Open City Almudena Ribot, Enrique Espinosa, Diego García-Setién, 2020-07-28 This publication inquires into the future of post-industrial cities framing and speculating on different industrial contexts: archipelagos (Eibar), fabrics (Cobo Calleja), assemblies (Detroit). Currently 55% of the world's population lives in cities, predictably reaching 70% in 2050. Cities are organisms in continuous transformation: growth, change, but also shrinking or collapse. Open City explores and speculates from contemporaneity about the future of the post-industrial city, where industrial archipelagoes (S), frames (XL) and obsolete or deprogrammed singularities (M/L) represent critical contexts but also opportunities for a new Open City. Open Systems have been the research focus of CoLab since 2013. This book collects some relevant and engagingly contemporary insights. It also includes new unpublished interviews and articles with international participants leading players in this field. CoLaboratorio is a research, prototyping and production space. From the contemporary architecture project CoLab works around industrialization, flexible systems, project participation and collaborative dynamics. With Contributions of: Pier Vittorio Aureli, Marta Catalán, Klaske Havik & Hans Teerds, Juan Herreros, Andrés Jaque, Momoyo Kaijima, María Langarita & Víctor Navarro, Philipp Oswalt, Cedric Price, Andrés de las Alas & Alberto López, Colectivo Berreibar, Almudena Ribot, Enrique Espinosa, Diego García-Setién, Begoña de Abajo, Gaizka Altuna. La industria en el desarrollo del area metropolitana de Valencia Rosa Ma Jordá Borrell, 1986

Análisis de los planes territoriales sectoriales en España Enrique Peiró Sánchez-Manjavacas, 2017-06-21 Las circunstancias actuales de la planificación territorial y urbanística en España hacen necesario el planteamiento de nuevos modelos de desarrollo que den solución a los retos y realidades territoriales más complejos. La obra analiza en primer lugar, la situación actual para poder caracterizar la planificación sectorial, valorando cuestiones concretas, como los instrumentos para llevar a cabo la planificación o las relaciones jerárquicas entre ellos. Una vez completado el análisis, se da paso al diagnóstico y tipificación con una metodología de análisis multicriterio capaz de valorar cuestiones muy diversas. El trabajo se cierra con la definición de la planificación sectorial y las tendencias actuales de aplicación, a partir de las cuales se presentan unas primeras propuestas de mejora de la aplicación de la planificación sectorial, que permitan la mejora en la ordenación del territorio.

Construyendo gobernanza metropolitana Alaina Harkness, Alfredo Ramírez, Alfredo Rihm, Arturo Orellana, Benoit Lefevre, Cristián Robertson, Diane E. Davis, Enid Slack, Esteban Valenzuela, Felipe Vera, Francisca Astaburuaga, Francisca Maria Magdalena Rojas, Gustavo Carvalho, Ignacio Cienfuegos, James Robinson, Jorge Ducci, Juan Carlos Muñoz, Luis Eduardo Bresciani, Luis Valenzuela, Pablo Allard, Pía Bettancourt, Sebastián Alcayaga, Sergio Ortega, 2019-09-05 La complejidad de las aglomeraciones urbanas han aumentado. Las ciudades se han transformado en territorios que presentan importantes desafíos de gobernanza, coordinación inter-jurisdiccional y financiamiento. Aproximadamente el 47% de la población de América Latina y el Caribe vive en 180 aglomerados urbanos con una población de más de 100.000 habitantes, lo que equivale a cerca de 265 millones de personas. Gran parte de estos núcleos urbanos son Áreas Metropolitanas. Ante la necesidad de definir una nueva forma de afrontar los problemas derivados del crecimiento de las áreas urbanas que involucran a más de una municipalidad, se hace relevante poner en discusión diversas visiones y experiencias para entender cómo se puede abordar de manera coordinada y colaborativa la gestión metropolitana. Esta publicación presenta una colección de experiencias, voces y territorios para convertirse en un documento que permita promover reflexiones y propuestas para la implementación de nuevas gobernanzas en Áreas Metropolitanas.

