Evolución histórica del espacio comarcal Fernando García Rubio, 2007

Mapa de áreas de cambio e innovación en la Comunidad Valenciana Josep-Antoni Ybarra, 2008 La identificación de las diversas áreas de especialización productiva en la Comunidad Valenciana permite realizar un mapa de la estructura industrial de este territorio, así como de la dinámica de producción existente. La información que ofrece este mapa de áreas sirve para establecer qué sectores pueden constituir una nueva base industrial, lo que resulta de gran interés para la elaboración de políticas económicas de desarrollo. Los autores de este libro son profesores del Departamento de Economía Aplicada y Política Económica de la Universidad de Alicante. Sus investigaciones se enmarcan en el ámbito de la economía industrial y regional dentro del grupo de investigación Economía Industrial y Desarrollo Local.

De la ordenación a la planificación territorial estratégica en el ámbito regional-comarcal Orides Mezzaroba, Fernando Galindo, 2010 Este libro aborda inicialmente la planificación sectorial o especial de los elementos o subsistemas del territorio regional y comarcal: ciudades y asentamientos, equipamientos, infraestructuras, actividades económicas y patrimonio natural y cultural. Después, una vez conocidos los elementos, se integrarán en la planificación de las áreas más urbanizadas, por una parte, y en la de las menos urbanizadas por otra, tomando como unidad territorial las comarcas, con especial referencia a las de montaña.

Los hábitos de movilidad en la Universitat de València (2005-2006) Juan Miguel Albertos Puebla, Joan Noguera Tur, Ma Dolores Pitarch Garrido, Julia Salom Carrasco, 2011-11-28 Les pautes de mobilitat quotidiana entre lloc de residència i lloc de treball o d'estudi són un element fonamental de la qualitat de vida dels universitaris, amb notables implicacions per a la sostenibilitat urbana i la protecció del medi ambient. Des d'aquesta noble perspectiva, aquest estudi presenta i analitza els resultats de la I Enquesta sobre Hàbits de Mobilitat de la Universitat de València (2005-2006). Els universitaris fan un ús notable del transport col·lectiu, però en els últims anys s'està produint un cert abandó d'alguns mitjans de transport públic, que no és compensat per més ús de la bicicleta. Es fa així necessària l'elaboració d'un Pla de Mobilitat Universitària, integrat en una estratègia de mobilitat metropolitana, en el qual les administracions públiques i la Universitat adquireixen compromisos per a avançar cap a un model més sostenible.

LA GEOINFORMACIÓN EN LA EDUCACIÓN PARA LA SOSTENIBILIDAD INTEGRANDO LOS PRINCIPIOS DE ROSENSHINE. SITUACIONES DE APRENDIZAJE DE LÁZARO Y TORRES, María Luisa ,PUERTAS AGUILAR, Miguel Ángel ,2022-10-28 Esta obra surge de la necesidad de contar con ejemplos de situaciones de aprendizaje para los estudiantes de la asignatura de Complementos para la Formación Disciplinar en Geografía, dentro del Máster Universitario en Formación del Profesorado de Educación Secundaria Obligatoria y Bachillerato, Formación Profesional y Enseñanzas de Idiomas en la especialidad de Geografía e Historia de la UNED. Se aportan situaciones prácticas en el contexto del currículum actual para contribuir a que la geografía sea impartida en los centros de una forma dinámica y comprensiva, que divierta, impulse el pensamiento crítico y favorezca el aprender a actuar con conocimiento alejándose así de esa geografía memorística y descriptiva que no aporta ningún valor al alumnado. Se ofrecen herramientas y apoyo para que los futuros profesores puedan explicar geografía con mapas dinámicos, interactivos y en línea, e impulsen la búsqueda y selección de datos de calidad e interoperables, referenciados en el territorio, que pueden ser integrados en ellos. Han colaborado en esta obra con los resultados de su trabajo los estudiantes del curso 2021-2022, tutores y profesorado de la UNED y de otras universidades españolas implicados en la formación de profesores de secundaria.

