - you suggested several different fender variants. With similar gain settings I heard and felt more differences when flipping between the bassman, Oxford 112, and cream back cabs than I did swapping the captures. **The best small, lightweight FRFR cabs for modeling** You want a small speaker that is lightweight but has a flatish response in the guitar range and enough SPL for your task. Whether it is marketed as an FRFR, PA speaker or monitor makes no real difference. **Connecting AeroBand "guitar" as a USB controller** May 23, 2024 · ...Yes, I know. My friend (who is an experienced guitar player, by the way) has purchased this controller to experiment with Halion guitar sounds and explore the possibilities. I tried to help him make the connection but failed. I was hoping on a plug and play but no such luck. I watched videos on YouTube that connect other devices via external instrument in the device ... **The Gear Page** The Gear Page is the leading online community and marketplace for guitars, amps, pedals, effects and associated gear. *8 vs 16 ohms (Marshall content) - The Gear Page* Is there any major discernable difference between running a particular guitar amplifier at 8 ohms or 16 ohms? Is it a larger factor when using the amp into a 4x12 cab vs a 2x12 cab? Mono vs stereo, etc.? I have a single channel early '80s Marshall JCM 800. I've always run it at 16 ohms, sometimes into a mismatched 4x12 cab. *Opinions: Gibson Midtown Standard - The Gear Page* The Midtown is more of a thinline style guitar, in that the body is a routed out mahogany slab, and the maple top is a flat solid piece. The tone is closer to a Les Paul than a 335 for that reason. A 335 style is all laminate construction with a solid center block. The top/back are pressed laminates and the sides are bent. *James Hetfield Live Rig Pictures and Settings 1984-1993* I guess the pictures were taken by roadies or guitar techs, but I am not certain about that. However, since we have them, I guess it

doesn't matter after all Even though I found all of the pictures on different forums and so on, all the gear listed is searched out by me and it sure was a lot of work. So here you go!