Estrategias de innovación industrial y desarrollo económico en las ciudades intermedias de España Luis Abad Aragón, 2010 Resumen del editor: Las ciudades viven un período de profundas transformaciones en el que afrontan el reto de aumentar su competitividad económica de una forma compatible con la mejora de la calidad de vida y una mayor sostenibilidad. El objetivo central del libro es analizar e interpretar las dinámicas industriales de este tipo de ciudades, con especial atención a su desigual capacidad para construir economías intensivas en conocimiento. A partir de una reflexión teórica sobre las claves que subyacen a las nuevas estrategias espaciales de las empresas, así como las causas de que los procesos de innovación tengan un carácter altamente localizado, la obra se estructura en dos partes complementarias. En la primera se aborda una panorámica de las ciudades de tamaño intermedio en España con datos resultantes de la elaboración y análisis de una amplia base de datos a escala local y la aplicación de diversas técnicas estadísticas. En la segunda, se seleccionan siete ciudades por su tamaño, perfil industrial y dinámicas recientes con el fin de identificar las claves locales de su evolución y la desigual eficacia de las políticas aplicadas. Para ello, se realizó un amplio volumen de entrevistas a empresas, instituciones públicas y representantes de la sociedad local.

Diagnóstico socio-económico de la Región Central, 1988

Economía urbana y regional Ronny Correa-Quezada, Mario Polèse, Fernando Rubiera Morollón, 2020-11-25 El exitoso

columnista del New York Times Thomas Friedman publicó, en 2005, un provocador libro que tituló *La Tierra es plana: breve historia del mundo globalizado del siglo XX*. Impresionado por un viaje realizado a la ciudad de Bangalore, en la India, argumentaba que los procesos de globalización habían logrado tal alcance, que ahora era posible innovar sin necesidad de migrar. En consecuencia, concluía, el mundo se había aplanado, por lo cual la distancia y la localización se convertían en factores totalmente secundarios para los procesos económicos actuales. Esa visión contrastaba con lo que ocurría dentro de las ciencias económicas y, en particular, con uno de sus campos de conocimiento: el de la economía urbana y regional, en el que la distancia, la localización y en general la dimensión espacial de los fenómenos económicos es central para comprender la forma en que operan los procesos de crecimiento y desarrollo.

Aspectos sociales de Santander y sus provincias Amado Guerrero, César Alfonso, Carlos Ramírez, 2022-10-05 Esta publicación hace parte de un proyecto de investigación iniciado en el año 2010, cuando, como resultado de un convenio suscrito entre la Universidad Industrial de Santander y la Gobernación de Santander, se formuló la Visión Prospectiva de Santander 2030, con enfoque territorial. En ese momento escribíamos que, «considerando la globalización un proceso que causa impactos socioeconómicos, culturales, políticos y tecnológicos en un territorio, el aprovechamiento de los recursos y el desarrollo de oportunidades económicas y socioculturales se constituye en un desafío, y por ello la participación de las comunidades empresarial, social y gubernamental en el desarrollo de proyectos movilizadores de la sociedad debe llevar al diseño de un modelo eficiente, competitivo y sostenible que conduzca al desarrollo equitativo y equilibrado del territorio [...] Para lograr este modelo se considera fundamental la planeación de largo plazo que permita establecer metas a partir de referentes generados en los ámbitos nacional e internacional ». Aunque se ha venido participando activamente en diferentes proyectos que propenden por el desarrollo de Santander, como las investigaciones realizadas sobre los sistemas de innovación agroindustrial de Santander (2019) y la formulación del Plan Regional de Competitividad de Santander 2030 (2018) y del Plan de Internacionalización de la Economía de Santander (2019), así como la Identificación de Restricciones Operativas al Crecimiento, Región Administrativa y de Planeación Santanderes (2019), el esfuerzo de actualizar y sistematizar la información en el ámbito territorial no resultó fácil, puesto que en el país no abundan los estudios dedicados al análisis de las dinámicas local y regional, y, sobre todo, la información estadística es precaria, si se exceptúan aquellas derivadas de las entidades nacionales. Y es entonces el mayor aporte de este libro, porque detalla en los ámbitos provincial y municipal aquello que no se diluye en la información agregada en el ámbito departamental. El lector sabrá entender esta complejidad, aunque las deficiencias sean nuestras.