QGIS Aplicado al urbanismo Rafael R. Temes Cordovez,2021-07-22 Este libro ofrece una aproximación práctica y sencilla a las posibilidades de uso que tiene una herramienta de software libre como QGIS en trabajos relacionados con el urbanismo. La obra está dirigida tanto a estudiantes que se aproximan al urbanismo como a técnicos y profesionales que quieren conocer el potencial de ayuda que pueden ofrecerles las herramientas SIG en su trabajo diario. Se estructura en seis capítulos en los que se explica, de forma práctica, didáctica y pormenorizada, los trabajos habituales en el análisis urbano, la planificación y la toma de decisiones. Se abordan contenidos relacionados con el análisis de redes (movilidad urbana), inventario catastral, gestión de datos estadísticos y análisis multicriterio en entornos urbanos. El libro contiene ejercicios de autoevaluación resueltos y un caso de estudio complejo en el que se ponen en práctica la mayor parte de los contenidos desarrollados.

Género, poder y desarrollo Sánchez Pérez, Laura,2020-07-24 Descripción / Resumen (Español / Castellano): Con la entrada en vigor de la Ley Orgánica 3/2007 (conocida como la Ley de Igualdad), la imposición de cuotas de representación paritaria en las candidaturas españolas supuso una alteración de la composición de género en la administración local (por ser el nivel más amplio y elemental de la organización política española), en donde los individuos han tenido que reconfigurar y redefinir tanto sus prácticas como su imaginario, para adaptarse a un escenario forzosamente heterogéneo. En esta tesis se evalúa el estado de la igualdad de género en la política municipal gallega para conocer en qué medida la Ley de Igualdad ha resultado efectiva para generar entornos de participación igualitaria y, al mismo tiempo, para detectar prácticas encubiertas

de discriminación que reduzcan su efectividad. A través de una metodología desarrollada específicamente para esta investigación, se presenta un análisis detallado de la situación del acceso femenino al poder, así como de las diferentes situaciones de vulnerabilidad con la que se topan las mujeres en las distintas fases del proceso político: desde la selección de candidatos, pasando por la designación de cargos y también en el reparto de la gestión de las áreas municipales. Así, esta tesis contribuye a identificar situaciones potenciales de riesgo para las mujeres surgidas de este nuevo escenario de participación política, para que puedan ser corregidas a partir de la implementación de medidas específicas para reducir la desigualdad y, de este modo, ayudar a conseguir una igualdad de género efectiva. Descripción / Resumen (Inglés): The Spanish Organic Law 3/2007, on women and men equality, establishes a double quota of gender representation on electoral lists. This fact changed the gender composition of local governments at the most general and elementary level of the Spanish political organization. Politicians have had to reconfigure and redefine both their practices and their imaginary, to adapt to this new necessarily heterogeneous social stage. This dissertation evaluates the gender equality situation in Galician local governments in order to know if the Gender Equality Law has been an effective tool to create an equal participation environment. At the same time this research analyzes and discerns covert practices of discrimination against women. Through a specifically developed methodology, this research presents a detailed analysis of the female access to municipal power, as well as of the different situations of vulnerability in which women are found in the different stages of the political process: from the selection of the candidates, to the appointment of political positions and in the distribution of the management of the work's areas. This dissertation contributes to identify potential risk situations for women arising from this new stage of gender political participation. In consequence, these bad practices could be corrected through the implementation of specific measures to reduce inequality and, contributing to achieve effective gender equality.

Aspectos jurídicos de la ordenación del territorio en la Comunitat Valenciana Eduardo García de Leonardo Tobarra,2018-06-21 Este trabajo se ocupa de los orígenes, evolución y situación actual de la ordenación del territorio en la Comunidad Valenciana. Se trata de un campo habitualmente no demasiado estudiado entre los juristas pues, en materia de ordenación de usos del suelo, estos suelen fijar más su atención en los aspectos relacionados con la ordenación, gestión y disciplina urbanística. El objeto de este trabajo es doble. Por una parte, se pretende abordar el análisis de los distintos aspectos jurídicos de la ordenación del territorio en la Comunidad Valenciana. Por otra parte, se trata también de identificar alguna de las causas por las que la ordenación del territorio no termina de arraigar en la Comunidad Valenciana, esto es, las causas del distanciamiento entre legislación y realidad.