Reflexiones a propósito de la Revisión del Plan General de Madrid ,

Contaminación y medio ambiente Teófilo Sanfeliu Montolio, Manuel Miguel Jordán Vidal, Ana Boix Sanfeliu, 2005 Nowadays, environmental protection and the economic development objectives can no longer be considered as mutually

exclusive aims. This book includes 13 research works as the result of the collaboration between Universitat Jaume I (UJI) and Universidad Tecnológica y Metropolitana de Chile (UTEM). It deals with the necessity of establishing, regulating and determining the interrelation between important environmental protection issues and the activities carried out in the areas of economy, commerce, agriculture, industry and services.

Economía Española GARCÍA DE LA CRUZ, JOSÉ MANUEL, RUESGA BENITO, SANTOS MIGUEL, 2014-01-01 La economía española, que inició el siglo xxi destacando por su elevada tasa de crecimiento económico, las mejoras importantes en el bienestar, la internacionalización de sus empresas y su fuerte atractivo para los flujos migratorios del exterior, lleva ya un lustro padeciendo una profunda crisis económica y social como consecuencia de la fragilidad y la dependencia de la financiación externa, así como por la propia debilidad de su estructura productiva. La dependencia de la financiación externa, que se ha manifestado en un elevado nivel de endeudamiento privado, tanto de empresas como de familias, al inicio de la crisis financiera internacional, explica en qué manera las dificultades de acceso al crédito exterior, derivadas de tal crisis, y la posterior explosión de la burbuja inmobiliaria bloquearon el crecimiento interno, al tiempo que las carencias en materia de competitividad internacional condujeron a la economía española a una situación de emergencia con resultados negativos sobre la actividad. Así, los cierres de empresas se han ido acelerando desde 2008, el desempleo se ha generalizado y los déficits presupuestarios, en buena medida vinculados a la fuerte caída de los ingresos públicos, han debilitado las políticas públicas hasta extremos inimaginables. Esta situación de extrema debilidad obliga a recordar las potencialidades de la economía española, evaluando los cambios habidos en la estructura y en el marco institucional, pero también a identificar los problemas pendientes de solución. La economía española cuenta con una historia de éxito en años pasados que la acercó a los estándares de nivel de vida medios de la Unión Europea, dando muestra de la capacidad de reacción y modernización de su economía ante los retos de la integración -de su integración- en el mercado común europeo, primero, y en la unión monetaria, más tarde. En este periodo más reciente se vienen produciendo cambios profundos en las regulaciones fundamentales de la actividad económica, desde el mercado laboral hasta el sector financiero, pasando por la política de competencia o la del sector de las telecomunicaciones, que tendrán repercusiones directas sobre la trayectoria actual y futura del crecimiento económico global y el de los diferentes sectores económicos, así como sobre las políticas sociales. Asimismo, la crisis ha puesto de relieve, aún más si cabe, la influencia de la Unión Europea en el devenir de la economía española, de sus políticas económicas y sociales e incluso en la determinación de las prioridades de ambas, economía y sociedad españolas. Contemplando estas reflexiones, este libro, en su segunda edición, pretende ofrecer una panorámica de los diferentes aspectos de la economía española, de su trayectoria de crecimiento, de sus sectores más relevantes, de su grado y su forma de inserción en la economía internacional, así como de la acción pública en materia de regulación de la actividad en sus muy diversas facetas, de su actuación fiscal y presupuestaria, o de las políticas de protección y bienestar

social, con un objetivo básico: que aquellos que lo lean puedan adquirir instrumentos mínimos pero suficientes para interpretar una realidad que, sin duda, condiciona su vida y la de quienes están a su alrededor.