Gasto no obligatorio de los municipios Leonardo Margareto Layunta,2017-06-21 El Ayuntamiento es la institución de Gobierno que mayores presiones recibe al ser la más accesible para los ciudadanos. La legislación vigente establece cuáles son las obligaciones que deben atender los ayuntamientos en relación con su número de habitantes, aunque en realidad los municipios asumen muchas otras funciones. Debido al contexto político-económico en el que se desenvuelven, han de adaptarse a constantes cambios sociales para dar respuesta a las necesidades de los vecinos. El presente trabajo aborda ampliamente estos aspectos durante los años 2005 y 2010, y realiza una radiografía sobre la situación económica de los ayuntamientos agrupados según su número de habitantes en esos mismos años, lo que permite analizar la evolución de la situación. El objetivo final es ver si la actual realidad económica ha influido o no, en la estructura general de esos gastos.

La innovación territorial y el empleo en la Comunidad Valenciana Jorge Hermosilla Pla,2020-09-24 La innovación, en sus dimensiones empresarial y social, se ha implementado de manera desigual en el territorio valenciano. Por ello, mediante un análisis de los procesos que inciden favorablemente en el desarrollo de esta, un equipo de investigadores universitarios que tienen como objeto de estudio los procesos de innovación y sus efectos en el mercado laboral, han elaborado varios trabajos sectoriales que se reúnen en este libro y que, en particular, se centran en los ámbitos agroalimentario, industrial y turístico, en territorios de referencia, principalmente en comarcas caracterizadas por su especialización económica.

Globalización y desarrollo local José Honrubia López,2004 Difícilmente tendría sentido analizar el desarrollo económico de la Comunidad Valenciana en el umbral del siglo XXI, sin tener en cuenta la importancia y transcendencia del fenómeno de la globalización económica en el ámbito mundial en la actualidad. Este libro se centra en las consecuencias en la Comunidad Valenciana del proceso de globalización económica (integración internacional creciente de los mercados de

trabajo, bienes, servicios, tecnología y capitales), que conlleva una tendencia generalizada hacia la liberalización del comercio, la desregulación económica y financiera, la preocupación por los grandes temas medioambientales, las innovaciones tecnológicas, así como el declive y superación de los estados-nación.

Diez retos del territorio valenciano J. Fernando Vera Rebollo, Jorge Olcina Cantos, 2025-07-10 La Comunitat Valenciana afronta un nuevo contexto dominado por los efectos de un cambio climático acelerado y de una transformación territorial que no respeta las dinámicas naturales, basada en decisiones políticas que ponen en jaque logros del estado del bienestar y dan lugar a problemas y riesgos que obligan a repensar comportamientos y procesos socioeconómicos considerados estables hasta ahora. Presentamos aquí, a partir de un análisis riguroso y con visión propositiva, diez retos que precisan de medidas de actuación rápidas y aplicables planteadas por un grupo de especialistas de formación diversa y comprometidos con la sociedad. No son los únicos desafíos del territorio valenciano, pero sí son los de mayor repercusión socioeconómica y territorial. Un trabajo colectivo que pretende contribuir al diseño de una hoja de ruta para las políticas públicas de la Comunitat Valenciana en este momento complejo y que parte del principio básico de la necesidad de pensar para actuar. Los territorios avanzan desde la reflexión, mediante la formulación de objetivos realistas y de ideas razonables y prácticas que aportan argumentos para un mejor gobierno y un cambio positivo en torno a cuestiones prioritarias para los años venideros.

Los íberos en la Comunitat Valenciana M. Consuelo Mata Parreño, David Quixal Santos, 2021-05-31 Con el objetivo de impulsar el conocimiento del patrimonio ibero en la Comunitat Valenciana, además de una conservación sostenible que genere sinergias entre diversos actores económicos y sociales, el presente volumen pretende ser una guía adecuada para poner en valor los yacimientos arqueológicos mediante su protección, conservación, restauración, mantenimiento, documentación, investigación, difusión, accesibilidad y desarrollo sostenible, todo ello teniendo en cuenta los entornos naturales en los que está enclavado, aunando así naturaleza y arte. Solo de ese modo se podrá establecer un uso público cultural y turístico sostenible.
